What is this product?

Type

The Fund is a sub-fund of GAM Star Fund p.l.c., an open-ended investment company incorporated with limited liability under the laws of Ireland and authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 1989 and is subject to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended.

Term

The Fund has no maturity date. The Fund could be closed under the conditions set down in the current prospectus of the Fund.

Objectives

Investment Objective

The investment objective of the Fund is to achieve capital appreciation.

Investment Policy

The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets worldwide, and up to 10% of its net assets in unlisted equities, in each case which demonstrate long term growth opportunities within sectors whose business models are driven by new technologies.

The Fund has no geographical bias and up to 30% of net assets may be invested in Emerging Markets.

The fund manager aims to invest in sectors and businesses that have franchises with a sustainable competitive advantage – typically accruing as a result of brands, high switching costs for customers and significant scale based cost.

The fund manager will exploit potential pricing anomalies through disciplined and systematic stock selection and risk management.

The Fund promotes environmental and/or social characteristics in accordance with Article 8 of Regulation (EU) 2019/2088 ("SFDR") but does not have sustainable investment as its objective.

The Fund is actively managed in reference to the MSCI World Growth Index / Average 1 month deposit rate (the "Benchmark") and the Average 1 month deposit rate (the "Index") by virtue of the fact that it uses the Benchmark and Index in the appropriate currency for performance comparison purposes and the performance fees payable to the Co-Investment Manager may be calculated based on the performance of the Fund against the Benchmark. However the Benchmark or Index are not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark or Index.

The fund manager has discretion in managing the investments of the Fund.

The Fund may invest up to 30% of its net assets in China A shares listed on or dealt in the Shanghai Stock Exchange or the Shenzhen Stock Exchange. Investments will be made either via the Renminbi Qualified Foreign Institutional Investor ("RQFII") regime or via the Shanghai Stock Exchange using the Shanghai Hong Kong Stock Connect.

The Fund may use a number of simple derivative instruments for investment purposes and/or efficient portfolio management purposes. Further information on the Fund's use of derivatives can be found under the Derivatives section within the Fund's Supplement. The use of these instruments may result in the Fund being leveraged whereby the total exposure of the Fund as a result of all positions held by it may exceed its Net Asset Value.

Share Class Policy:

The Fund has several share classes. These may differ with regard to fees, minimum investment, currency, use of revenues and investor qualification.

Any income arising from this share class will be accumulated. Other share classes of the Fund may distribute income.

For further information on investment objectives, policy details, compulsory redemption of shares, termination of the Fund and redemption or switching requests please refer to the Prospectus, which are available at www.gam.com

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose

money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely to impact our capacity to pay you.

Be aware of currency risk. If you choose a foreign currency share class you will be exposed to currency risk and your final return will depend on the exchange rate between the foreign currency and your local currency. The risk is not considered in the indicator shown above.

You can find more information about the other risks in the prospectus at www.gam.com.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Bridge Fund Management Limited is unable to pay out?

You will not face financial loss should Bridge Fund Management Limited default on their obligation. In the event of insolvency of the depositary, the Fund's financial instruments are protected and are not subject to a claim by the depositary's liquidator. In the event that there is any loss, there is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

For the protection of investors the fund's assets are held by an independent depositary, State Street Custodial Services (Ireland) Limited so the fund's ability to pay out would not be affected by the insolvency of Bridge Fund Management Limited. If the fund is terminated or wound up, the assets will be liquidated, and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. There is no compensation scheme protecting you from this scenario. The assets and liabilities of the Fund are segregated from other sub-funds in the GAM Star Fund p.l.c., subject to the provisions of Irish law. This document describes a share class of a sub-fund of the GAM Star Fund p.l.c.. Subject to the conditions set down in the prospectus of the GAM Star Fund p.l.c., you are entitled to switch from one share class to another, either in the Fund or in another sub-fund of the GAM Star Fund p.l.c.. Please refer to the "How to Switch Shares" section of the prospectus for further information on how to switch.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 746	EUR 3 075
