What is this product?

Type

The Sub-Fund is part of LO Funds (the "Fund"), a public liability company (société anonyme) incorporated under the laws of the Grand Duchy of Luxembourg as an investment company with variable share capital. The Fund is subject to part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment in transferable securities ("UCITS").

Term

The Sub-Fund has no maturity date. The PRIIP manufacturer is entitled to terminate the Sub-Fund unilaterally under the circumstances provided for in the constitutive documents of the Fund. A liquidation of the Fund will cause the automatic termination of the Sub-Fund.

Objectives

LO Funds - DataEdge Market Neutral is a diversified equity long/short, sector market neutral strategy leveraging on trading signal generation based on the latest breakthroughs in big data and predictive analytics to identify key business trend inflections.

The Investment Manager will implement its strategy by getting exposure to companies that it believes to be undervalued and by getting short exposure to companies that it believes to be overvalued. However, the aim of the Investment Manager is to remain market neutral by targeting, under feasibility constraints, a net zero dollar exposure at the global portfolio level, and sector level.

The strategy relies on the use, acquisition, and analysis of alternative data points across multiple geographies, sectors, and sources, such as but not limited to credit card transactions, digital receipts, web traffic, application activity or geolocation. These data have for objective to provide an information edge on companies, including but not limited to sales, revenues, new customers and engagement patterns that are key performance indicators (KPI) of a company influencing its share price.

From a geographic perspective, the investment universe is predominantly focused on the United States. With the amount of alternative data available projected to grow further over the future, the coverage universe, either in terms of number of stocks, regions or sectors, is expected to expand accordingly.

Risk management is performed at the portfolio level, while an independent team oversees investment and operational risks.

This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Sustainability

This product is not a financial product subject to Article 8 or Article 9 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial sector (the "SFDR"). The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Intended retail investor

The Sub-Fund is intended for eligible investors who have sufficient experience or have obtained professional advice to assess the risk of investing, have a long-term investment horizon and have sufficient resources to be able to bear any losses (which may equal to the total amount invested) that may result from an investment in the Sub-Fund.

RISK AND REWARD PROFILE

 **The summary risk indicator assumes you keep the product for 5 years.**

The summary risk indicator is a guide to the level of risk of this product

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

The following risks may be materially relevant but may not always be adequately captured by the summary risk indicator and may cause additional loss: Risks linked to the use of derivatives and financial techniques, Concentration risk and Model risk.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. Markets could develop very differently in the future. The scenarios shown are illustrations based on results from the past and on certain assumptions. The favourable, moderate and unfavourable scenario are respectively the value of the PRIIP at the 90th, 50th and 10th percentile of an estimated distribution of outcomes over the recommended holding period less all applicable costs. The stress scenario shows what you might get back in extreme market circumstances. It sets out significant unfavourable impacts of the PRIIP not covered in the unfavourable scenario specified above.

Recommended holding period: 5 years

Example investment USD 1'000'000

Scenarios		If you cash in after 1 year	If you cash in after 5 years (recommended)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs	USD 883'950	USD 539'690
	Average return each year	-11.60%	-11.60%

	Average return each year	-3.26%	-3.26%
Moderate scenario	What you might get back after costs	USD 1'070'000	USD 1'402'550
	Average return each year	7.00%	7.00%
Favourable scenario	What you might get back after costs	USD 1'172'560	USD 2'216'580
	Average return each year	17.26%	17.26%

What happens if Lombard Odier Funds (Europe) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the depositary default on its obligations. Such default risk is limited as the depositary is required by law and regulation to segregate its own assets from the assets of the Fund. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- the product performs as shown in the moderate scenario
- USD 1'000'000 is invested

Investment USD 1'000'000	If you cash in after 1 year	If you cash in after 5 years (recommended)
Total costs	USD 24'453	USD 140'623
Annual cost impact*	2.45%	2.45%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.45% before costs and 7.00% after costs. Part of the costs can be paid to the distributor who distributes the product for the services they provide. They will inform you of the amount.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.
