What is this product?

Type

This is an investment fund established as a company with variable capital and segregated liability between sub-funds, incorporated as a public limited liability under the laws of Ireland.

Objectives

Investment objective The investment objective of the Fund is to generate long term growth of capital. There can be no assurance that the Fund will achieve its investment objective.

Investment policies The Fund will seek to achieve its investment objective through a portfolio with a target allocation of 100% equity which aims at being as diversified across various industries as the benchmark index, MSCI India Index.

The Fund follows an India focused, diversified equity strategy that seeks to generate consistent outperformance over the chosen benchmark index – MSCI India. The Fund's investment strategy will be a blend of top down & bottom up investment approaches and in that the focus will be on bottom up stock picking for portfolio construction.

For further details on Investment Objective, Strategy and Policy, please refer to the Supplement of the Company's Prospectus in respect of the Fund.

Benchmark The Fund is actively managed. This means that the Investment Manager has discretion over the composition of the Fund's portfolio subject to its stated investment objective and policies. The Fund's performance is measured against the MSCI India index, which is the Fund's benchmark. The discretion of the Investment Manager over the composition of the Fund's portfolio is not constrained by reference to any benchmark index. Additionally, there is no requirement for target investments to form any part of the Fund's benchmark.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://www.abslamcsg.com/>.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 March 2015 and 31 March 2020.

Moderate: this type of scenario occurred for an investment between 31 December 2015 and 31 December 2020.

Favourable: this type of scenario occurred for an investment between 31 August 2013 and 31 August 2018.

Recommended holding period		5 years	
Example Investment		10,000 USD	
Scenarios		if you exit after 1 year	if you exit after 5 years (recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	731 USD -92.7%	599 USD -43.1%

Favourable	What you might get back after costs Average return each year	17,079 USD 70.8%	20,043 USD 14.9%

What happens if the Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

Example Investment 10,000 USD	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	707 USD	2,406 USD
Annual cost impact*	7.1%	3.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.0% before costs and 7.7% after costs.
