What is this product?

Type

This product LO IS (CH) is a Swiss umbrella fund in contractual form of the category "Other funds for traditional investments".

Term

The sub-fund has no maturity date. The fund management company is entitled to terminate the sub-fund unilaterally under the circumstances provided for in the constitutive documents of the Fund. A liquidation of the Fund will cause the automatic termination of the sub-fund.

Objectives

LO Institutional Strategies (CH) - Swiss Real Estate Securities invests primarily via publicly traded real estate mutual funds and, to a lesser degree, in listed real estate companies. The investment objective is to achieve long-term capital growth and to beat the SXI Real Estate® Funds Broad TR benchmark index (registered trademark of SIX Swiss Exchange AG) over a three-year period. The selection process is based on both qualitative and quantitative criteria. The qualitative component consists primarily of evaluating the managers in terms of their real estate and financial acumen, plus analyzing the geographical and sector positioning of the real estate portfolio. The quantitative component involves evaluating factors such as the quality of real estate returns, the performance and dividend track record, liquidity, and the difference between the stock market price and the NAV. The sub-fund is exposed primarily to the risk of geographical concentration in the main Swiss economic regions and to sector risks through its heavy focus on residential and commercial real estate.

This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Benchmark

A proxy benchmark has been identified for performance comparison: SXI Real Estate® Funds Broad TR.

Intended retail investor

The sub-fund is intended to eligible investors who have sufficient experience or have obtained professional advice to assess the risk of investing, have a long-term investment horizon and have sufficient resources to be able to bear any losses (which may equal to the total amount invested) that may result from an investment in the sub-fund.

Additional information

You can find information about the Fund and its sub-funds online at www.loim.com. This includes information on how to buy or sell shares or switch between the Fund's various sub-funds. The fund contract and annual reports for the Fund can be obtained free of charge from the website www.loim.com and from the fund management company's registered office, at 6, avenue des Morgines, 1213 Petit-Lancy, Switzerland.

The net asset value per share is calculated weekly and is available at www.loim.com and at the registered office of the fund management company at 6, avenue des Morgines, 1213 Petit-Lancy, Switzerland.

The value of the underlying shares in the sub-fund is determined by the value of the securities in which the sub-fund is directly invested.

Distribution policy: distribution (September).

Dealing frequency: you may redeem shares in this sub-fund on demand on a weekly basis.

The depositary is CACEIS Bank, Montrouge, succursale de Nyon / Suisse.

What are the risks and what could I get in return?

RISK AND REWARD PROFILE

 The summary risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. Markets could develop very differently in the future. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. These types of scenario occurred for an investment between 30.11.2014 and 30.11.2024. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 5 years

Example investment CHF 10'000

Scenarios		If you cash in after 1 year	If you cash in after 5 years (recommended)

What happens if Lombard Odier Asset Management (Switzerland) SA is unable to pay out?

The Fund's ability to pay out would not be affected by the insolvency of the fund management company. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- the product performs as shown in the moderate scenario
- CHF 10'000 is invested

Investment CHF 10'000	If you cash in after 1 year	If you cash in after 5 years (recommended)
Total costs	CHF 112	CHF 619
Annual cost impact*	1.12%	1.12%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.98% before costs and 4.86% after costs. Part of the costs can be paid to the distributor who distributes the product for the services they provide. They will inform you of the amount.

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.
