What is this product?

Type

The Fund was incorporated as a société anonyme, an open-ended fund formed under the amended law of 17 December 2010 on undertakings for collective investment. It is an umbrella fund with multiple compartments, the Sub-Fund being one of these compartments. The Shares are a class of shares in the Sub-Fund.

Objective

This actively managed Sub-Fund aims to achieve the highest possible capital growth in EUR. It promotes environmental and social characteristics within the meaning of Article 8 SFDR and invests in issuers that the Investment Manager considers well-prepared to handle financially material environmental and social challenges. The Sub-Fund focuses on the theme of the ongoing energy transition from carbon to renewable energy with its sub-themes "Transition Materials", "Renewable Energy" and "Low Carbon Energy". Issuers will be selected based on the Investment Manager's ESG framework. More details can be found in the prospectus.

The Sub-Fund mainly invests in equities and equity-like securities (including transferable securities that are qualified as closed-ended real estate investment trusts, participation certificates) issued by companies worldwide (including emerging markets). It may invest up to 20% via Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect in China A-Shares.

Type of approach: The Sub-Fund invests in the theme of the ongoing transition from carbon to renewable energy, mainly via equities of companies - along the entire supply chain, from basic resources to technology enablers. The sub-fund promotes environmental and social characteristics by following exclusions and ESG integration approaches. In addition, companies must have a minimum ESG rating (i.e. excluding the worst ESG laggards) based on the scoring model of a renowned third party data provider. This ESG rating evaluates companies on specific environmental, social and governance criteria. By focusing on the theme of the ongoing transition from carbon to renewable energy and applying the ESG criteria as described above, the sub-fund excludes at least 20% of the initial investment universe, namely the equity market worldwide. **Threshold:** At least 90% of the securities in the sub-fund are covered by the ESG analysis. The Sub-Fund applies a comprehensive voting and engagement strategy via a third-party provider that enables it to use its role as shareholders (and prospective shareholders) to support companies in becoming more sustainable. **Main methodological limits:** potential inconsistency, inaccuracy or lack of availability of ESG data issued by external third party providers.

The Sub-Fund may also hold up to 20% of its net assets in bank deposits at sight.

The Sub-Fund may use derivatives to achieve the investment objective and for hedging purposes.

The currency of this class is continually hedged against the Sub-Fund's main currency. This hedging does not necessarily cover all currency risks. It entails costs which in turn reduce the share class' return.

Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).

Any income generated will be reinvested and included in the value of your Shares.

The Sub-Fund is not managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.

Taking into consideration the minimum recommended holding period, the return will depend on the performance of the underlying investments.

The Fund's depository is CACEIS Bank, Luxembourg Branch.

This Sub-Fund is part of an umbrella fund. The various sub-funds are not liable for one another, i.e. only the gains and losses of this Sub-Fund are relevant for you as an investor. You can request the conversion of some or all of your Shares in the Sub-Fund in accordance with the "Conversion of Shares" section, unless stipulated otherwise in the special part of the sales prospectus.

The sales prospectus, including pre-contractual SFDR disclosures, up-to-date semi-annual and annual reports, share prices and other practical information are available free of charge at www.vontobel.com/AM in English and German.

Intended Retail Investor

The Sub-Fund is intended for retail investors with knowledge and/or experience of these types of products, that have obtained appropriate investment advice, that have long-term investment horizon and that have the ability to bear losses up to the amount they have invested in the Sub-Fund.

Term

The Shares do not have a maturity date. The Product Manufacturer can terminate the Shares unilaterally. The Shares, the Sub-Fund and the Fund can be terminated early and liquidated in the cases set out in the prospectus and the articles of incorporation of the Fund.

What are the risks and what could I get in return?

The summary risk indicator (the “SRI”) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the SRI.

Other risks not captured in the SRI: liquidity, operational, legal or sustainability risks. Further details in the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The Product offers no capital guarantee against credit risk.

◀ Lower risk

Higher risk ▶

The risk indicator assumes you keep the product for 6 years.

We have classified this product as 5 out of 7, which is a medium-high risk class.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavorable, moderate, and favorable scenarios shown are illustrations using the worst, average, and best performance of the product, a suitable benchmark and/or a proxy over the last 11 years.

Recommended holding period:		6 years	
Example Investment:		CHF 10,000	
		If you exit after 1 year	If you exit after 6 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	CHF 6,080	CHF 2,240
	Average return each year	-39.24%	-22.07%
Unfavourable	What you might get back after costs	CHF 8,230	CHF 4,090
	Average return each year	-17.66%	-13.84%
Moderate	What you might get back after costs	CHF 9,520	CHF 9,750
	Average return each year	-4.83%	-0.42%
Favourable	What you might get back after costs	CHF 10,100	CHF 13,890
	Average return each year	0.95%	5.63%

The stress scenario shows what you might get back in extreme market circumstances.

This type of scenario occurred for an investment between: (Favourable: January 2016 - January 2022, Moderate: April 2018 - April 2024, Unfavourable: August 2022 - June 2024).

What happens if Vontobel Asset Management S.A. is unable to pay out?

The investor may not face a financial loss due to the default of the Product Manufacturer.

The assets of the Fund are held in safekeeping by its depositary, CACEIS Bank, Luxembourg Branch (the “Depositary”). In the event of the insolvency of the Product Manufacturer, the Fund’s assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary’s insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. This risk is mitigated to a certain extent by the fact that the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfill its obligations (subject to certain limitations as set out in the agreement with the Depositary).

Losses are not covered by an investor compensation or guaranteed scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- CHF 10 000 is invested.

	If you exit after 1 year	If you exit after 6 years
Total costs	CHF 739	CHF 1,808
Annual cost impact (*)	7.5%	3.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.70% before costs and -0.42% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.00% of the amount you pay in when entering this investment. This is the maximum that might be taken out of your money before it is invested.	Up to CHF 500
Exit costs	0.30% of your investment before it is paid out to you. This is the maximum that might be taken out of your money before it is paid out.	CHF 29
Ongoing costs taken each year		
Management fees and other administrative or operating costs	2.14% of the value of your investment per year. This is an estimate based on actual costs over the last year.	CHF 203
Transaction costs	0.08% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	CHF 7
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	CHF 0

Conversion costs: instead of exit + entry costs, you may be charged 1.00% in case you switch your investment to another Product in the Fund.

How long should I hold it and can I take money out early?

Recommended holding period: 6 years

Based on the investment policy and the risk profile of the Sub-Fund, a holding period of 6 years is recommended. Investors can sell the investment at any time, irrespective of the recommended holding period, without additional cost. Shares can be sold daily (on business days). Exit costs are presented above.
