What is this product?

TYPE

The product is a sub-fund of Foord SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

OBJECTIVES

The Investment Manager aims to achieve meaningful inflation-beating US dollar returns over rolling five-year periods. The Sub-Fund is actively managed; the Investment Manager actively decides on the portfolio's asset selection, regional allocation, sector views and overall level of exposure to the market in order to take advantage of investment opportunities. The Sub-Fund is not managed in reference to a benchmark. It is a multi-asset strategy sub-fund; a conservatively managed portfolio of global equities, warrants, exchange traded funds, UCITS and Other UCIs, interest-bearing securities, commodity-backed or commodity-linked securities, structured products and cash instruments reflecting the Investment Managers prevailing best investment view. The portfolio also includes investments in China A-Shares through the Shanghai Hong Kong Stock Connect, term deposits and money market funds.

The Sub-Fund does not have sustainable investment as its objective and no index has been designated as a reference benchmark but the Sub-Fund promotes, among other characteristics, certain environmental or social characteristics, or a combination of both within the meaning of Article 8 of SFDR, provided that the companies in which the investments are made follow good governance practices.

The Sub-Fund promotes certain environmental characteristics but does not commit to making investments in Taxonomy-aligned environmentally sustainable investments, as further described in detail under "Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852".

The use of benchmark in the fact sheet or marketing materials (if any) is for performance comparison only.

The investment policy emphasises the geographic spread of investments to achieve the objective. Changes in the perceived appreciation potential in asset classes, markets and currencies will result in changes to their exposure in the Sub-Fund which the Investment Manager may protect with currency transactions. Liquidity levels will be altered accordingly. Individual investments will be moderately actively managed, reflecting their relative attractions. Speculative or low quality investments will normally be avoided.

The Sub-Fund may invest into commodity-backed or commodity-linked securities up to 30% of the Sub-Fund's net asset value.

The Sub-Fund may also invest in money market Instruments and term deposits to minimise volatility, enhance the yield and capital growth of the Sub-Fund while reducing downside risks and waiting for opportunity to take advantage of market dislocation.

The investor may subscribe, convert and redeem units on each bank business day in Luxembourg.

Please refer to the Prospectus for more information about the Sustainable Finance Disclosure Regulation ("SFDR") classification of the Fund.

Income of this unit class is reinvested (accumulated).

INTENDED RETAIL INVESTOR

The product is reserved for institutional investors. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 3 years.

OTHER INFORMATION

The Depositary is CACEIS Investor Services Bank S.A. until 31 May 2024. Effective 1 June 2024, the Depositary will be CACEIS Bank, Luxembourg Branch.

The Investment Manager is Foord Asset Management (Guernsey) Limited and the Sub-Investment Manager is Foord Asset Management (Singapore) Pte. Limited.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:	3 years USD 10 000	
	If you exit after 1 year	If you exit after 3 years

Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	USD 7 450	USD 7 140	
	Average return each year	-25.5%	-10.6%	
Unfavourable scenario	What you might get back after costs	USD 9 040	USD 8 970	This type of scenario occurred for an investment in the product between May 2021 and September 2023.
	Average return each year	-9.6%	-3.6%	
Moderate scenario	What you might get back after costs	USD 10 280	USD 11 310	This type of scenario occurred for an investment in the product between December 2017 and December 2020.
	Average return each year	2.8%	4.2%	
Favourable scenario	What you might get back after costs	USD 12 060	USD 13 060	This type of scenario occurred for an investment in the product between May 2019 and May 2022.
	Average return each year	20.6%	9.3%	

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Lemanik Asset Management S.A. is unable to pay out?

Lemanik Asset Management S.A. is not making any payment to you in relation to this Fund and you would still be paid in case of a default from Lemanik Asset Management S.A.

The Fund's assets are held with CACEIS Bank, Luxembourg Branch and are segregated from the assets of other sub-funds of the Company. The assets of the Fund cannot be used to pay the debts of other sub-funds of the Company.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested.

Investment of USD 10 000	If you exit after 1 year	If you exit after 3 years
Total costs	USD 140	USD 464
Annual cost impact (*)	1.4%	1.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.6% before costs and 4.2% after costs.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested.

Investment of USD 10 000	If you exit after 1 year	If you exit after 3 years
Total costs	USD 145	USD 479
Annual cost impact (*)	1.5%	1.5%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.6% before costs and 4.1% after costs.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

What is this product?

TYPE

The product is a sub-fund of Foord SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

OBJECTIVES

The Investment Manager aims to achieve meaningful inflation-beating US dollar returns over rolling five-year periods. The Sub-Fund is actively managed; the Investment Manager actively decides on the portfolio's asset selection, regional allocation, sector views and overall level of exposure to the market in order to take advantage of investment opportunities. The Sub-Fund is not managed in reference to a benchmark. It is a multi-asset strategy sub-fund; a conservatively managed portfolio of global equities, warrants, exchange traded funds, UCITS and Other UCIs, interest-bearing securities, commodity-backed or commodity-linked securities, structured products and cash instruments reflecting the Investment Managers prevailing best investment view. The portfolio also includes investments in China A-Shares through the Shanghai Hong Kong Stock Connect, term deposits and money market funds.

The Sub-Fund does not have sustainable investment as its objective and no index has been designated as a reference benchmark but the Sub-Fund promotes, among other characteristics, certain environmental or social characteristics, or a combination of both within the meaning of Article 8 of SFDR, provided that the companies in which the investments are made follow good governance practices.

The Sub-Fund promotes certain environmental characteristics but does not commit to making investments in Taxonomy-aligned environmentally sustainable investments, as further described in detail under "Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852".

The use of benchmark in the fact sheet or marketing materials (if any) is for performance comparison only.

The investment policy emphasises the geographic spread of investments to achieve the objective. Changes in the perceived appreciation potential in asset classes, markets and currencies will result in changes to their exposure in the Sub-Fund which the Investment Manager may protect with currency transactions. Liquidity levels will be altered accordingly. Individual investments will be moderately actively managed, reflecting their relative attractions. Speculative or low quality investments will normally be avoided.

The Sub-Fund may invest into commodity-backed or commodity-linked securities up to 30% of the Sub-Fund's net asset value.

The Sub-Fund may also invest in money market Instruments and term deposits to minimise volatility, enhance the yield and capital growth of the Sub-Fund while reducing downside risks and waiting for opportunity to take advantage of market dislocation.

The investor may subscribe, convert and redeem units on each bank business day in Luxembourg.

Please refer to the Prospectus for more information about the Sustainable Finance Disclosure Regulation ("SFDR") classification of the Fund.

Income of this unit class is reinvested (accumulated).

INTENDED RETAIL INVESTOR

The product is reserved for institutional investors. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 3 years.

OTHER INFORMATION

The Depositary is CACEIS Investor Services Bank S.A. until 31 May 2024. Effective 1 June 2024, the Depositary will be CACEIS Bank, Luxembourg Branch.

The Investment Manager is Foord Asset Management (Guernsey) Limited and the Sub-Investment Manager is Foord Asset Management (Singapore) Pte. Limited. Further information about the Fund (including the current Prospectus and most recent annual report) is available in english, and information about the Sub-Fund and other share classes (including the latest prices of shares and translated versions of this document), are available free of charge on www.foord.com or by making a written request to Lemanik Asset Management S.A., 106, route d'Arlon, L-8210 Mamer, Luxembourg or by emailing fund.reporting@lemanik.lu.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:	3 years USD 10 000	
	If you exit after 1 year	If you exit after 3 years

Unfavourable scenario	What you might get back after costs	USD 9 160	USD 9 210	This type of scenario occurred for an investment in the product between March 2022 and September 2023.
	Average return each year	-8.4%	-2.7%	
Moderate scenario	What you might get back after costs	USD 10 420	USD 11 760	This type of scenario occurred for an investment in the product between December 2017 and December 2020.
	Average return each year	4.2%	5.6%	
Favourable scenario	What you might get back after costs	USD 12 210	USD 13 580	This type of scenario occurred for an investment in the product between May 2019 and May 2022.
	Average return each year	22.1%	10.7%	

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Lemanik Asset Management S.A. is unable to pay out?

Lemanik Asset Management S.A. is not making any payment to you in relation to this Fund and you would still be paid in case of a default from Lemanik Asset Management S.A.

The Fund's assets are held with CACEIS Bank, Luxembourg Branch and are segregated from the assets of other sub-funds of the Company. The assets of the Fund cannot be used to pay the debts of other sub-funds of the Company.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:	3 years EUR 10 000	
	If you exit after 1 year	If you exit after 3 years

Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs	EUR 7 610	EUR 7 140	
	Average return each year	-23.9%	-10.6%	
Unfavourable scenario	What you might get back after costs	EUR 8 810	EUR 8 290	This type of scenario occurred for an investment in the product between May 2021 and September 2023.
	Average return each year	-11.9%	-6.1%	
Moderate scenario	What you might get back after costs	EUR 10 270	EUR 11 320	This type of scenario occurred for an investment in the product between June 2017 and June 2020.
	Average return each year	2.7%	4.2%	
Favourable scenario	What you might get back after costs	EUR 12 100	EUR 13 200	This type of scenario occurred for an investment in the product between May 2019 and May 2022.
	Average return each year	21.0%	9.7%	

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Lemanik Asset Management S.A. is unable to pay out?

Lemanik Asset Management S.A. is not making any payment to you in relation to this Fund and you would still be paid in case of a default from Lemanik Asset Management S.A.

The Fund's assets are held with CACEIS Bank, Luxembourg Branch and are segregated from the assets of other sub-funds of the Company. The assets of the Fund cannot be used to pay the debts of other sub-funds of the Company.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment of EUR 10 000	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 104	EUR 344
Annual cost impact (*)	1.0%	1.0%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.2% before costs and 4.2% after costs.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.
