What is this product?

Type

A contractual investment fund of the “other funds for traditional investments” type.

Term

The investment fund is established for an indefinite period. The Fund Management Company may initiate the dissolution of the investment fund by terminating the fund agreement.

Objectives

Investment Objective

The Investment Fund seeks to achieve attractive investment income combined with long-term capital growth.

Investment Policy

The Fund Management Company invests the assets of the Investment Fund in the equity securities and participation rights of companies that have their registered office or whose commercial activity is based mainly in Switzerland or Liechtenstein and that are expected to generate an above-average dividend yield on a continuous basis.

Solid balance sheets, stable free cash flows and steady earnings growth are of crucial importance when selecting equities. The investments are made in various sectors and market capitalisations (small, mid, large), with a greater focus on companies with high market capitalisation. In addition to financial considerations, the Fund integrates environmental, social and governance (ESG or sustainability) aspects into every step of

the investment process. The following approaches are applied: standards-based exclusions of JSS, positive screening, ESG integration and stewardship.

Share Class Policy:

This unit class of the Fund distributes income to investors before the end of December as a general rule.

Processing of subscription and redemption orders

You can buy and sell units in this Fund on any bank business day in Switzerland.

Intended retail Investor

The Fund is suited to investors with a medium to long-term investment horizon seeking attractive, sustained investment income combined with long-term capital appreciation. It is intended for retail investors as a basic investment in Swiss equities. The value of equities is primarily influenced by market and sector-specific factors and may therefore rise as well as fall. Investors can exploit any resulting fluctuations in the net asset value of the fund units and are not tied to a specific date on which to realise the investment.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 7 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the

product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

The product may be exposed to other risks, such as operational, counterparty, political and legal risks. For further details, please consult the Prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios are illustrations using the worst, average and best performance and the a suitable benchmark over the last 12 years. The markets could behave completely differently in the future.

Recommended holding period:

7 years

Favourable	What you might get back after costs	12,510 CHF	19,100 CHF
	Average return each year	25.10%	9.69%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using a suitable benchmark between December 2021 and December 2023.

Moderate scenario: This type of scenario occurred for an investment using a suitable benchmark between April 2014 and April 2021.

Favourable scenario: This type of scenario occurred for an investment using a suitable benchmark between June 2012 and June 2019.

What happens if J. Safra Sarasin Investmentfonds AG is unable to pay out?

The assets of the collective investment scheme are held separately from the assets of the management company J. Safra Sarasin Investmentfonds AG and of the relevant custodian bank. Thus, you will not lose your investment should J. Safra Sarasin Investmentfonds AG become insolvent.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- CHF 10,000.00

	If you exit after 1 year	If you exit after 7 years
Total costs	464 CHF	2,215 CHF
Annual cost impact (*)	4.6%	2.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.1 % before costs and 6.0 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
