The Commission de Surveillance du Secteur Financier (CSSF) is responsible for supervising the Manager in relation to this Key Information Document. The Manager is authorised in Luxembourg and regulated by the CSSF **Date of Production:** 04 February 2025.

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### Type

SI GBP is a share class of the Fund which is a sub-fund of the UCITS, an open-ended umbrella investment company comprising a number of different sub-funds. The assets of the Fund are segregated from other sub-funds in the umbrella structure which means that your investment in the Fund will not be affected by any claims made against any other sub-fund of the UCITS. Please contact [info@ericsturdza.com](mailto:info@ericsturdza.com) for additional information regarding alternative share classes and their associated terms. Investors may switch their shares in the Fund for shares in a different currency class or for shares within another sub-fund in the umbrella structure. For further information please refer to the Fund's supplement.

### Term

There is no fixed term for the UCITS.

### Objectives

The Manager has appointed E.I. Sturdza Strategic Management Limited (the "Investment Manager") who manages the Fund with the objective of achieving long term capital growth through a fundamental long short equity strategy investing primarily in a portfolio of global listed equities (with a North American bias) and single-name put options. The Fund will be significantly invested in purchased single-name put options. Gross short exposure, as further detailed in the prospectus will not exceed 70% of NAV (on a Commitment Approach basis), all of which could be via single-name put options, depending on the Investment Advisers determination of opportunities. The typical cash exposure of put options is expected to be 2-7% of the Net Asset Value of the Fund, although this exposure may be higher in unusual periods of extreme market dislocation/volatility.

The Fund's long investments will be primarily listed on a Recognised Stock Exchange and the Fund will target underlying investments that can easily be bought or sold in the market with few liquidity constraints. In implementing the short strategy, the Investment Adviser primarily utilises single-name put options on equities. Options activity is not expected to result in the Fund becoming the owner of a short position in the

underlying stock. The Investment Adviser expects to liquidate any 'in-the-money' purchased put-options prior to expiration. In the extremely rare instance when an 'in-the-money' put option was not liquidated prior to expiration, the Investment Adviser would expect to issue no-exercise instructions. If, on the other hand, put options expire 'out-of-the-money' (i.e. above the strike price), the put options would simply expire worthless. There would be neither a sale nor an exercise of the put options, and the Fund would not become the owner a short position in the underlying stock.

Pursuant to the EU's Sustainable Finance Disclosure Regulation (EU 2019/2088 ('SFDR'), this Fund is classified as an Article 8 fund that promotes environmental or social characteristics. The Fund will have an averaged ESG score higher than the averaged ESG score of its initial investment universe.

The Investment Manager is free to choose how the Fund is invested within the limits of its investment policy.

You can buy and sell your shares in the Fund on a daily basis.

The Shares that you will hold in the Fund are accumulating, meaning that the income from the Fund's investments will be included in the value of your shares rather than being paid as a dividend.

### Intended retail investor

The Fund is deemed to be appropriate for investors who plan to invest for the medium to long term.

The Fund is actively managed, with reference to the Hurdle rate +2% (the "Index") for performance monitoring and calculation of performance fees (where applicable).

The Depositary is CACEIS Bank, Ireland Branch

Further information including the Prospectus, latest annual and half-yearly reports are available on [www.ericsturdza.com](http://www.ericsturdza.com) and are also available from the Administrator or the Global Distributor (see details below) free of charge. The UCITS documentation is available in English. Other practical information, including where to find the latest prices of shares are available on [www.ericsturdza.com](http://www.ericsturdza.com)

## What are the risks and what could I get in return?

### Summary Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

**The risk indicator assumes you keep the product for a minimum of 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.**

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of Opportunity Fund Management to pay you.

The risk indicator is based on historical data and may not be a reliable indicator of the future risk profile of the Fund, is not guaranteed and may change over time. The lowest category does not mean risk free. The risk indicator for the Fund reflects the historic price behaviour of the Fund.

Factors that affect the risk profile of the Fund include:

Investments in equity securities are subject to fluctuations in value dependent on market conditions which will directly affect the value of investments held by the Fund. The Fund invests with a concentrated country focus which will increase the risk of investing over a fund that invests in a globally diversified range of countries on an ongoing basis.

**Additional risks of investing in this Fund include:** Liquidity Risk, Risks of changes in taxation regimes, including legal and regulatory changes, Credit Risk, Currency Risk, Operational Risk and Custody & Settlement Risk.

Further the Fund may utilise financial derivative contracts such as equity index Options and single stock options both to gain and hedge exposure to market risk. Such use may increase or reduce exposure to underlying assets and may create gearing; therefore their use may result in greater fluctuations of the Net Asset Value of the Fund.

Investors are advised the value of any investments, the funds and the income which may be generated from them can go down as well as up and therefore investors must be able to bear the risks of a substantial impairment or loss of their entire investments. There is theoretically unlimited upside associated with an investment in the Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

## Performance Scenarios

The figures shown include all the costs of the product itself, (where applicable) but may not include all the costs that you pay to your advisor or distributor/and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future.

<b>Recommended holding period:</b>		5 years	
<b>Example Investment:</b>		£10,000	
<b>Scenarios</b>		<b>If you exit after 1 year</b>	<b>If you exit after 5 years</b>
<b>Minimum</b>	There is no minimum guaranteed return. You may lose some or all of your investment due to the default of the Fund and/or the UCITS (as defined above).		
<b>Stress</b>	<b>What you might get back after costs</b>	<b>£2,400</b>	<b>£2,560</b>
	Average return each year	-75.97%	-23.84%
<b>Unfavourable</b>	<b>What you might get back after costs</b>	<b>£8,820</b>	<b>£10,570</b>
	Average return each year	-11.77%	1.12%
<b>Moderate</b>	<b>What you might get back after costs</b>	<b>£10,700</b>	<b>£13,820</b>
	Average return each year	7.02%	6.68%
<b>Favourable</b>	<b>What you might get back after costs</b>	<b>£12,950</b>	<b>£16,860</b>
	Average return each year	29.52%	11.01%

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable Scenario:** This type of scenario occurred for an investment between 31 December 2021 and 30 August 2024.

**Moderate Scenario:** This type of scenario occurred for an investment between 31 July 2015 and 31 July 2020.

**Favourable Scenario:** This type of scenario occurred for an investment between 31 October 2016 and 29 October 2021.

## What happens if Opportunity Fund Management is unable to pay out?

The UCITS is not a guaranteed UCITS and as a result there is no guarantee scheme in place which provides a guaranteed rate of return. The Fund does not provide compensation or operate a guarantee against any loss in the value of an investment, the funds or any income generated.

## What are the costs?

Any advisors, distributors or any other person advising on, or selling, the UCITS will provide additional information detailing any cost associated with the distribution of the Fund that are not included in the costs specified above. Such insights will allow you to determine the cumulative effect that the aggregated costs may have on the return on your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

### Costs over Time

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario.
- That your GBP 10,000.00 has been invested.

	<b>If you exit after 1 year</b>	<b>If you exit after 5 years</b>
<b>Total costs</b>	252 GBP	1,528 GBP
<b>Annual cost impact (*)</b>	2.5%	2.5% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at maturity your average return per year is projected to be 9.2 % before costs and 6.7 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. (Where applicable) [They will inform you of the amount].

### Composition of Costs

<b>One-off costs upon entry or exit</b>		<b>If you exit after 1 year</b>
<b>Entry costs</b>	•0.00%, represent that charges that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	0 GBP
<b>Exit costs</b>	•0.00%, represent that charges that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	0 GBP
<b>Ongoing costs taken each year</b>		
<b>Management fees and other administrative or operating costs</b>	•1.1% based on est. costs that will be paid in 1 year, it may vary over time. Perf fees & portfolio transaction costs excluded, Man. fees included.	108 GBP
<b>Transaction costs</b>	•0.6% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	58 GBP
<b>Incidental costs taken under specific conditions</b>		
<b>Performance fees</b>	15.00% of relative outperformance, if any, of the Net Asset Value per Share (before deducting the amount of any accrued liability for a performance fee) over the Hurdle rate +2%. The Performance Fee will crystallise on the redemption of your holdings or upon switching your holdings in a Fund to any other classes of the same Fund or another Fund of the Company.	87 GBP

## How long should I hold it and can I take money out early?

### Recommended Holding Period: 5 Years

The Fund offers daily liquidity to investors, as such subscriptions and redemptions can be processed on a daily basis. There are no lock up periods or penalties associated with redeeming a holding prior to the recommended holding period.

The Fund has been assessed as being suitable for mid to long term investors as a result of the concentrated and directional nature of the investment portfolio. This means that the Fund will hold a different exposure mix compared to the Hurdle rate +2% (the "Benchmark"), wider market and peers, and it is possible that at different parts of the markets cycle that the maintained positioning will benefit or be negatively impacted. As such, investors holding an investment for a short time frame may not benefit from the exposure offered by the Fund.

### How can I complain?

Complainants can request information, complain and/or make comments free of charge by contacting the Manager whose details are listed below. Investors can request a copy of the Manager's complaints handling policy, or access this via their website at [www.opportunityfm.com](http://www.opportunityfm.com).

Any complaints, claim or comments may be provided in writing, in English or in French, together with supporting documents by mail to the attention of the Complaints Handling Officer at:

Opportunity Fund Management, 16, rue Robert Stümper, L-2557 Luxembourg, or by email to: [compliance@opportunityfm.com](mailto:compliance@opportunityfm.com).
