## What is this product?

### Type

SICAV

### Term

The Fund is established for an indefinite period (open-ended fund) and can be terminated at any time as further stipulated in the articles of association of the SICAV. The amount the investor will receive upon early termination may be less than the amount invested.

### Objectives

#### Investment Objective

The investment objective of JSS Sustainable Bond –Emerging Markets Corporate IG (the "Sub-Fund") is to generate the highest possible interest income while maintaining balanced risk diversification and optimal liquidity. The Reference Currency of the Sub-Fund is the US dollar (USD). This means that the Sub-Fund manager seeks to optimise investment performance in USD terms.

#### Investment Policy

The assets of the Sub-Fund are invested worldwide in mainly fixed and variable-rate securities (including zero bonds) issued or guaranteed by companies domiciled in emerging markets or by companies that conduct the majority of their economic activity in emerging markets. Emerging markets include the developing countries of Asia, Latin America, Eastern Europe and Africa, as defined by J.P. Morgan Index Research, as well as other countries at a comparable stage in their economic development or in which new capital markets are being established. The Sub-Fund may also invest in fixed or floating rate securities, including zero bonds that may have a non-investment grade rating.

At least 70% of the Sub-Fund's net assets are invested in securities and money market instruments with an investment grade ("IG") rating.

Investment grade rating means a credit rating that is equal to or higher than BBB- (Standard & Poor's, Fitch) or Baa3 (Moody's) or an equivalent quality rating.

Furthermore, the Sub-Fund's net assets may be invested in asset-backed

securities (ABS) or CoCos. CoCos are unlimited, principally fixed-income bonds with a hybrid character which are issued as bonds with fixed coupon payments, but which upon a trigger event are mandatorily converted into company shares or written down, provided that respective trigger events are set out in the issuing terms of the CoCos. ABS are financial securities collateralized by a pool of assets.

The Sub-Fund promotes environmental and social characteristics according to SFDR Art. 8, but does not have a sustainable investment objective according to SFDR Art. 9. This product considers environmental, social and governance aspects ("ESG") along the investment process with the aim to reduce controversial exposures, to align the portfolio with international norms, to mitigate sustainability risks and to harness opportunities emanating from ESG trends and to get a better-informed perspective of portfolio holdings.

The Sub-Fund is actively managed without replicating any benchmark. However, the Sub-Fund is managed with reference to JPM Corporate Broad EMBI Diversified High Grade Index (the "Benchmark").

#### Share Class Policy:

This share class of the Sub-Fund generally distributes income to investors within four months after financial year-end.

#### Processing of subscription and redemption orders

You may redeem or convert shares in the Sub-Fund on any business day.

#### Intended retail Investor

The Sub-Fund is suitable for investors with a medium to long-term investment horizon who are aiming for asset growth. As a supplementary investment in the emerging market bond segment, the Sub-Fund is aimed for investors with a medium to high risk tolerance.

#### Depository

CACEIS Investor Services Bank S.A. (formerly known as RBC Investor Services Bank S.A.)

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The product may be exposed to further risks such as operational, counterparty, political and legal risks. For further details please consult the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

### Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		10,000 USD	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	4,350 USD	4,720 USD
	Average return each year	-56.50%	-13.94%
Unfavourable	What you might get back after costs	7,820 USD	8,630 USD
	Average return each year	-21.80%	-2.90%
Moderate	What you might get back after costs	10,040 USD	11,540 USD
	Average return each year	0.40%	2.91%
Favourable	What you might get back after costs	11,690 USD	12,850 USD
	Average return each year	16.90%	5.14%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between September 2021 and December 2023.

Moderate scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between August 2014 and August 2019.

Favourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between December 2015 and December 2020.

### What happens if J. Safra Sarasin Fund Management (Luxembourg) S.A. is unable to pay out?

The investor of this product will not face financial loss due to the default of J. Safra Sarasin Fund Management (Luxembourg) S.A., as the Fund is considered to be a separate and segregated pool of assets.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

# J. Safra Sarasin

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000.00

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	429 USD	1,115 USD
Annual cost impact (*)	4.3%	1.9% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.8 % before costs and 2.9 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

## Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	Up to 3.00% of the amount you pay in when entering this investment.	Up to 300 USD
<b>Exit costs</b>	We do not charge an exit fee for this product.	0 USD
Ongoing costs taken each year		
<b>Management fees and other administrative or operating costs</b>	1.20% of the value of your investment per year. This is an estimate based on actual costs over the last year.	120 USD
<b>Transaction costs</b>	0.09% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	9 USD
Incidental costs taken under specific conditions		
<b>Performance fees (and carried interest)</b>	There is no performance fee for this product.	0 USD

## How long should I hold it and can I take money out early?

### Recommended holding period: 5 years

You can sell your shares in the Fund on any Dealing Day as defined in the Prospectus. If you sell some or all of your investment before the recommended holding period the Fund will be less likely to achieve its objectives, however, you will not incur any additional costs by doing so.
