Term

There is no fixed maturity date. An investor can hold their investment for any time period but minimum 5 year(s) is recommended. The Manufacturer can close the fund with notice.

Objectives

The objective is to achieve an increase in the value of your investment over the medium to long term with a balanced risk profile. The Fund seeks to achieve this by gaining exposure to a mix of traditional and alternative assets such as equities (including developing and smaller company markets, and bonds (which are similar to a loan and pay a fixed or variable interest rate) as well as indirect investment in property and commodities. This will be accomplished mainly through a combination of investment in cash, Exchange Traded Funds, financial derivatives (Derivatives are sophisticated investment instruments linked to the rise and fall of the value of other assets), listed certificates issued by banks, as well as swap contracts, currency and third party collective investments similar in structure to this Fund. The effect that changes in currency exchange rates may have on your investment can be reduced through the purchase currency forward contracts. This is known as a 'Hedge'. The Hedge reduces the effect of both positive and negative changes in exchange rates. The Fund may also purchase liquid assets (cash, government and corporate bonds and other monetary instruments). The Fund is actively managed and intends to target a return of European Short-Term Rate +4% over a rolling 3-year period, which provides a suitable comparator benchmark against which Fund performance will be measured and evaluated over time. The fund manager has discretion to select investments with weightings different to the index, and that are not in the index, and the Fund may display significant divergence from the index. There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

Any income the Fund generates will be paid to you, unless you have chosen to have it reinvested.

You can buy or sell shares in the Fund on any day which is a business day in Luxembourg unless the directors have decided that insufficient markets are open. You can find more detail on the investment objective and policy of the Fund in the prospectus. For more information on investment terms used in this document, please see the Glossary available at www.columbiathreadneedle.com.

Intended retail investor

This fund is aimed at Retail and Professional customers and Eligible Counterparties who should have at least a basic level of knowledge and experience of investing in funds. It is designed for investors looking for capital growth who can invest their money for at least 5 years. Your capital is not guaranteed which means that investors could lose up to 100% of the amount invested. The fund invests directly and through derivatives in a mix of company shares, bonds and alternative assets such as property and commodities.

What are the risks and what could I get in return?

RISK INDICATOR

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a low-medium risk class.

This rates the potential losses from future performance at a low-medium level, and poor market conditions are unlikely to impact our capacity to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between 03/2015 to 03/2020

Moderate scenario: This type of scenario occurred for an investment between 02/2017 to 02/2022

Favourable scenario: This type of scenario occurred for an investment between 07/2016 to 07/2021

Investment EUR 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (Recommended Holding Period)

What happens if Columbia Threadneedle Management Limited is unable to pay out?

In case of default of the Manufacturer, the investor may face a financial loss. That loss would not be covered by an investor compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

Investment EUR 10,000	if you exit in after 1 year	if you exit in after 5 years (Recommended Holding Period)
Total costs	92.00 EUR	509.00 EUR
Annual Cost impact*	0.92%	0.94%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 1.62% before costs and 0.68% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you.
