UBS (Lux) Equity Fund - Tech Opportunity (USD)

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

governance prac- tices.	•• 🗌 Yes		• • 🖾 No	
		It will make a minimum of sustainable investments with an environmental objective:%		It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable invest- ment, it will have a minimum proportion of % of sustainable investments
The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, estab- licit of en		in economic activities that qualify as environmentally sustainable under the EU Taxonomy		with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
lishing a list of en- vironmentally sustainable eco- nomic activities. That Regulation does not include a list of socially sus- tainable economic		in economic activities that do not qualify as environmentally sus- tainable under the EU Taxonomy		with an environmental objective in economic activities that do not qualify as environmentally sus- tainable under the EU Taxonomy
activities. Sustaina- ble investments with an environ- mental objective				with a social objective
might be aligned with the Taxonomy or not.		It will make a minimum of sustainable in- vestments with a social objective:		It promotes E/S characteristics, but will not make any sustainable investments
		%		

Sustainability in-
dicators measure
how the environ-
mental or social
characteristics pro-
moted by the finan-
cial product are at-
tained.

What environmental and/or social characteristics are promoted by this financial prod- uct?		
The following characteristics are promoted by the financial product:		
1) A lower Weighted Average Carbon Intensity (WACI) than the reference benchmark or a low absolute carbon profile.		
2) A sustainability profile that is higher than its benchmark's sustainability profile or a minimum of 51 % of assets invested in companies with a sustainability profile in the top half of the benchmark.		
The benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.		
 What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial prod- uct? 		
 The above characteristics are measured using the following indicators respectively:		
Characteristic 1):		
Scope 1 and 2 Weighted Average Carbon Intensity (WACI):		
- Scope 1 refers to direct carbon emissions and therefore includes all direct greenhouse gas emissions from owned or controlled sources of the relevant entity or issuer.		
- Scope 2 refers to indirect carbon emissions and therefore includes greenhouse gas emissions from the generation of electricity, thermal energy and/or steam that is consumed by the relevant entity or issuer.		
Low absolute carbon profile is defined as below 100 tonnes of CO2 emissions per million US dollars of revenues.		
Characteristic 2):		
The UBS Blended ESG Score is used to identify issuers/companies for the investment universe with strong environmental and social performance characteristics, or a strong sustainability profile. This UBS Blended ESG Score is a normalized weighted average of ESG score data from internal and recognized external providers. Rather than relying on an ESG score from a single provider, the UBS Blended ESG Score approach increases conviction in the validity of the sustainability profile.		
The UBS Blended ESG Score assesses sustainability factors, such as the performance of the relevant issuers/companies with reference to environmental, social and governance (ESG) aspects. These ESG aspects relate to the main areas in which the issuers/companies operate and their effectiveness in managing ESG risks. Environmental and social factors can include (amongst others) the following: environmental footprint and operational efficiency, environmental risk management, climate change, natural resource usage, pollution and waste management, employment standards and supply chain monitoring, human capital, diversity within the board of directors, occupational health and safety, product safety, as well as anti-fraud and anti-corruption guidelines.		
The individual investments in the sub-fund have a UBS Blended ESG Score (on a scale of 0-10, with 10 having the best sustainability profile). There is no minimum UBS Blended ESG Score at individual investment level.		
With respect to the sub-fund's investments the Portfolio Manager includes ESG analysis by means of the UBS Blended ESG Score (by number of issuer) for at least (i) 90% of the securities issued by large capitalisation companies domiciled in "developed" countries and (ii) 75% of the securities issued by large capitalisation companies domiciled in "emerging" countries (by reference to the benchmark) and at least 75% for all other companies.		

	 What are the objectives of the sustainable investments that the financial prod- uct partially intends to make and how does the sustainable investment con- tribute to such objectives?
	Not applicable.

	The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned

specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

investments should not significantly harm EU Taxonomy objectives and is accompanied by

Any other sustainable investments must also not significantly harm any environmental or social objectives.

	compar bines m actiona	e the company's ESG risk profile and thereby mitigate the potential negative impact of ESG issues on the ny's financial performance. The Portfolio Manager employs an internal UBS ESG risk dashboard that com- ultiple internal and external ESG data sources in order to identify companies with material ESG risks. An ble risk signal highlights ESG risks to the Portfolio Manager for incorporation in their investment decision process.
		on-corporate issuers, the Portfolio Manager applies a qualitative or quantitative ESG risk assessment that es data on material ESG factors.
	lowing	alysis of material sustainability/ESG considerations can include many different aspects, such as the fol- among others: the carbon footprint, health and well-being, human rights, supply chain management, fair er treatment and governance.
	Sustain	ability Exclusion Policy:
	univers	tainability Exclusion Policy of the Portfolio Manager outlines the exclusions applied to the investment e of the financial product. The link to the Sustainability Exclusion Policy can be found in the section "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.
	•	What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics pro- moted by this financial product?
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product:
		Characteristic 1):
		A lower Scope 1 and 2 Weighted Average Carbon Intensity (WACI) than its benchmark or a low abso- lute carbon profile.
		The calculations do not take account of cash, derivatives and unrated investment instruments.
		Characteristic 2):
		A sustainability profile that is higher than its benchmark's sustainability profile or a minimum of 51% of assets invested in companies with a sustainability profile in the top half of the benchmark.
		The calculations do not take account of cash, derivatives and unrated investment instruments.
		The characteristic(s), the minimum proportion of sustainable investments and the minimum propor- tion of investments used to meet the environmental and/or social characteristics are calculated at quarter end using the average of all business days' values in the quarter.
		Sustainability Exclusion Policy:
		The Sustainability Exclusion Policy of the Portfolio Manager outlines the exclusions applied to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the section headed "Sustainability Exclusion Policy" in the main body of the Sales Prospectus.
	•	What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?
		Not applicable.
Good governance practices include sound manage- ment structures, employee relations, remuneration of staff and tax com- pliance.	•	What is the policy to assess good governance practices of the investee com- panies?
		Good corporate governance is a key driver of sustainable performance and is therefore embedded in the Portfolio Manager's investment strategy. The Portfolio Manager employs a proprietary ESG Risk Dashboard that combines multiple ESG data sources from internal and recognized external providers

pliance.

in order to identify companies with material ESG risks. An actionable risk signal highlights ESG risks to the Portfolio Manager for incorporation in their investment decision making process. The assessment of good governance includes consideration of board structure and independence, remuneration alignment, transparency of ownership and control, and financial reporting.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 51%.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

 How does the use of derivatives attain the environmental or social character- istics promoted by the financial product?
Derivatives are not used for the attainment of the characteristics promoted by this financial product. Derivatives are primarily used for hedging and liquidity management purposes.
To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?
Not applicable.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limita- tions on emissions and switching to re- newable power or low-carbon fuels by the end of 2035. For nuclear en- ergy, the criteria in- clude comprehen- sive safety and waste management rules. Enabling activi- ties directly enable other activities to make a substantial contribution to an environmental ob- jective. Transitional activ- ties are activities for which low-car- bon alternatives are not yet availa- ble and among oth- ers have green- house gas emis- sion levels corre- sponding to the best performance.	 Does the financial product invest in for ties that <i>comply</i> with the EU Taxonom 	ossil gas and/or nuclear energy related activi- ny ¹⁴ ?

	 What is the minimum share of investiga? 	stments in transitional and enabling activi-

	ties?
	Not applicable.
are environ- mentally sustaina- ble investments that do not take into account the criteria for environ- mentally sustaina- ble economic activ- ities under the EU Taxonomy.	What is the minimum share of sustainable investments with an environmental objec- tive that are not aligned with the EU Taxonomy?
	Not applicable.
	What is the minimum share of socially sustainable investments?
	Not applicable.

¹⁴ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

		What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?
	_	Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk manage- ment. Unrated instruments may also include securities for which data needed for the measurement of attain- ment of environmental or social characteristics is not available.
		Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?
Reference bench- marks are indexes to measure whether the finan- cial product attains the environmental or social character- istics that they pro- mote.		No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.
		 How is the reference benchmark continuously aligned with each of the en- vironmental or social characteristics promoted by the financial product?
		Not applicable.
		 How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?
		Not applicable.
		• How does the designated index differ from a relevant broad market index?
		Not applicable.
		 Where can the methodology used for the calculation of the designated in- dex be found?
		Not applicable.
		Where can I find more product specific information online?
		More product-specific information can be found on the website: <u>www.ubs.com/funds</u>
