What is this product?

Type

This Fund is an open-ended investment company with variable capital which was incorporated in Ireland on 6 November 1996 under registration number 256241 and is authorised by the Central Bank as a UCITS.

Term

The Company is an open-ended public limited company incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.

This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

Objectives

Investment objective The objective of the Fund is to maintain a high level of liquidity, preserve capital and provide a return in line with Euro money market rates.

Investment policies In order to achieve its investment objective, the Fund invests in a range of investment grade fixed and adjustable rate money market instruments which are transferable securities and primarily denominated in Euro. These instruments pay a rate of interest to the Fund. This rate of interest is the Fund's only source of return.

The Fund promotes environmental or social characteristics in accordance with SFDR Article 8. These environmental and social characteristics are detailed in the SFDR Annex of the Fund's Supplement, and include investment in issuers deemed to perform better in relation to financially material ESG challenges, avoidance of issuers deemed non-compliant with the Investment Manager's ESG criteria such as violations of UN Global Compact Principles or involvement in controversial weapons and exclusion of issuers involved in thermal coal, arctic drilling, oil and tar sands, tobacco, civilian firearms as well as severe ESG controversies.

When selecting investments, the Investment Manager and/or Sub-Investment Manager, will adopt a best in class approach to ESG considerations by seeking to invest the majority of the Fund's portfolio in securities that are classified as sustainable investments under article 2(17) of SFDR using the Investment Manager's proprietary assessment methodology and, for government and supra-national issuers, classified within the two highest categories of a third party ESG rating.

The specific list of applicable exclusions may evolve and may be amended from time to time at the Investment Manager's and/or Sub-Investment Manager's absolute discretion. Such change may be implemented without notice to the Shareholders if deemed aligned with the screen criteria referred to above.

The Fund invests in debt securities which are issued by governments, banks, corporations and other financial institutions. The Fund can only invest in securities which have the highest short-term credit ratings.

The investment manager conducts in-depth analysis on each investment which the Fund makes and chooses investments it believes can provide liquidity and a stable return until maturity.

The Fund is actively managed. The benchmark is used for performance comparison purposes only. The benchmark does not influence the fund's portfolio.

The Fund is classified as a Low-Volatility NAV Money Market Fund.

The Fund itself is also rated by one or more credit rating agencies (that is, companies that rate the ability of the issuers of debt securities to repay borrowed money). To maintain these highest credit ratings, the Fund's investments are tightly controlled and closely monitored by each agency. The rating is solicited and financed by the Fund.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Shareholders may redeem shares on any business day other than days on which the trans-European automated real-time gross settlement express transfer ("TARGET"), the Eurosystem interbank funds transfer system, is closed for business; and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Fund's shares are issued in Euro.

Intended retail investor

This product is intended for investors who plan to stay invested for up to 1 year or less and are prepared to take on a low-medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risks

The risk category above shows how likely the fund is to lose money because of movements in the markets or because we are not able to pay you. The Fund's risk category is not guaranteed and may change in the future.

Performance scenarios

The figures shown include all the costs of the Fund other than the costs that you may need to pay to your advisor, distributor or other intermediary. The figures do not take into account your personal tax situation, which may also affect your return.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between August 2017 and August 2018.

Moderate: this type of scenario occurred for an investment between January 2020 and January 2021.

Favourable: this type of scenario occurred for an investment between February 2023 and February 2024.

What happens if the Fund Manager is unable to pay out?

The Manager is responsible for administration and management of the Company, and does not typically hold assets of the Company (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Fund. The amounts shown here are illustrations based on a specific investment amount, taking into consideration different holding periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year (recommended holding period)
Total Costs	16 EUR
Annual cost impact*	0.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.4% before costs and -0.6% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	0.00% The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less. The impact of costs are already included in the price. This includes the costs of distribution of your product.	0 EUR
Exit costs	0.00% The Impact of the costs of exiting your investment when it matures.	0 EUR
Ongoing costs taken each year		Annual cost impact if you exit after 1 year
Management fees and other administrative or operating costs	0.15% The impact of the costs that we take each year for managing your investments. This will include the costs of borrowing money to invest but not any income or capital benefits of doing so, the ongoing costs of running the company, but not the income derived from it, and the ongoing costs of any underlying investments in funds within the Company's portfolio.	15 EUR
Transaction costs	0.01% The impact of the costs of us buying and selling underlying investments for the product.	1 EUR
Incidental costs taken under specific conditions		Annual cost impact if you exit after 1 year
Performance fees	The impact of performance fees. There is no performance fee for this Fund.	0 EUR

How long should I hold it and can I take money out early?
