This Key Information Document is accurate as at 06 February 2024.

What is this product?

Type

The fund is a contractual umbrella fund under Swiss law of the type "Other funds for traditional investments" pursuant to the Swiss Federal Act on Collective Investment Schemes (CISA) of June 23, 2006 with several subfunds.

Objective

The subfund's investment policy is to achieve positive returns over the medium to long term through capital growth and interest income. The subfund adheres to the investment restrictions for pension funds in accordance with the Ordinance on Occupational Retirement, Survivors' and Disability Pension Plans (BVV2).

The subfund invests a maximum of 50% in equities and equity-like securities as well as a maximum of 50% in interest-bearing securities. Investments can be made by means of collective investment schemes (target funds). The selection of investments also takes into account environmental, social and governance (ESG) factors.

The subfund invests worldwide in securities of public and/or private-sector borrowers and in equity securities of companies. In addition to this, it also invests indirectly in alternative investments (in particular real estate, commodities and precious metals).

Derivatives can be used for hedging purposes and for efficient portfolio management. This does not produce a leverage effect.

Shares in the subfund can be redeemed on any working day, with the exception of public holidays in Switzerland or when a significant part of the stock exchanges and markets of the subfund is closed.

Income is not paid out but is retained to be reinvested.

BV shares are exclusively reserved for certain institutional investors within the meaning of the sales prospectus.

Taking into consideration the minimum recommended holding period, the return will depend on the performance of the underlying investments.

The custodian bank of the fund is CACEIS Investor Services Bank S.A., Esch-sur-Alzette, Zurich branch.

The sales prospectus with integrated fund contract, current half-yearly and annual reports, share prices, available share classes as well as other practical information are available in English and German online free of charge at www.zugerkb.ch.

Intended Retail Investor

The sub-fund is intended for retail investors with knowledge and/or experience of these types of products, that have obtained appropriate investment advice, that have medium to long-term investment horizon and that have the ability to bear losses up to the amount they have invested in the sub-fund.

Term

This product has no expiration date. The subfund was established for an indefinite period of time. The fund management company is unilaterally entitled to liquidate the product at any time. The amount received by the investor in the event of early termination may be less than the amount invested.

What are the risks and what could I get in return?

The summary risk indicator (the "SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the SRI.

Other risks not captured in the SRI: liquidity, operational, legal or sustainability risks. Further details in the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The Product offers no capital guarantee against credit risk.

◀ Lower risk

Higher risk ▶

The risk indicator assumes you keep the product for 5 years. We have classified this product as 3 out of 7, which is a medium-low risk class.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavorable, moderate, and favorable scenarios shown are illustrations using the worst, average, and best performance of the product, a suitable benchmark and/or a proxy over the last 10 years.

Recommended holding period:	5 years		
Example Investment:	CHF 10,000		
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	CHF 8,160	CHF 6,890
	Average return each year	-18.37%	-7.19%
Unfavourable	What you might get back after costs	CHF 8,990	CHF 6,890
	Average return each year	-10.14%	-7.19%
Moderate	What you might get back after costs	CHF 9,910	CHF 11,220
	Average return each year	-0.92%	2.34%
Favourable	What you might get back after costs	CHF 10,280	CHF 13,460
	Average return each year	2.75%	6.13%

The stress scenario shows what you might get back in extreme market circumstances.

This type of scenario occurred for an investment between: (Favourable: February 2016 - February 2021, Moderate: September 2014 - September 2019, Unfavourable: January 2022 - January 2024).

What happens if Vontobel Fonds Services AG is unable to pay out?

The investor may not face a financial loss due to the default of the Product Manufacturer.

The assets of the Fund are held in safekeeping by its Custodian Bank, CACEIS Investor Services Bank S.A. (the "Custodian"). In the event of the insolvency of the Product Manufacturer, the Fund's assets in the safekeeping of the Custodian will not be affected. However, in the event of the Custodian's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. This risk is mitigated to a certain extent by the fact that the Custodian is required by law and regulation to segregate its own assets from the assets of the Fund. The Custodian will also be liable to the Fund for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfill its obligations (subject to certain limitations as set out in the agreement with the Custodian).

Losses are not covered by an investor compensation or guaranteed scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	CHF 520	CHF 1,055
Annual cost impact (*)	5.3%	2.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.31% before costs and 2.34% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	2.00% of the amount you pay in when entering this investment. This is the maximum that might be taken out of your money before it is invested.	Up to CHF 200
Exit costs	2.00% of your investment before it is paid out to you. This is the maximum that might be taken out of your money before it is paid out.	CHF 202
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.07% of the value of your investment per year. This is an estimate based on actual costs over the last year.	CHF 105
Transaction costs	0.07% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	CHF 7
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	CHF 0

Conversion costs: instead of exit + entry costs, you may be charged 2.00% in case you switch your investment to another Subfund in the Fund.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

Due to the investment policy and the risk profile of the subfund, a holding period of 5 years is recommended. Investors can sell the investment at any time at no additional cost regardless of the recommended holding period. Units may be sold on a daily basis (on bank working days). The exit costs are shown above.

How can I complain?

If you have a complaint about the product, the manufacturer of the product or the person who recommended or sold the product to you, please contact your client advisor or contact us at www.vontobel.com/en-ch/about-vontobel/contact/complaint-form/.

Other relevant information
