Date of Production of the KID: 20/11/2024

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

Type

The Product is a share of the Sub-fund Wellington European Stewards Fund (the "Fund") which is part of the Wellington Management Funds (Luxembourg) III SICAV (the "Umbrella Fund"), an open-ended investment fund with variable capital (société d'investissement à capital variable) of the umbrella type and is authorised under Part I of the 2010 Law and qualifies as UCITS under Article 1. paragraph 2) points a) and b) of the Directive.

Term

The Umbrella Fund and the Fund do not have a fixed term or maturity period, but the Management Company, with the approval of the Depositary, is entitled to give notice of the Umbrella Fund's dissolution at any time. In the event that the Management Company considers that changes in the political, economic, military, regulatory or business environments, or reductions in the scale of a Fund's total net assets compromise the effective management of a Fund, then the Management Company is empowered to liquidate the Fund at any time.

Objectives

The Fund seeks long-term total returns in excess of the MSCI Europe Index (the "Index"), primarily through investment in European companies whose management teams and boards display exemplary 'stewardship'.

The Investment Manager defines 'stewardship' as how companies balance the interests of all stakeholders (e.g., customers, employees, communities, and the supply chain) in the pursuit of profits and how they incorporate material environmental, social and governance ("ESG") risks and opportunities in their corporate strategy.

The Investment Manager will manage the Fund to target net zero carbon emissions by 2050 in alignment with the Paris Agreement by actively engaging with companies held in the Fund to commit to net zero science-based targets.

The fund will be actively managed seeking to outperform the Index by primarily investing in European equity securities issued by large-cap companies that are deemed Sustainable Investments by the Investment Manager. The Investment Manager is biased to own companies already in a position of strength: with established competitive positions, identifiable business advantages, a history of continuous improvement and innovation, and inspiring leadership. To help evaluate the likelihood of continuing attractive returns, the Investment Manager places an emphasis on each company's stewardship, with the belief that proper care and nurturing of a corporation's valuable assets and intangibles is critical to a company's long-term resilience.

The strong links between stewardship and return on capital over the long-term make ESG factors a particular catalyst for active company engagement, which the Investment Manager believes is essential if investee companies are to sustain their returns in the long term.

The Fund is expected to be well diversified by country, currency and industry but may hold positions that are concentrated in this manner from time to time. The Fund is also expected to be concentrated in a relatively small number of securities and turnover is expected to be low.

The Index serves as a reference benchmark for performance comparison and weighted average carbon intensity purposes. Whilst Fund securities may be components of the Index, the Index is not considered during portfolio construction and the Investment Manager will not manage the extent to which Fund securities differ from the Index. The Index is market capitalisation weighted and designed to measure the equity market performance of developed and emerging markets. The Index does not take into account the environmental and social characteristics referenced above.

The Investment Manager will only invest in securities that are considered Sustainable Investments and materially align with at least one of the stewardship aims. The Fund will invest a minimum of 90% of its net assets in companies which meet the above criteria and which are assessed to be Sustainable Investments.

The Investment Manager is committed to investing 65% of its net assets (excluding cash and cash equivalents) in companies with net zero science-based targets by 2030, and 100% of the Fund's net assets (excluding cash and cash equivalents) by 2040.

The Investment Manager will invest 100% of its net assets (excluding cash and cash equivalents) in companies that have at least one of the following three attributes: a target validated by science-based targets initiative, an alternative public active emissions reduction target or a combined Scope 1+2 carbon intensity (tons CO₂/ \$M revenue) that is at least 25% below their industry average based on publicly disclosed emissions.

The Fund will invest in shares and other securities with equity characteristics such as depositary receipts. The Fund may invest either directly or via derivatives.

While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

Income policy

Any income allocated to the Share class from the Fund is reinvested.

Dealing Frequency

Shares can be bought or sold daily in accordance with the Prospectus.

Intended retail Investor

The Fund is intended for basic retail investors with a long-term investment horizon seeking capital appreciation and who are able to bear capital loss. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

Depositary

State Street Bank International GmbH Luxembourg Branch.

Further Information

Please refer to the 'Other relevant information' section below.

What are the risks and what could I get in return?

Risk Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 4 out of 7 which is a medium risk class. This rates the potential losses from future performance at a medium level. Poor market conditions could affect the value of your investment.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for full details about any other risks materially relevant to the fund not included in the summary risk indicator such as liquidity, sustainability and operational risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		10,000 EUR	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	2,050 EUR	2,010 EUR
	Average return each year	-79.50%	-27.45%
Unfavourable	What you might get back after costs	8,360 EUR	7,780 EUR
	Average return each year	-16.40%	-4.90%
Moderate	What you might get back after costs	10,310 EUR	11,790 EUR
	Average return each year	3.10%	3.35%
Favourable	What you might get back after costs	13,580 EUR	14,560 EUR
	Average return each year	35.80%	7.80%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2015 and 2020.

Moderate scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2018 and 2023.

Favourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 2019 and 2024.

What happens if Wellington Luxembourg S.à r.l. is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of the Management Company, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the 5 year holding period we have assumed the product performs as shown in the moderate scenario
- 10,000.00 EUR

	If you exit after 1 year	If you exit after 5 years
Total costs	55 EUR	319 EUR
Annual cost impact (*)	0.6%	0.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.9 % before costs and 3.3 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	0 EUR
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.40% of the value of your investment per year. This is an estimate based on actual costs over the last year.	40 EUR
Transaction costs	0.15% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	15 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This product has no required minimum holding period but is designed for long-term investment; you should have an investment horizon of at least 5 years.

The Management Company shall redeem shares of this Fund at the redemption price on each dealing day. Redemptions of the applicable Fund will be effected at the valuation point on the relevant dealing day. The price is based on the net asset value per share of each class determined at the valuation point. Redemption requests received after the dealing deadline will be treated as having been received by the following dealing deadline unless otherwise determined by the Management Company.

Please contact your broker, financial adviser or distributor for information on any costs and charges relating to the sale of the shares.

How can I complain?

If you choose to invest in the Fund and subsequently have a complaint about it or the Management company or any distributor of the Fund, you should in the first instance contact:

- the Transfer Agent on +353 1 242 5452, via email at WellingtonGlobalTA@statestreet.com
- the Management Company by post at 33, Avenue de la Liberté L-1931 Luxembourg, Grand Duchy of Luxembourg.
