What is this product?

Type

This product LO Funds (CH) is a Swiss umbrella fund in contractual form of the category "Other funds for traditional investments".

Term

The sub-fund has no maturity date. The manufacturer is entitled to terminate the sub-fund unilaterally under the circumstances provided for in the constitutive documents of the Fund. A liquidation of the Fund will cause the automatic termination of the sub-fund.

Objectives

The sub-fund's aim is to achieve long-term capital growth by investing at least two thirds of its assets in equities and other equity-type securities issued by companies domiciled in Switzerland that are leaders in their respective markets: the term ''leader'' refers to the companies' superiority in terms of strategy, innovative capacity, management, financial stability, and competitive positioning within the sector. The sub-fund also invests in companies domiciled outside Switzerland, but only if at least half of their products or services are originally from Switzerland. The portfolio focuses on the 25 most attractive securities that meet the fund manager's quality requirements. High-quality companies with visible, above-average growth prospects are favoured. The selection process, which is essentially based on a bottom-up approach, involves a rigorous, fundamental analysis and close contact with the companies.

Derivative instruments may be used not only for hedging purposes but also as part of the investment strategy.

The sub-fund is a product that favours environmental or social characteristics or a combination of these. The fund manager follows a combination of sustainable investment approaches in order to analyse the sustainability profile of the sub-fund (including exclusions, restrictions, sustainability-oriented pre-screenings and ratings of companies, and qualitative and quantitative analyses).

This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

What are the risks and what could I get in return?

RISK AND REWARD PROFILE 1 2 3 4 5 6

Lower risk Higher risk

The summary risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

7

The following risks may be materially relevant but may not always be adequately captured by the summary risk indicator and may cause additional loss: Operational risk and risks related to asset safekeeping, Concentration risk and Financial, economic, regulatory and political risks.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. Markets could develop very differently in the future. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. These types of scenario occurred for an investment between 31.12.2013 and 31.12.2023. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Lombard Odier Asset Management (Switzerland) SA is unable to pay out?

The Fund's ability to pay out would not be affected by the insolvency of the fund management company. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- the product performs as shown in the moderate scenario
- CHF 10 000 is invested

Investment CHF 10 000	If you cash in after 1 year	If you cash in after 5 years (recommended)
Total costs	CHF 186	CHF 1 060
Annual cost impact*	1.86%	1.86%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.49% before costs and 6.64% after costs. Part of the costs can be paid to the distributor who distributes the product for the services they provide. They will inform you of the amount.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.
