Objectives

Investment Objective

The investment objective of JSS Sustainable Multi Asset – Global Opportunities (the "Sub-Fund") will be to achieve long-term capital growth by investing in various asset classes with a flexible asset allocation applying a total return approach.

Investment Policy

The assets of the Sub-Fund are invested worldwide mainly in equities (at least 25% of the Sub-Fund's asset are invested directly in equity), fixed income securities and money market instruments. When choosing investments, various factors are considered, including opportunities for equity or debt investments to increase in value, expected dividends and interest rates. The Sub-Fund generally seeks diversification across markets, industries and issuers as one of its strategies to reduce volatility. The Sub-Fund has the flexibility to look for investments in markets around the world, including emerging markets that will provide the best asset allocation to meet the Sub-Fund's objective. At any given time the Sub-Fund may emphasize either fixed income and money market instruments or equity securities. The Sub-Fund employs a flexible asset allocation approach whereby up to 90% of the Sub-Funds' assets may be invested in either of the asset classes (equities, fixed income securities and money market instruments) at a given time. Direct investments in

equity securities are at least 25% of the Sub-Fund's asset, but exposure towards equity securities can be reduced to minimal 10% of the Sub-Fund's asset using the investment techniques and instruments described in the prospectus.

The Sub-Fund promotes environmental and social characteristics according to SFDR Art. 8 but does not have a sustainable investment objective according to SFDR Art. 9. This product considers environmental, social and governance aspects ("ESG") along the investment process with the aim to reduce controversial exposures, to align the portfolio with international norms, to mitigate sustainability risks and to harness opportunities emanating from ESG trends and to get a better-informed perspective of portfolio holdings.

The Sub-Fund is actively managed without replicating any benchmark. The Sub-Fund is managed without reference to any benchmark.

Share Class Policy:

This share class of the Sub-Fund continually reinvests income.

Processing of subscription and redemption orders

You may redeem or convert shares in the Sub-Fund on any business day.

Intended retail investor

The Sub-Fund is suitable for investors with a medium-term investment horizon who are primarily looking for regular income. Investors can accept temporary fluctuations in the net asset value of The Sub-Fund units and are not dependent on realizing the investment on a specific date.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The product may be exposed to further risks such as operational, counterparty, political and legal risks. For further details please consult the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

J. Safra Sarasin

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		10,000 EUR	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	4,340 EUR	4,490 EUR
	Average return each year	-56.60%	-14.80%
Unfavourable	What you might get back after costs	8,820 EUR	9,070 EUR
	Average return each year	-11.80%	-1.93%
Moderate	What you might get back after costs	10,220 EUR	11,520 EUR
	Average return each year	2.20%	2.87%
Favourable	What you might get back after costs	13,170 EUR	13,340 EUR
	Average return each year	31.70%	5.93%

The stress scenario shows what you might get back in extreme market circumstances.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000.00

	If you exit after 1 year	If you exit after 5 years
Total costs	150 EUR	862 EUR
Annual cost impact (*)	1.5%	1.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.4 % before costs and 2.9 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
