## What is this product?

### TYPE OF PRODUCT

The Fund is a sub-fund of UBAM, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

### TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide on its pure and simple liquidation if its net assets represent less than EUR 10 million (or equivalent value in another currency) or if the economic and/or political environment was to change or for any economic and financial reasons for which the Board of Directors considers that it is in the general best interests of shareholders to liquidate the Fund.

### OBJECTIVES

The Fund seeks to grow your capital and generate income by investing primarily in Japanese equities or equivalent.

The Fund is actively managed and relatively concentrated (typically containing 25-60 names) with low turn-over.

The Fund has two sustainability objectives:

- maintain an average portfolio's Environmental, Social and Governance (ESG) score, based on the Investment Manager's analyses of companies ESG profiles using a proprietary scoring methodology, above the median ESG Score
- evaluate the strategies deployed by companies in the field of oil & gas extraction and electricity generation to transition to a lower-carbon economy.

First step, the Investment Manager's applies ESG exclusion criteria, combined with its sustainability assessment of companies from the eligible investment universe defined as the best 300 Japanese listed stocks ranked according to the above mentioned ESG proprietary methodology among the 1000 most liquid Japanese listed stocks.

Second step, the Investment Manager's applies an ESG approach which is further embedded in the valuation and investment process of the Fund and the selection of stocks include ESG criteria when assessing stocks' fair value and normalized profitability.

ESG considerations may include carbon footprint as well as global norms compliance, social and corporate governance standards.

The ESG analysis covers 100% of the Fund's portfolio.

The Fund uses the Tokyo SE (TOPIX) Total Return Index JPY (the "Benchmark") for performance objective. The Benchmark is not representative of the risk profile of the Fund. The performance of the Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting.

The Benchmark is not aligned with the environmental and/or social characteristics promoted by the Fund.

The Fund's base currency is JPY.

As an equity fund, its holdings can move in line with or return less than the broad stock market, so investors should be aware that the value of their holdings could fall and that they may not get back their initial investment.

The recommended holding period is determined to allow sufficient time for this product to reach its objectives and provide a consistent return less dependent on market fluctuations. Nevertheless, such return is not guaranteed.

The return of the product is determined using the Net Asset Value (NAV) calculated by the Administrative Agent. This return depends mainly on the market value fluctuations of the underlying investments.

The share currency risk in relation to the Fund's base currency is mainly hedged.

Any income received by the Fund is reinvested (capitalisation share).

### INTENDED RETAIL INVESTORS

The Fund is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The Fund is also suitable for investors who may bear capital losses, who do not need capital guarantee and who wish to hold their investment over 5 years.

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:		5 years GBP 10'000		
		If you exit after 1 year	If you exit after 5 years	
<b>Scenarios</b>				
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.			
<b>Stress scenario</b>	<b>What you might get back after costs</b>	GBP 2'800	GBP 2'330	
	Average return each year	-72.0%	-25.3%	
<b>Unfavourable scenario</b>	<b>What you might get back after costs</b>	GBP 7'410	GBP 8'380	This type of scenario occurred for an investment in the proxy then the product between July 2015 and July 2020.
	Average return each year	-25.9%	-3.5%	
<b>Moderate scenario</b>	<b>What you might get back after costs</b>	GBP 10'510	GBP 12'460	This type of scenario occurred for an investment in the proxy between January 2014 and January 2019.
	Average return each year	5.1%	4.5%	
<b>Favourable scenario</b>	<b>What you might get back after costs</b>	GBP 13'730	GBP 17'160	This type of scenario occurred for an investment in the proxy then the product between December 2018 and December 2023.
	Average return each year	37.3%	11.4%	

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if the product is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Fund's assets are held with BNP Paribas S.A., Luxembourg Branch and are segregated from the assets of other sub-funds of the SICAV and from the assets of the Depositary. The assets of the Fund cannot be used to pay the debts of other sub-funds.

In the event of insolvency of the Depositary, the Fund may suffer a financial loss.

In the event of insolvency of the product manufacturer, the Fund's assets will not be affected.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time (\*)

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- GBP 10'000 is invested.

Investment of GBP 10'000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	GBP 475	GBP 1'497
<b>Annual cost impact</b>	4.7%	2.4%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.9% before costs and 4.5% after costs.

These figures include the maximum subscription fee that the intermediary(ies) involved in the subscription process may charge (up to 3.00% of your investment). The intermediary will inform you of the actual charge.

#### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year

Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.52% of the value of your investment per year. This is an estimate based on actual costs over the last year.	GBP 152
Transaction costs	0.23% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	GBP 23
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	GBP 0

## How long should I hold it and can I take my money out early?

### Recommended holding period (RHP): 5 years.

The RHP is determined to allow sufficient time for this product to reach its objectives and to provide a consistent return less dependent on market fluctuations. Investors should be prepared to remain invested for at least 5 years but can nevertheless redeem their investment at any time, or hold the latter for a longer period of time.

The Net Asset Value (NAV) is daily except if it is not a full bank business day in Luxembourg or in Japan (each a Business Day). The NAV is calculated on the same bank business day (Calculation Day). Redemptions are possible on each NAV date. All redemption requests must be received in good order by the Registrar and Transfer Agent prior to 13:00 (Luxembourg time) one (1) full bank business day in Luxembourg prior to the Calculation Day. Redemption proceeds shall be paid within two (2) Business Days following the Calculation Day.

Details of the closing days are available here: <https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>.

Conversion of shares is allowed within the Fund or to another sub-fund free of charge.

Please refer to the prospectus for further details.
