What is this product ?

Type

The Sub-Fund is part of the Fund LO Funds, a public liability company (société anonyme) incorporated under the laws of the Grand Duchy of Luxembourg as an investment company with variable share capital. The Fund is subject to part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment in transferable securities ("UCITS").

Term

The Sub-Fund has no maturity date. The PRIIP manufacturer is entitled to terminate the Sub-Fund unilaterally under the circumstances provided for in the constitutive documents of the Fund. A liquidation of the Fund will cause the automatic termination of the Sub-Fund.

Objectives

The Sub-Fund is actively managed. The MSCI World SMID Cap TR ND index is used for performance comparison as well as internal risk monitoring purposes, without implying any particular constraints to the Sub-Fund's investments. Securities targeted by the Sub-Fund can be similar to those of the index to an extent that varies overtime but their weighting is expected to materially differ. The performance of the Sub-Fund may deviate materially from that of the index. The Sub-Fund invests in equity and equity related securities issued by companies worldwide (including Emerging Markets) whose growth will benefit from regulations, innovations, services or products favoring the transition to a more circular economy and to an economy that values natural capital. The Sub-Fund seeks to invest in high quality companies with sustainable financial models, business practices and business models showing resilience and the ability to evolve and benefit from long term structural trends using LOIM proprietary ESG and Sustainability Profiling tools and methodologies. As part of its Emerging Market exposure, the Sub-Fund may invest up to 20% of its net assets in shares issued by mainland China-incorporated companies (including China A-Shares). The Investment Manager is authorized to use financial derivative instruments for hedging purposes or for EPM but not as part of the investment strategy.

The Sub-Fund invests mainly in equity and equity-related securities issued by companies worldwide (including Emerging Markets).

This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Sustainability

The Fund has been classified as a financial product subject to Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial sector (the "SFDR"). The Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

Benchmark

A proxy benchmark has been identified for performance comparison: MSCI World SMID Cap USD ND (GBP Cross Hdg.).

Intended retail investor

The Sub-Fund is intended for eligible investors who have sufficient experience or have obtained professional advice to assess the risk of investing, have a long-term investment horizon and have sufficient resources to be able to bear any losses (which may equal to the total amount invested) that may result from an investment in the Sub-Fund.

What are the risks and what could I get in return ?

RISK AND REWARD PROFILE

⚠ The risk indicator assumes you keep the product for 5 years. Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact our capacity to pay you.

The following risks may be materially relevant but may not always be adequately captured by the synthetic risk indicator and may cause additional loss: Concentration risk, Emerging market risk and Active management risk.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. Markets could develop very differently in the future. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 10 years. These types of scenario occurred for an investment between 31.10.2012 and 31.10.2022. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 5 years

Example Investment GBP 10 000

Scenarios		If you cash in after 1 year	If you cash in after 5 years (recommended)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

What happens if Lombard Odier Funds (Europe) S.A. is unable to pay out?

You may face a financial loss should the manufacturer or depositary, default on their obligations.

There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs ?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- the product performs as shown in the moderate scenario
- GBP 10 000 is invested

Example Investment GBP 10 000	If you cash in after 1 year	If you cash in after 5 years (recommended)
Total costs	GBP 234	GBP 1 481
Annual cost impact*	2.34%	1.94%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.19% before costs and 10.26% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.
