What is this product?

Type

The Sub-Fund is part of LO Funds (the "Fund"), a public liability company (société anonyme) incorporated under the laws of the Grand Duchy of Luxembourg as an investment company with variable share capital. The Fund is subject to part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment in transferable securities ("UCITS").

Term

The Sub-Fund has no maturity date. The PRIIP manufacturer is entitled to terminate the Sub-Fund unilaterally under the circumstances provided for in the constitutive documents of the Fund. A liquidation of the Fund will cause the automatic termination of the Sub-Fund.

Objectives

The Sub-Fund is actively managed. The SPI Extra TR index is used to define the initial investment universe for individual security selection, for performance comparison as well as for internal risk monitoring purposes, without implying any particular constraints to the Sub-Fund's investments. The Sub-Fund's securities will generally be similar to those of the above-mentioned index but the security weightings are expected to differ materially. The Investment Manager may also select securities not included in the above-mentioned index in order to take advantage of investment opportunities. The Sub-Fund aims to generate capital growth over the long term. It invests mainly in Swiss small and mid cap companies. The selection process, which relies heavily on the bottom-up approach, employs rigorous fundamental research and involves close contact with companies. Stock selection is made on the basis of the following criteria: (i) excellent fundamental data, (ii) sustainable growth prospects, (iii) above-average innovative approach, (iv) long-term, foreseeable profits growth and (v) reasonable valuation. The result is a concentrated portfolio of approximately 25 different companies. The use of derivatives is part of the investment strategy.

This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Sustainability

The Fund has been classified as a financial product subject to Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial sector (the "SFDR"). The Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

Benchmark

A proxy benchmark has been identified for performance comparison: SPI Extra TR®.

RISK AND REWARD PROFILE

 **The summary risk indicator assumes you keep the product for 5 years.**

The summary risk indicator is a guide to the level of risk of this product

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

The following risks may be materially relevant but may not always be adequately captured by the summary risk indicator and may cause additional loss: Liquidity risk, Operational risk and risks related to asset safekeeping and Concentration risk.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. Markets could develop very differently in the future. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of a suitable benchmark over the last 10 years. These types of scenario occurred for an investment between 31.12.2013 and 31.12.2023. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Lombard Odier Funds (Europe) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- the product performs as shown in the moderate scenario
- CHF 10 000 is invested

Investment CHF 10 000	If you cash in after 1 year	If you cash in after 5 years (recommended)
Total costs	CHF 203	CHF 1 209
Annual cost impact*	2.03%	2.03%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.84% before costs and 8.81% after costs. Part of the costs can be paid to the distributor who distributes the product for the services they provide. They will inform you of the amount.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.
