You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

J O Hambro Capital Management Asia ex-Japan Fund (the "Fund") is a sub-fund of Perpetual Investment Services Europe ICAV, incorporated in Ireland.

Term

The term of the Fund is unlimited with no maturity date. The Manager may not unilaterally terminate the Fund, however, the Fund may be terminated in line with the termination provisions contained in its constitutional documents.

Objectives

The Fund's investment objective is to achieve long-term capital growth. The Fund will invest in the equity securities of companies domiciled or exercising the predominant part of their economic activities in Asia ex-Japan. The Fund mainly looks to invest in companies which have been successful and which can sustainably grow over economic and liquidity cycles. The Fund may hold up to 25% of its assets in cash or cash equivalents should the fund manager consider it prudent over any time period.

The Fund promotes environmental and social characteristics throughout the investment decision making process.

The Fund is actively managed with the fund managers using their expertise to pick investments to achieve the Fund's objective.

The Fund's performance may be measured against the MSCI AC Asia ex Japan NR Index (net dividends reinvested) (the "Index"). The Index is used as a target benchmark for the Fund as the Performance Fee for the Fund is payable when the performance of the Fund exceeds that of the Index. The use of the Index does not limit the investment decisions of the fund manager

so the shareholdings of the Fund may differ significantly from those of the Index.

Any income the Fund generates for this share class will be reinvested annually to grow the value of your investment unless you elect for a cash dividend.

Intended retail investor

The Fund is intended for investors seeking medium to long-term capital growth. Typically, investors should have a minimum time horizon of 3 to 5 years. Investors should understand the Fund's risks and that it is designed to be used as one component of a diversified investment portfolio. This Fund is not appropriate for investors who cannot afford capital loss of their investment or need a fully guaranteed income or fully predictable return profile.

Other information

Depository: Northern Trust Fiduciary Services (Ireland) Limited.

The assets and liabilities of the Fund are segregated from other sub-funds of the ICAV but other jurisdictions may not recognise such segregation.

This Key Information Document is prepared for one share class in a sub-fund of the ICAV. The Prospectus and annual and semi-annual reports are prepared for the entire ICAV and are available in English and free of charge at www.johcm.com. The share price and information on other share classes of the Fund, other sub-funds of the ICAV and how to switch are available at www.johcm.com.

Further information is available from the Administrator, Northern Trust International Fund Administration Services (Ireland) Limited, George's Court, 54-62 Townsend Street, Dublin 2, Ireland.

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of the product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified the product as 4 out of 7 which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for full details about other risks materially relevant to the product that are not included in the summary risk indicator.

The product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		£10000	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment.		
Stress	What you might get back after costs	£3540	£3360
	Average return each year	-64.60%	-19.60%
Unfavourable	What you might get back after costs	£7260	£7270
	Average return each year	-27.40%	-6.18%
Moderate	What you might get back after costs	£10160	£13220

Favourable	What you might get back after costs	£14610	£18350
	Average return each year	46.10%	12.91%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between 2021 and 2023.

Moderate scenario: This type of scenario occurred for an investment between 2013 and 2018.

Favourable scenario: This type of scenario occurred for an investment between 2016 and 2021.

What happens if Perpetual Investment Services Europe Limited is unable to pay out?

If the product is not able to pay out what you are owed, you are not covered by any investor compensation or guarantee scheme and you may face financial loss.

The assets of the Fund are held in safekeeping by its depository. In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the depository will not be affected. However, in the event of the depository's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. This risk is mitigated to a certain extent by the fact the depository is required by law and regulation to segregate its own assets from the assets of the Fund. The depository will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure to properly fulfil its obligations (subject to certain limitations). There is no compensation or guarantee scheme protecting you from a default of the Fund's depository.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10,000.00 per year is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	£770	£2531
Annual cost impact (*)	7.7%	3.8% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.4% before costs and 5.6% after costs.

Composition of Costs
