What is this product?

Type

The Sub-Fund is part of LO Selection (the "Fund"), a public liability company (société anonyme) incorporated under the laws of the Grand Duchy of Luxembourg as an investment company with variable share capital. The Fund is subject to part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment in transferable securities ("UCITS").

Term

The Sub-Fund has no maturity date. The PRIIP manufacturer is entitled to terminate the Sub-Fund unilaterally under the circumstances provided for in the constitutive documents of the Fund. A liquidation of the Fund will cause the automatic termination of the Sub-Fund.

Objectives

The Sub-Fund is actively managed in reference to a benchmark. The SBI Foreign A.BBB® (the "Benchmark") is used for performance comparison and internal risk monitoring purposes only. Bond issuers represented in the portfolio of the Sub-Fund will generally be similar to those of the Benchmark, however the Investment Manager has discretion to select issuers that are not part of the Benchmark universe. The Sub-Fund's holdings are therefore expected to deviate to a limited extent from the Benchmark. Securities in the Benchmark might be excluded from the Sub-Fund's portfolio depending on their involvement in specific activities listed in the SFDR Annex. Each remaining security is weighted according to the market capitalization of its issuer, its LOPTA (Lombard Odier Portfolio Temperature Alignment) and its carbon footprint, in order to increase significantly the exposure of the Sub-Fund's portfolio to issuers which can contribute to a reduction in global CO2 emissions and the eventual achievement of net zero CO2 emissions by 2050. The Sub-Fund's portfolio will aim for a faster rate of reduction in CO2 emissions when compared to the Benchmark. The Sub-Fund's portfolio aims for a significantly reduced carbon footprint when compared to the Benchmark. Ultimately the credit quality and valuation of each holding is controlled to ensure a portfolio with satisfying credit quality and attractive financial profile. While the Investment Manager intends to maintain a low tracking error through controlled style, sector and country biases, the level of active risk associated with the realization of the investment objectives is likely to vary over time and is dependent on regulatory, technological and commercial developments external to the Investment Manager, that could significantly impact the temperature alignment or carbon footprint of securities in the Sub-Fund's portfolio. The Sub-Fund mainly invests worldwide in CHF denominated bonds of corporate issuers. The use of financial derivative instruments is part of the investment strategy. This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Sustainability

The Fund has been classified as a financial product subject to Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial sector (the "SFDR"). The Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

Benchmark

A proxy benchmark has been identified for performance comparison: SBI Foreign A-BBB®.

What are the risks and what could I get in return?

RISK AND REWARD PROFILE

⚠ The summary risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product

compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

The following risks may be materially relevant but may not always be adequately captured by the summary risk indicator and may cause additional loss: Credit risk, Liquidity risk and Operational risk and risks related to asset safekeeping.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. Markets could develop very differently in the future. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. These types of scenario occurred for an investment between 31.12.2013 and 31.12.2023. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 3 years
Example investment CHF 1 000 000

What happens if Lombard Odier Funds (Europe) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- the product performs as shown in the moderate scenario
- CHF 1 000 000 is invested

Investment CHF 1 000 000	If you cash in after 1 year	If you cash in after 3 years (recommended)
Total costs	CHF 7 048	CHF 21 319
Annual cost impact*	0.70%	0.70%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.53% before costs and 0.82% after costs. Part of the costs can be paid to the distributor who distributes the product for the services they provide. They will inform you of the amount.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.
