

Periodic disclosure as at 31.03.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name:

Swisscanto (LU) Portfolio Fund Responsible Ambition (CHF)

Legal entity identifier (LEI-Code):

549300CQ3FJL25CFNE54

Benchmark

Swisscanto (LU) Portfolio Fund Responsible Ambition (CHF) in CHF

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

| <input checked="" type="radio"/> Yes | <input checked="" type="radio"/> No |
|---|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : _% | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 34.86% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO₂e intensity
4. Sustainable Investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

...and compared to previous periods?

Exclusion Criteria

| Responsible | | | | | | | |
|---|------------------|--|----------------------------------|--|------------------|------------------|----------------------------------|
| Criteria | Portfolio weight | Benchmark weight | Number of companies in benchmark | Criteria | Portfolio weight | Benchmark weight | Number of companies in benchmark |
|  Coal reserves (ex. metal production) | 0.00% | 0.62% | 55 |  Production of military hardware (>5% revenue) | 0.00% | 0.59% | 31 |
| Extraction of coal (>5% revenue) | 0.00% | 0.23% | 28 | UN Global Compact violations | 0.00% | 0.37% | 21 |
|  Climate change | |  Risk to society and health | | Manufacture of weapons and ammunition | 0.00% | 0.35% | 11 |
| | | | | Controversial weapons | 0.00% | 0.30% | 5 |
| | | | | Exploitative child labour | 0.00% | 0.25% | 6 |
| | | | | Production of pornography | 0.00% | 0.01% | 2 |

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

| | Indicator | Reporting Period 2023 | Reporting Period 2024 |
|-----------|---------------------------|-----------------------|-----------------------|
| Portfolio | Exclusion Criteria Total* | 0% | 0% |
| Benchmark | Exclusion Criteria Total* | 1.85% | 2.06% |

*all exclusion criteria cumulated.

ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

| | Indicator | Reporting Period 2023 | Reporting Period 2024 |
|-----------|--------------------------|-----------------------|-----------------------|
| Portfolio | Exposure to ESG Laggards | 4.14% | 2.9% |
| Benchmark | Exposure to ESG Laggards | 8.3% | 6.52% |

Reduction of CO₂e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO₂e emissions by at least 4% per year. The reduction path is calculated from the weighted CO₂e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO₂e intensities of the portfolio and of the benchmark respectively. CO₂e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

| | Indicator | Reporting Period 2023 | Reporting Period 2024 |
|-----------|---------------------------------------|-----------------------|-----------------------|
| Portfolio | Achievement of climate target | -30% | -34% |
| | CO ₂ e intensity Corporate | 77 | 65 |
| | CO ₂ e intensity Sovereign | 446 | 392 |
| | Reduction Corporate | -36% | -42% |
| | Reduction Sovereign | 27% | 21% |
| Benchmark | Achievement of climate target | 23% | 15% |
| | CO ₂ e intensity Corporate | 147 | 125 |
| | CO ₂ e intensity Sovereign | 475 | 444 |
| | Reduction Corporate | 21% | 12% |
| | Reduction Sovereign | 35% | 37% |

Sustainable Investments

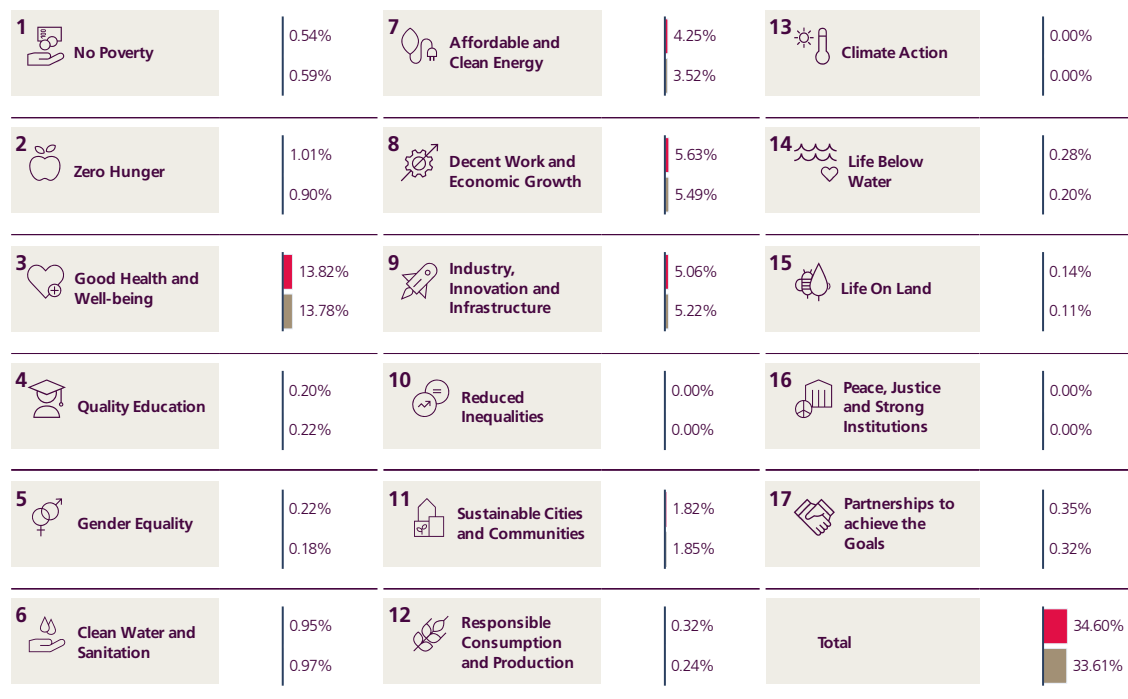

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The asset management of the subfund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs.

The historical comparisons are made in the table below.

| | Indicator | Reporting Period 2023 | Reporting Period 2024 |
|-----------|---|-----------------------|-----------------------|
| Portfolio | Socially sustainable investments | 24.99% | 24.31% |
| | Sustainable Investments with environmental target | 9.53% | 10.54% |
| | Total sustainable quota | 34.52% | 34.86% |
| Benchmark | Socially sustainable investments | 24.56% | 24.39% |
| | Sustainable Investments with environmental target | 8.2% | 9.38% |
| | Total sustainable quota | 32.76% | 33.77% |

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts - Corporate Assets

Primary Indicators - Energy and Emissions

| Indicator | Factor | Portfolio Current | Coverage | Portfolio previous year | Benchmark current | Benchmark previous year | Explanation |
|---|--|-------------------|----------|-------------------------|-------------------|-------------------------|-------------|
| 1. GHG emissions | 1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value | 4946.01 | 77.2% | 3257.84 | 9405.16 | 6327.59 | |
| | 1b. GHG Emissions - Scope 2 per Mio EUR Enterprise Value | 1167.19 | 77.2% | 736.44 | 1645.72 | 1197.4 | |
| | 1c. GHG Emissions - Scope 3 per Mio EUR Enterprise Value | 60814.8 | 77.2% | 37112.6 | 62989.8 | 42251.5 | |
| 2. Carbon footprint | 2. GHG Emissions - Scope 1+2+3 per Mio EUR Enterprise Value | 307.4 | 77.2% | 200.55 | 340.61 | 242.71 | |
| 3. GHG intensity of investee companies | 3. GHG Emissions - Emissions Intensity - Total Emissions (EUR) | 90.96 | 77.82% | 78.17 | 171 | 136.55 | |
| 4. Exposure to companies active in the fossil fuel sector | 4. Fossil Fuel - Involvement (PAI) | 3.76% | 78.63% | 2.41% | 5.8% | 4.28% | |

| Indicator | Factor | Portfolio Current | Coverage | Portfolio previous year | Benchmark current | Benchmark previous year | Explanation |
|--|---|-------------------|----------|-------------------------|-------------------|-------------------------|--|
| 5. Share of non-renewable energy consumption and production | 5a. CR Raw - Energy use - Coal/nuclear/unclear energy sources | 54.85% | 46.14% | 40.21% | 57.84% | 42.11% | |
| | 5b. Non-renewable energy consumption | 37.49% | 48.5% | 56.44% | 38.02% | 56.39% | Non-renewable energy consumption encompasses consumption of energy generated from non-renewable sources, as well as energy consumption from biomass. Any energy use figures where the source of energy is unclear is also included in this factor. |
| | 5c. Non-renewable energy production | 0.83% | 76.85% | 0.35% | 1.85% | 1.44% | |
| 6. Energy consumption intensity per high impact climate sector | 6. Energy consumption intensity (GWh/mEUR) | 0.27 | 55.73% | 0.22 | 10.28 | 3.83 | |

Energy Consumption Intensity per High Impact Climate Sector (per mio EUR) (PAI 6 see above)

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.04.2023 - 31.03.2024

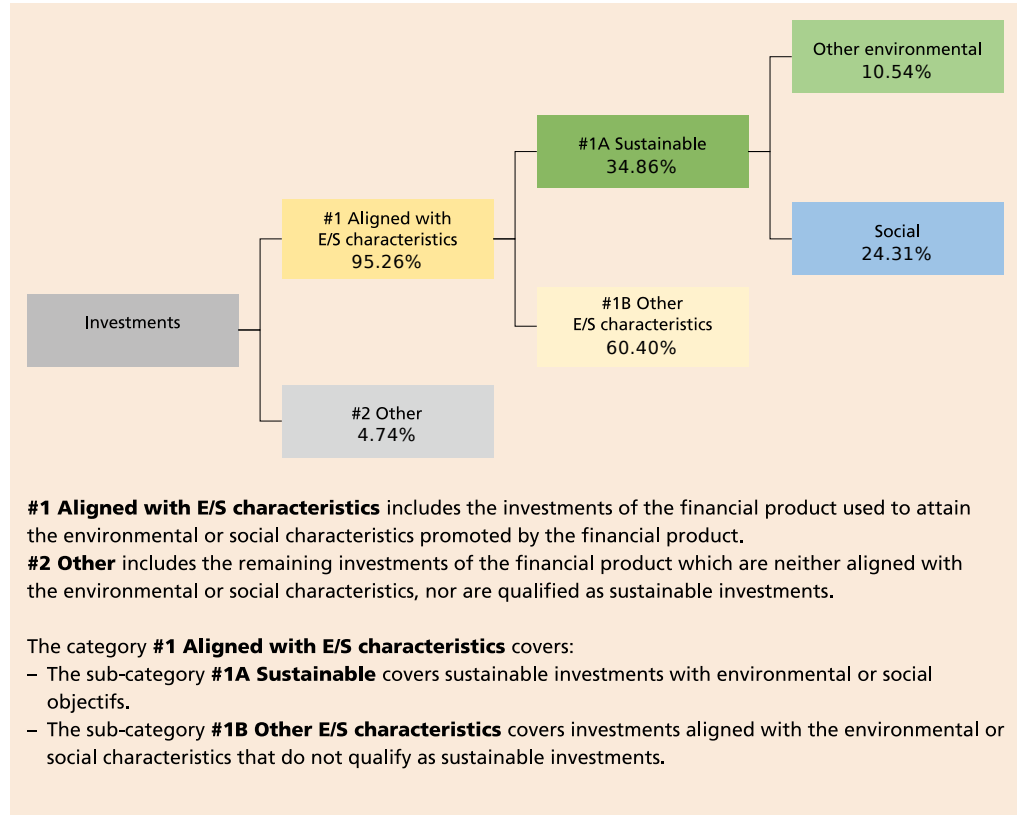

| Largest investments | Sector | % Assets | Country |
|--|------------------------------------|----------|-------------|
| Nestle S.A. | Manufacturing | 4.89% | Switzerland |

| Zurich Insurance Group Ltd | Financial and Insurance Activities | 1.39% | Switzerland |

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

What was the asset allocation?

In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

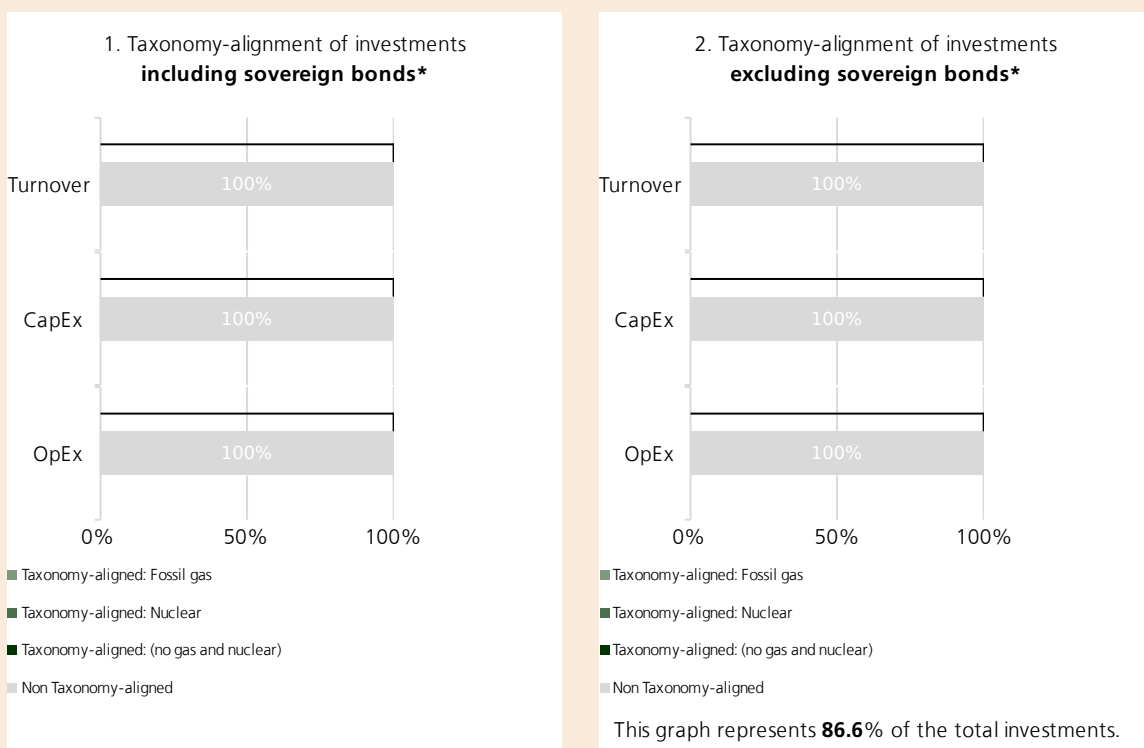

In fossil gas

In nuclear energy

No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

| Issuer Name | Nace Sector | Total Eligible Activity Revenue | Total Aligned Revenue | Total Likely Aligned Revenue | Total Potentially Aligned Revenue | Portfolio Weight (Consol.) |
|--|---|---------------------------------|-----------------------|------------------------------|-----------------------------------|----------------------------|
| Elia Group SA/NV | Construction | 99.98% | 24.95% | 15.00% | 0.00% | 0.00% |
| Vestas Wind Systems A/S | Manufacturing | 100.00% | 24.00% | 0.00% | 75.00% | 0.00% |
| Terna S.p.A. | Water Supply, Sewerage, Waste Management and Remediation Activities | 87.76% | 21.75% | 13.10% | 0.00% | 0.02% |
| Redeia Corporacion SA | Construction | 84.35% | 19.80% | 12.73% | 0.00% | 0.09% |
| Orsted | Water Supply, Sewerage, Waste Management and Remediation Activities | 56.27% | 18.25% | 31.86% | 0.00% | 0.01% |
| Orsted A/S | Electricity, Gas, Steam and Air Conditioning Supply | 56.27% | 18.25% | 31.86% | 0.00% | 0.00% |
| National Grid plc | Electricity, Gas, Steam and Air Conditioning Supply | 19.17% | 16.75% | 0.00% | 0.36% | 0.03% |
| National Grid Electricity Distribution (South Wales) Plc | Financial and Insurance Activities | 19.17% | 16.75% | 0.00% | 0.36% | 0.00% |
| NGG Finance Plc | Financial and Insurance Activities | 19.17% | 16.75% | 0.00% | 0.36% | 0.00% |
| Klepierre SA | Real Estate Activities | 99.75% | 16.00% | 15.00% | 60.00% | 0.05% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset management promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the SDGs. How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.
