The product is a unit of the sub-fund Julius Baer Equity Global Excellence Europe (the sub-fund) of Multicooperation SICAV (the "Umbrella Fund"), a "société d'investissement à capital variable" (SICAV) and is authorised as an undertaking for collective investment in transferable securities (UCITS) in accordance with Part I of the Law of 17 December 2010 on undertakings for collective investment (the "Law of 2010").

Term

The Fund has no maturity date. The Fund could be closed under the conditions set down in the current prospectus of the Fund.

Objectives

Investment Objective

The aim of the sub-fund ("Fund") is to achieve the highest-possible growth in value. For this purpose, the Fund invests in selected European shares.

Investment Policy

The Fund invests at least two thirds of its assets in equities and other equity securities of companies which have their head office or a predominant part of their business operations in Europe. This also includes the equity securities of real estate companies, listed real estate funds and listed real estate investment trusts (REITs).

The Fund may also invest up to one third of its assets in other equities, debt securities of all types, money market instruments, bank deposits, target funds (less than 10%) and structured products (less than 10%), as well as in exchange-traded commodities (ETCs) (so-called Delta 1 certificates), commodities funds and investments in precious metal accounts, provided the assets are settled in cash and no physical delivery may ensue.

The Fund may, under certain circumstances and by way of exception to the two thirds rule, hold up to 49% of the assets in liquid instruments.

The Fund may use complex financial instruments (e.g. derivatives) to hedge its assets against currency risks, as well as for efficient portfolio management and investment purposes.

The Fund promotes environmental and/or social characteristics in accordance with Article 8 of Regulation (EU) 2019/2088 (the "SFDR"), but does not have a sustainable investment as its objective.

The Fund's benchmark index is the MSCI Europe TR Net local Index, which represents the European equity market. The Fund is actively managed and

aims to outperform the benchmark index over the long term. Most of the Fund's securities are included in the benchmark index. The investment manager can, at its discretion and in accordance with the prospectus, also invest in securities that are not included in the benchmark index in order to take advantage of specific investment opportunities. The Fund portfolio may significantly deviate from the benchmark index in terms of the selection and weighting of Fund investments.

In application of its investment policy, the Fund promotes environmental or social characteristics, but does not have a sustainable investment as its objective. The Fund does not use a benchmark index to achieve the environmental or social objectives it promotes.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 6 years.
The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose

money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. If you choose a foreign currency share class you will be exposed to currency risk and your final return will depend on the exchange rate between the foreign currency and your local currency. The risk is not considered in the indicator shown above.

You can find more information about the other risks in the prospectus at www.carnegroup.com.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 11 years. Markets could develop very differently in the future.
