Objectives

Investment Objective

The investment objective of the Fund is to achieve capital appreciation.

The Fund seeks to achieve this objective through investing primarily in equities (e.g. shares) of companies listed on or dealt in Recognised Markets in Emerging Markets or which are listed on or dealt in Recognised Markets outside of the Emerging Markets but which generate the bulk of their earnings in Emerging Markets.

The Fund selects investments with a focus on companies with a lower carbon intensity relative to their sector, maintains a positive focus on companies considered to have leading ESG ratings relative to their sector, and excludes those issuers involved in specific activities considered to cause negative environmental and social impact. The Fund promotes environmental or social characteristics but does not have sustainable investment as its objective.

The Fund may invest up to 20% of net assets in Russian markets and up to 25% of net assets in China A Shares. A shares investments will be made either via the Renminbi Qualified Foreign Institutional Investor ("RQFII") regime or via the Shanghai Stock Exchange using the Shanghai Hong Kong Stock Connect or Shenzhen Stock Exchange using the Shenzhen Hong Kong Stock Connect.

Top-down macro research combined with bottom-up company analysis will be used in determining the allocation of investments.

The Fund promotes environmental and/or social characteristics in accordance with Article 8 of Regulation (EU) 2019/2088 ("SFDR") but does not have sustainable investment as its objective.

The Fund is considered to be actively managed in reference to MSCI Emerging Markets Index / Average 1 month deposit rate (the "Benchmarks") by virtue of the fact that it uses the Benchmarks in the appropriate currency for performance comparison purposes. However, the Benchmarks are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the Benchmarks.

The fund manager has discretion in managing the investments of the Fund.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 7 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. If you choose a foreign currency share class you will be exposed to currency risk and your final return will depend on the exchange rate between the foreign currency and your local currency. The risk is not considered in the indicator shown above.

You can find more information about the other risks in the prospectus at www.gam.com.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 12 years. Markets could develop very differently in the future.

What happens if GAM Fund Management Limited is unable to pay out?

For your protection the company's assets are held separately with the custodian, so the Fund's ability to pay out would not be affected by the insolvency of the Fund Management Company. If the Fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. For the avoidance of any doubt, the Fund is not a guaranteed UCITS and there is no guarantee scheme in place which provides a guaranteed rate of return or compensation scheme in place to offset, all or any of, this loss. The assets and liabilities of the Fund are segregated from other sub-funds in the GAM Star Fund p.l.c., subject to the provisions of Irish law. This document describes a share class of a sub-fund of the GAM Star Fund p.l.c.. Subject to the conditions set down in the prospectus of the GAM Star Fund p.l.c., you are entitled to switch from one share class to another, either in the Fund or in another sub-fund of the GAM Star Fund p.l.c.. Please refer to the "How to Switch Shares" section of the prospectus for further information on how to switch.
