Date of Production of the KID: 20/08/2024

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?**Type**

The Product is a share of the Sub-fund Wellington Credit Income Fund (the "Fund") which is part of the Wellington Management Funds (Luxembourg) III SICAV (the "Umbrella Fund"), an open-ended investment fund with variable capital (société d'investissement à capital variable) of the umbrella type and is authorised under Part I of the 2010 Law and qualifies as UCITS under Article 1. paragraph 2) points a) and b) of the Directive.

Term

The Umbrella Fund and the Fund do not have a fixed term or maturity period, but the Management Company, with the approval of the Depositary, is entitled to give notice of the Umbrella Fund's dissolution at any time. In the event that the Management Company considers that changes in the political, economic, military, regulatory or business environments, or reductions in the scale of a Fund's total net assets compromise the effective management of a Fund, then the Management Company is empowered to liquidate the Fund at any time.

Objectives

The Fund seeks long-term total returns, with a secondary focus on regular income by primarily investing either directly or indirectly, in assets across a broadly diversified portfolio of credit instruments issued globally.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by allocating its assets across a broadly diversified portfolio of credit instruments from an investment universe which restricts investment in certain industries: fossil fuels, controversial and conventional weapons, tobacco and cannabis.

The Fund will invest primarily in higher yielding sectors of the credit market, such as emerging market debt, high yield debt, but may also invest in other debt obligations deemed to be consistent with the investment objectives of the Fund.

The Investment Manager believes that higher yielding credit sectors are subject to a variety of pricing inefficiencies. While the Investment Manager believes that valuations ultimately converge to fundamentals, these inefficiencies can lead to prolonged divergences from fundamental value leaving fundamentally attractive sectors underinvested. The Investment Manager believes that a broad, specialist driven fundamental research platform can successfully identify underappreciated investment opportunities arising from these inefficiencies, with the investment process designed to leverage such a broad research platform to help identify and take advantage of inefficiencies more quickly, and to position the portfolio around market inefficiencies as they change.

The investment decision-making process integrates an analysis of fundamental economic themes, top-down sector relative value, and specialist research on individual credit sectors with bottom-up security selection allowing access to a wide range of market opportunities.

The Fund will aim to declare a distribution of between 4%-8% of the Fund's Net Asset Value in USD on an annual basis, dependent on market conditions, however this is not guaranteed. The average duration of the Fund will generally range

between 2-6 years. The weighted average credit quality of the Fund will be investment grade at the time of purchase i.e. above Baa3 by Moody's, BBB- by Standard & Poor's, or BBB- by Fitch. However, the Fund's average credit quality may be below investment grade from time to time as a result of credit downgrades, rating removal, default or in certain market conditions that the Investment Manager deems appropriate.

Derivatives will be used to hedge (manage) risk and/or volatility and for investment purposes (such as gaining exposure to a security, to create leverage and/or a short position). Derivatives will form a significant part of the strategy and will impact performance.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purposes.

The Fund will invest a minimum of 5% of the Fund's net assets in debt issued by companies and organisations that Investment Manager believes are addressing the world's social and environmental challenges in a differentiated way through their products, services and projects, and which are categorised as Sustainable Investments under SFDR.

The Fund will seek to support certain environmental, social and governance (ESG) characteristics by applying several binding restrictions relating to fossil fuels, controversial and conventional weapons, tobacco and cannabis products.

A minimum of 80% of the Fund's net assets will be aligned to the environmental or social characteristics of the Fund.

This Share class will, via derivatives, seek to provide similar performance to the Fund in its base currency by limiting the impact of the movement of exchange rates between the currency of the Share class and the base currency of the Fund.

Income policy

Any income allocated to the Share class from the Fund is reinvested.

Dealing Frequency

Shares can be bought or sold daily in accordance with the Prospectus. The base currency of the Fund is USD.

Intended retail Investor

The Fund is intended for basic retail investors with a long-term investment horizon seeking capital appreciation and who are able to bear capital loss. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio. Investors in the Fund should be aware that, as set out in the Fund's Distribution Policy, dividends may be declared out of the capital of the Fund.

Depositary

State Street Bank International GmbH Luxembourg Branch.

Further Information

Please refer to the 'Other relevant information' section below.

What are the risks and what could I get in return?

Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 3 out of 7 which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. Poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for full details about any other risks materially relevant to the fund not included in the summary risk indicator such as liquidity, sustainability and operational risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		10,000 EUR	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	4,870 EUR	5,280 EUR
	Average return each year	-51.30%	-11.99%
Unfavourable	What you might get back after costs	7,510 EUR	8,410 EUR
	Average return each year	-24.90%	-3.40%
Moderate	What you might get back after costs	10,010 EUR	10,210 EUR
	Average return each year	0.10%	0.42%
Favourable	What you might get back after costs	11,940 EUR	12,820 EUR
	Average return each year	19.40%	5.09%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using a suitable benchmark between 2017 and 2022.

Moderate scenario: This type of scenario occurred for an investment using a suitable benchmark between 2017 and 2022.

Favourable scenario: This type of scenario occurred for an investment using a suitable benchmark between 2016 and 2021.

What happens if Wellington Luxembourg S.à r.l. is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of the Management Company, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the 5 year holding period we have assumed the product performs as shown in the moderate scenario
- 10,000.00 EUR

	If you exit after 1 year	If you exit after 5 years
Total costs	472 EUR	1,244 EUR
Annual cost impact (*)	4.7%	2.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.7 % before costs and 0.4 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3.00% of the amount you pay in when entering this investment.	Up to 300 EUR
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.51% of the value of your investment per year. This is an estimate based on actual costs over the last year.	151 EUR
Transaction costs	0.21% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	21 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This product has no required minimum holding period but is designed for long-term investment; you should have an investment horizon of at least 5 years.

The Management Company shall redeem shares of this Fund at the redemption price on each dealing day. Redemptions of the applicable Fund will be effected at the valuation point on the relevant dealing day. The price is based on the net asset value per share of each class determined at the valuation point. Redemption requests received after the dealing deadline will be treated as having been received by the following dealing deadline unless otherwise determined by the Management Company.

Please contact your broker, financial adviser or distributor for information on any costs and charges relating to the sale of the shares.

How can I complain?

If you choose to invest in the Fund and subsequently have a complaint about it or the Management company or any distributor of the Fund, you should in the first instance contact:

- the Transfer Agent on +353 1 242 5452, via email at WellingtonGlobalTA@statestreet.com
- the Management Company by post at 33, Avenue de la Liberté L-1931 Luxembourg, Grand Duchy of Luxembourg.
