What is this product?

Type

The product is a share class of FTGF ClearBridge US Equity Sustainability Leaders Fund (the "Fund") which is part of the Franklin Templeton Global Funds plc, an investment company with variable capital incorporated with limited liability in Ireland and established as an umbrella fund with segregated liability between sub-funds.

Term

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

Objectives

Investment Objective

The Fund's investment objective is to provide long-term capital appreciation.

Investment Policy

- The Fund will invest at least 85% of its assets in shares of US companies that meet the investment manager's financial criteria and its criteria for environmental, social and governance (ESG) policies.

- As an Article 8 fund under SFDR, the investment manager applies its ESG sustainability leader criteria to 100% of the portfolio of the Fund. The investment manager's portfolio construction process restricts the companies in the Fund's investable universe by at least 20% to accommodate only those companies that are sustainability leaders.

- The investment manager will try to focus on companies that, in their view, offer products and services that have a positive impact on society by doing less harm to people and the planet relative to other companies within the same industry.

- The Fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the Fund's objective as well as to reduce risk or cost or to generate additional growth or income for the Fund.

- Benchmark:** Russell 3000 Index

- Manager's Discretion:** The Fund is actively managed. The investment manager has discretion in selecting investments within the Fund's objective and investment policies. The benchmark is used for performance comparison purposes. While most of the Fund's securities will be components of the benchmark, the weightings of the holdings may differ materially from the weightings in the benchmark. The Fund may also invest in securities that are not included in the benchmark. The Fund's percentage exposures to sectors and industries may differ materially from those of the benchmark.

- Transaction Costs:** The Fund bears costs in buying and selling investments, which may have a material impact on the Fund's performance.

Share Class Policy

Income and gains from the Fund's investments are not paid but instead are reflected in the Fund's share price.

Processing of subscription and redemption orders

You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

Intended retail investor

The Fund may appeal to investors looking to achieve capital appreciation by obtaining exposure to equity securities of US issuers that meet the investment managers ESG criteria and are deemed by the investment manager as sustainability leaders. Investors should be willing to hold their investment over the long term for a minimum period of 5 to 7 years. The Fund is suitable for investors who do not need to have specific knowledge and/or experience of financial markets with the understanding that they may not get back the full amount invested in the Fund.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator:

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	112 USD	909 USD
Annual cost impact (*)	1.1%	1.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.4% before costs and 12.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
