## What is this product?

### Type

This product is an investment fund.

### Term

The Fund is established for an unlimited duration, with the possibility for the Board of Directors to decide the termination of the Fund at its sole discretion.

### Objectives

Numeric Emerging Market Equities belongs to the category of Single Manager Funds.

The Funds seeks to increase the value of its assets over the long term by investing predominantly in transferable equity securities such as equities, cooperative shares and participation certificates issued by companies domiciled in or exercise the predominant part of their economic activity in the Emerging Markets.

The minimum asset allocation in such securities on a consolidated basis (direct and indirect investments through the use of derivative instruments) will be of 60% of the Fund's net assets. Moreover, the minimum ownership in equity securities will be of 75% of the Fund's net assets.

The Fund may invest in financial derivative instruments for exposure and hedging purposes.

This Fund is actively managed and is compared to the MSCI Emerging Markets TR Net for performance and risk level indicator

purposes. However, the reference to this index does not constitute any objective or limitation in the management and composition of the portfolio and the Fund does not restrain its universe to the index components.

Therefore returns may deviate materially from the performance of the reference index.

The base currency of the Fund is USD.

Income is systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

### Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

### Practical information

**Custodian Bank** State Street Bank International GmbH, Luxembourg Branch.

**Further information** Further information about the Fund, the prospectus and the latest annual and semi-annual report may be obtained free of charge, in English, from the Management Company, the local agents or online at [www.abnamroinvestmentsolutions.com](http://www.abnamroinvestmentsolutions.com).

## What are the risks and what could I get in return?

### Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of ABN AMRO Investment Solutions to pay you.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at [www.abnamroinvestmentsolutions.com](http://www.abnamroinvestmentsolutions.com).

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable:** this type of scenario occurred for an investment between June 2021 and October 2023.

**Moderate:** this type of scenario occurred for an investment between July 2014 and July 2019.

**Favourable:** this type of scenario occurred for an investment between February 2016 and February 2021.

### What happens if ABN AMRO Funds Numeric Emerging Market Equities is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should we default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
<b>Total Costs</b>	<b>854 EUR</b>	<b>1,870 EUR</b>
<b>Annual cost impact*</b>	<b>8.6%</b>	<b>4.0% each year</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.9% before costs and 3.9% after costs.

## Composition of costs
