What is this product?

Type

The Sub-Fund is part of LO Funds (the "Fund"), a public liability company (société anonyme) incorporated under the laws of the Grand Duchy of Luxembourg as an investment company with variable share capital. The Fund is subject to part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment in transferable securities ("UCITS").

Term

The Sub-Fund has no maturity date. The PRIIP manufacturer is entitled to terminate the Sub-Fund unilaterally under the circumstances provided for in the constitutive documents of the Fund. A liquidation of the Fund will cause the automatic termination of the Sub-Fund.

Objectives

The Sub-Fund is actively managed. The FTSE Russell Convertible Asia Ex-Japan TR index is used for performance comparison as well as internal risk monitoring purposes, without implying any particular constraints to the Sub-Fund's investments. Securities targeted by the Sub-Fund can be similar to those of the index to an extent that varies overtime but their weighting is expected to materially differ. The performance of the Sub-Fund may deviate materially from that of the index. The Sub-Fund aims to generate capital growth over the long term. It mainly invests in bonds that may be converted into equities of Asian companies, denominated in various currencies, as well as synthetic convertible bonds (segregated purchase of bonds and options). The Sub-Fund focuses on the asymmetrical profile of the asset class, i.e. profiting from equity market upturns while benefiting from the downside protection of a fixed-income structure. The core investments consist mainly of balanced convertible bonds from Asian issuers, which offer an attractive combination of equity sensitivity and consistent protection in case of a downturn. In making its selection, the Investment Manager attaches as much importance to technical criteria, as to the choice of the underlying equity. The use of derivatives is part of the investment strategy.

This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Sustainability

The Fund has been classified as a financial product subject to Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial sector (the "SFDR"). The Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

Benchmark

A proxy benchmark has been identified for performance comparison: FTSE Russell Convertible Asia Ex-Japan CHF Hedged.

Intended retail investor

The Sub-Fund is intended for eligible investors who have sufficient experience or have obtained professional advice to assess the risk of investing, have a long-term investment horizon and have sufficient resources to be able to bear any losses (which may equal to the total amount invested) that may result from an investment in the Sub-Fund.

The depositary is CACEIS Bank, Luxembourg Branch.

What are the risks and what could I get in return?

RISK AND REWARD PROFILE

⚠ The summary risk indicator assumes you keep the product for 5 years. Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

The following risks may be materially relevant but may not always be adequately captured by the summary risk indicator and may cause additional loss: Credit risk, Liquidity risk and Operational risk and risks related to asset safekeeping.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. Markets could develop very differently in the future. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. These types of scenario occurred for an investment between 31.12.2014 and 31.12.2024. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 5 years

What happens if Lombard Odier Funds (Europe) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the depositary default on its obligations. Such default risk is limited as the depositary is required by law and regulation to segregate its own assets from the assets of the Fund. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- the product performs as shown in the moderate scenario
- CHF 10'000 is invested

Investment CHF 10'000	If you cash in after 1 year	If you cash in after 5 years (recommended)
Total costs	CHF 223	CHF 1'105
Annual cost impact*	2.23%	2.23%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.86% before costs and -0.36% after costs. Part of the costs can be paid to the distributor who distributes the product for the services they provide. They will inform you of the amount.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.
