WHAT IS THIS PRODUCT?

TYPE

Carmignac Portfolio Grandchildren is a segregated sub-fund of Carmignac Portfolio SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

TERM

The SICAV was launched on 30/06/1999 for unlimited period. The sub-fund was launched on 31/05/2019.

OBJECTIVE

The objective of the sub-fund is to achieve long-term capital growth and involves active, flexible management with a focus on equity markets.

In order to achieve its investment objective, the sub-fund seeks to invest in companies considered by the Investment Manager to be of high quality. The equity strategy is implemented through a portfolio of direct investment in securities and to a lesser extent, derivatives. The sub-fund is not constrained by any benchmark and is free to invest in the Investment Manager's choice of equities irrespective of industry and geography. The fund can invest up to 10% of the net assets in bonds with a rating below investment grade. Investments in high-quality companies are determined based upon a quantitative screening and fundamental analysis. The sub-fund may also, on an ancillary basis, hold cash and/or invest in other transferable securities.

In order to achieve its investment objective, the sub-fund may invest in futures traded on Eurozone and international markets, including emerging markets, for exposure or hedging purposes. The other derivatives that may be used by the portfolio manager for exposure or hedging purposes include CFDs (contracts for difference), forwards, forward exchange contracts, options (simple, barrier, binary), and swaps (including performance swaps), involving one or more risks/underlying instruments in which the portfolio manager may invest. At least 51% of the portfolio is invested in developed and emerging market equities, without restrictions in terms of allocation by geographical zone, sector type or market capitalisation. The sub-fund may invest up to 10% of its net assets in units or shares of investment funds. The portfolio manager also reserves the right to invest up to 10% of the net assets in bonds with a rating below investment grade.

This sub-fund is an actively managed UCITS. An actively managed UCITS is one where the investment manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy. This sub-fund is actively managed in reference to its Reference indicator (the MSCI WORLD NR (USD) index (Bloomberg code: M1WO) calculated with net dividends reinvested). The sub-fund's investment universe is at least partly derived from the Reference indicator in terms of allocation by region, sector or market capitalisation. The sub-fund's investment strategy is not dependent on the Reference indicator; therefore, the sub-fund's holdings and the weightings may substantially deviate from the composition of the Reference indicator. There is no limit set on the level of such deviation.

INTENDED RETAIL INVESTOR

This sub-fund is intended for private and institutional investors wishing to diversify their investments while benefiting from market opportunities through reactive asset management over a recommended investment period of more than 5 years, due to the sub-fund's exposure to the equity market.

The appropriate amount to invest in this fund depends on the personal situation of the investor, their knowledge of investment products and experience, their personal wealth, their cash requirements now and in the future, and their degree of risk aversion.

OTHER INFORMATION

Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 18:00 CET/ CEST and are executed on the next business day using the previous day's NAV.

The Depositary of the sub-fund is BNP Paribas, Luxembourg branch.

This is an accumulation share.

The fund prospectus and latest key information document, as well as the latest annual report are available on the website www.carmignac.com, directly from the manufacturer or on the website www.fundinfo.com. Information on past performance for the last 10 years, where this data is available, and calculations of monthly past performance scenarios are available on the website www.carmignac.com.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator : the summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Risks to which the sub-fund may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC
- Liquidity risk: the markets in which the sub-fund participates may be subject to temporary illiquidity. These market distortions could have an impact on the pricing conditions under which the sub-fund may have to liquidate, initiate or modify its positions.

PERFORMANCE SCENARIOS

The unfavourable, moderate and favourable scenarios shown represent examples using the best and worst performance, as well as the average performance of the product over the last ten years. Markets may develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Recommended holding period:		5 years	
Example Investment:		10 000 EUR	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	1 470 EUR	1 580 EUR
	Average return each year	-85.30%	-30.86%
Unfavourable	What you might get back after costs	7 630 EUR	11 180 EUR
	Average return each year	-23.70%	2.26%
Moderate	What you might get back after costs	11 230 EUR	17 020 EUR
	Average return each year	12.30%	11.22%
Favourable	What you might get back after costs	14 390 EUR	21 900 EUR
	Average return each year	43.90%	16.97%

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The figures shown include all costs of the product itself, but not necessarily all charges due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

- The unfavourable scenario occurred for an investment between December 2021 and July 2024.
- The moderate scenario occurred for an investment between April 2018 and April 2023.
- The favourable scenario occurred for an investment between October 2016 and October 2021.

WHAT HAPPENS IF CARMIGNAC GESTION LUXEMBOURG IS UNABLE TO PAY OUT?

For your protection, the assets of the fund are held with a separate entity, the custodian, so that the fund's ability to pay would not be affected by the insolvency of the management company. In the event of failure of the latter, the assets of the product held by the depository will not be affected. In the event of default by the depository, the risk of financial loss of the product is mitigated due to the legal segregation of the assets of the depository from those of the product.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that these costs will have on your investment.

Cost over time

The amounts shown here are the cumulative costs of the product itself, for two different holding periods. They include potential early exit penalties. The figures assume you invest 10 000,00 EUR. The figures are estimates and may change in the future.

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

	If you exit after 1 year	If you exit after 5 years
Total costs	149 EUR	1 307 EUR
Annual cost impact (*)	1.5%	1.7% each year

The length of the recommended holding period is 5 years.

If the sub-fund is denominated in a currency other than the applicable currency of the legal tender of the Member State where the PRIIP is being marketed, the return the retail investor gets, when expressed in the currency of the Member State where the PRIIP is being marketed, may change depending on currency fluctuations.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The summary risk indicator shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class.

*This table illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12,9% before costs and 11,2% after costs."

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
