## What is this product?

### Type

- This product is a class of shares of the Sub-Fund and denominated in USD. The Fund is an investment company with a variable capital and qualifies as an Undertaking for Collective Investments in Transferable Securities ("UCITS").
- The currency risk associated with the depreciation of the reference currency of the Sub-Fund (EUR) against the share class currency (USD) is not hedged.
- As an investment fund, the return of the Sub-Fund depends on the performance of its underlying assets.

### Objectives

#### Investment objective:

- The objective is to achieve a better performance in a global equity market than the index "MSCI World in Euro" (the "Index").

#### Investment policy:

- The Sub-Fund invests in company shares, certificates of shares and other equity-like transferable securities. It may invest up to 10% of its assets in UCITS and other UCIs in line with Article 41 (1) e of the Investment Fund Law. It holds a diversified portfolio promoting the exposure to global equity markets (Europe, North America, Asia and emerging markets).
- The Sub-Fund promotes social and environmental characteristics by investing at least 75% of its invested portfolio in shares, certificates of shares and equity-like transferable securities with exposure to global equity markets that exhibit strong ESG credentials, with a specific focus on CO2 emissions. The invested portfolio shall refer to all assets invested by the Sub-Fund to the exclusion of liquidities.
- It follows a strategy combining a top down approach for selecting the investments' geographical sectors and a bottom-up approach for selecting the most attractive stocks in each region. In doing so and depending on market conditions, some sectors may be overweight or underweight. The stock selection process favours large companies and mainly relies on fundamental analysis to select companies that generate earnings and dividends while being valued at reasonable prices.
- It may also invest in structured financial instruments such as, bonds and other transferrable securities whose performance is linked to the evolution of an index, of transferable securities or a basket of transferable securities or a UCI.
- Derivatives may be used to a limited extent if there are significant subscriptions or to hedge the portfolio. In such cases, the Sub-Fund may use derivatives with a commitment

exposure of approximately 20% and in any case no more than 100% according to Article 42 (3) of the Investment Fund Law.

- For hedging, investment and gaining exposure purposes, the Sub-Fund may use any type of derivative financial instruments traded on a regulated market and / or traded over-the-counter (OTC) including CDS, provided they are contracted with first class financial institutions specialized in this type of operation.
- The Sub-Fund is actively managed with no reference to a benchmark.
- This financial product promotes environmental and social characteristics and qualifies as product in accordance with Article 8(1) of Regulation (EU) 2019/2088. This fund does not have as its objective a sustainable investment.
- The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.
