What is this product?

Type

This product is a share of an investment company qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term

This sub-fund has no maturity date. However, the board of directors may decide to close the sub-fund under certain circumstances.

Objectives

Seeking medium/long-term capital growth through a diversified and sustainable portfolio incorporating environmental, social and governance (ESG) criteria with long exposure to equities. The focus of ESG criteria will mainly be on aspects of the energy transition and the reduction of carbon emissions. The adjacent objective is thus to contribute to promoting global climate stabilisation.

The sub-fund mainly invests, without sector restrictions, in shares of companies. The sub-fund predominantly invests in companies which are or should be able to benefit from seeking solutions in the context of the energy transition and reduction of carbon emissions.

The proportion of the sub-fund's net asset value invested in the equities market and in equity securities in the capital of any company is at least 51%.

The sub-fund may invest up to 10% of its net assets in units of UCITS or other UCIs.

The manager may use derivatives to hedge or optimise the portfolio's exposure. Furthermore, the sub-fund may hold cash on an ancillary basis.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Intended retail investor

The sub-fund is suitable for all types of investors with a medium-term investment horizon and at least basic knowledge of financial instruments that can withstand potential losses.

Other information

Depository: Banque de Luxembourg

Dividend income: This class is a capitalisation class meaning that income is reinvested.

Conversion right: The investor has the right to convert his investment in shares in one sub-fund for shares in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

Segregation: The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

Additional information: Additional information about the fund, copies of its prospectus, the latest annual and semi-annual report and the latest prices of shares may be obtained free of charge from the management company or on www.ram-ai.com. The prospectus and the periodic reports are prepared for the entire fund and are available in French. The management company may inform you about other languages in which these documents are available.

This sub-fund was launched in 2020 and this share class in 2020.

The currency of the share class is expressed in USD.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Other risk factors might exist.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Recommended holding period: 7 years

Example investment: 10.000 USD

		If you exit after 1 year	If you exit after 7 years (recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	2.170 USD	1.680 USD
	Average return each year	-78,3 %	-22,5 %
Unfavourable	What you might get back after costs	8.230 USD	9.850 USD
	Average return each year	-17,7 %	-0,2 %
Moderate	What you might get back after costs	10.960 USD	18.320 USD
	Average return each year	9,6 %	9,0 %
Favourable	What you might get back after costs	13.560 USD	21.510 USD
	Average return each year	35,6 %	11,6 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 12 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment between December 2021 and April 2024, by referring to a reference class.

Moderate scenario: This type of scenario occurred for an investment between March 2017 and March 2024, by referring to a benchmark and to a reference class.

Favourable scenario: This type of scenario occurred for an investment between December 2012 and December 2019, by referring to a benchmark.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Mediobanca Management Company S.A. is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10.000 USD is invested

	If you exit after 1 year	If you exit after 7 years
Total costs	169 USD	2.079 USD
Annual cost impact (*)	1,7 %	1,7 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10,7% before costs and 9,0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
