This product is authorised in Luxembourg. Candriam is approved in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

This key information document is valid as at 2024-03-01.

WHAT IS THIS PRODUCT?

Type: This product is a share class (V-H) of a sub-fund (Bond Global High Yield) of an investment company with variable capital (SICAV) under Luxembourg law (Candriam Sustainable), Undertakings for Collective Investment in Transferable Securities (UCITS).

Term: Open-ended.

Objectives:

Principal assets traded:

Bonds and other debt securities with an issuer or issue rating of minimum than B-/B3 (or equivalent) (i.e. issuers or issues considered as high risk) from one recognised rating agency or considered of equivalent rating category by the Management Company (i.e. credit quality assessed by the Management Company itself based on qualitative analysis of the instrument) at the time of purchase. In the absence of an issue rating, the Management Company reserves the right to use the issuer rating.

Investment strategy:

The fund seeks to achieve capital growth by investing in the principal assets traded and to outperform the benchmark.

The management team makes discretionary investment choices on the basis of an economic/financial analysis process as well as on a Candriam's proprietary analysis of Environmental, Social and Governance (ESG) considerations, both indicative of risks and long-term opportunities.

When a debt security is downgraded to lower than B-/B3 or no longer considered of equivalent rating category by the Management Company, such asset will be sold within 6 months. However, should securities no longer satisfying the rating requirements represent less than 3% of the net asset value of the fund's assets, they may be tolerated by the Management Company provided that the interests of Investors are not impaired.

The fund's sustainable investment objective is to contribute to reducing greenhouse gas emissions through specific targets as well as the integration of climate related indicators in issuer and securities analysis.

The fund also aims to have long-term positive impact on environment and social objectives. More specifically the fund aims to achieve overall greenhouse gas emissions at least 30% lower than those of the benchmark (for corporate issuers). To achieve these objectives the fund implements a combination of positive selection of the best issuers based on ESG criteria, exclusion of issuers detrimental to these objectives or deemed to be prone to controversies.

Issuers are subject to a two-pronged analysis considering how issuers' activities contribute to achieving sustainable objectives on the one hand, and how issuers' operations and policies align with the interests of their key stakeholders on the other hand. The result of this analysis forms the basis to define the investable universe and guide fund managers in their portfolio construction.

This analysis is enriched by the results of dialogues led with issuers.

This investment approach will cause the fund to avoid certain issuers due to their poor ESG quality or contribution to attaining sustainability objectives. Whilst the manager believes that such issuers are likely to lose out to more sustainable ones over the long term, market volatility and short term market trends could result in such issuers outperforming more sustainable ones over shorter periods.

For further information, please refer to Candriam's website and/or the prospectus.

The fund may use derivative products both for investment and hedging purposes (hedging against unfavourable future financial events).

This hedged share class aims to reduce the effect of exchange rate fluctuations between the base currency of the sub-fund EUR and USD being the currency in which the hedged share class is denominated. This reduces but does not completely eliminate currency risk.

Benchmark: ICE BofA BB-B Global High Yield Non-Financial Constrained Index Hedged EUR (Total Return).

The fund is actively managed and the investment approach implies a reference to a benchmark.

Benchmark definition: The index measures the performance of USD, CAD, GBP and EUR-denominated non-financial corporate bonds below investment grade rated BB1 through B3 issued in the major domestic or eurobond markets and with issuer exposure capped at 2%.

Use of the benchmark:

- as investment universe. In general, the majority of the issuers of the fund's financial instruments are part of the benchmark. This said, investments outside this benchmark are admitted,
- in the determination of risk levels/parameters,
- for performance comparison.
- for performance fees calculation for certain share classes if applicable.

Deviation level of the portfolio composition from the benchmark:

The fund being managed actively, its objective is not to invest in all constituents of the benchmark, nor to invest to the same extent in the constituents of the benchmark. Under normal market conditions, the tracking error of the fund will be moderate to important this is comprised between 0.75% and 3%.

This measure is an estimation of the deviation of the fund's performance compared to the performance of the benchmark. The more the tracking error is important, the more deviations compared to the benchmark are important. The effective tracking error depends notably on the market conditions (volatility and correlations between financial instruments) and can deviate from the expected tracking error.

Redemption of shares: On request, every day, in Luxembourg.

Allocation of income: Distribution.

Intended retail investor:

This product is for investors who meet the conditions for accessing the product in question (see prospectus) with any level of knowledge and experience who are looking for Capital Growth and Income. This product can be used as a core holding or a component of a diversified portfolio for investments with an investment horizon of 3 years. Investors should understand the product risks and only invest if they can bear potentially substantial losses.

General information:

Depository bank: CACEIS Bank, Luxembourg Branch.

Other information:

This document provides a description of a share class of a sub-fund of Candriam Sustainable. The prospectus and periodical reports are established for all the sub-funds. There are other share classes and these are listed in the prospectus.

Investors may apply for the conversion of their shares into shares of another class of the same sub-fund or into shares of a class of another sub-fund of the fund, based on the eligibility criteria and following the procedures available through their financial intermediary.

The sub-fund is only liable for the debts, liabilities and obligations that can be charged to it.

Additional information about the fund can be found in the prospectus and the periodical reports, which may be obtained free of charge on request from Candriam or viewed at any time on the website www.candriam.com. These documents are available in one of the languages approved by the local authority of each country where the fund is authorised to market its shares or in a common language in the international finance sphere. All other practical information, in particular the latest share price, is available from the places shown above.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risk(s) materially relevant not included in the summary risk indicator: Credit. Counterparty. Derivatives. Liquidity.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and/or a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 10/2019 and 09/2022.

Moderate: This type of scenario occurred for an investment between 06/2014 and 05/2017.

Favourable: This type of scenario occurred for an investment between 03/2016 and 02/2019.

Recommended holding period: Example Investment:		3 years 10 000 USD	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	5 910 USD	7 000 USD
	Average return each year	- 40.90%	- 11.23%
Unfavourable	What you might get back after costs	8 770 USD	9 720 USD
	Average return each year	- 12.34%	- 0.94%
Moderate	What you might get back after costs	10 380 USD	11 260 USD
	Average return each year	3.81%	4.04%
Favourable	What you might get back after costs	11 670 USD	12 200 USD
	Average return each year	16.70%	6.84%

WHAT HAPPENS IF CANDRIAM IS UNABLE TO PAY OUT?

As the Funds' assets are held with the depository, they are not part of the assets of Candriam in case of bankruptcy and cannot be seized by the creditors of Candriam. Nevertheless, investors run the risk to suffer a financial loss in case of the default of Candriam.

In case of default of the depository, the risk of a financial loss is mitigated to some extent as the Fund's assets are legally segregated from the assets of the depository.

The potential financial loss associated with the default of Candriam is not covered by an investor compensation or guarantee scheme.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	81 USD	274 USD
Annual cost impact (*)	0.8%	0.8% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.9% before costs and 4.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

If the fund is part of another product, such as an insurance product, the costs shown here do not include any additional costs you may incur.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge any entry fee.	0 USD
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.55% of the value of your investment per year. This is an estimate based on actual costs over the last year.	55 USD
Transaction costs	0.25% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	25 USD
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	N/A

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 3 years

The selection of the recommended holding period depends on the underlying investments type as well as the level of associated risk (from high to low risk). For example, "equity" products (with a high level of risk) generally have a recommended holding period of 6 years (long-term period), "bond or money market" products (with a lower risk profile) have a shorter recommended holding period (generally between 2 and 4 years for bonds products or less than 1 year for money market products - medium-term/short-term period). "Mixed" products generally have a recommended holding period between 3 and 5 years, depending on the weight of the underlying instruments type. The recommended holding period for "Alternative-type" products is generally 3 years.

The investor may request for the redemption of its shares, at any time, under the conditions set out in the section "What are the costs?". A decision to shorten your holding period, compared to the recommended one, may increase the impact of potential fees on the performance profile.

HOW CAN I COMPLAIN?

Complaints about this product or about the conduct of the product manufacturer or the person advising on, or selling, the product:

Postal address: Candriam, SERENITY – Bloc B, 19-21, route d'Arlon – L-8009 Strassen
 Website: <https://contact.candriam.com>
