What is this product?

Type

The product is a share of the sub-fund "Bonds CHF" which is part of the AXA IM Swiss Fund, an umbrella fund governed by Swiss law of the "Other Funds for Traditional Investments" type.

Term

This product has no maturity date.

Objectives

Investment Objective

The investment objective of the sub-fund is to achieve a high and regular income from the point of view of capital security. The sub-fund aims to achieve a consistently higher ESG rating than that of the benchmark.

The Swiss Bond Index SBI Total AAA-BBB is used as a benchmark.

Investment Policy

The sub-fund invests primarily in CHF bonds of domestic and foreign debtors in the investment grade segment (investments with a minimum rating of BBB- according to S&P or Baa3 according to Moody's). The sustainable investment approach applied to this sub-fund includes ESG integration based on the AXA IM Scoring Framework, subject to binding application of sectoral exclusion and AXA IM ESG standards, through active duration and yield curve management, as well as sector over- or under-weighting versus the reference index.

The sustainable investment approach applied to this sub-fund includes ESG integration based on the AXA IM Scoring Framework at all times. This guideline is available at www.axa-im.com/our-policies-and-reports.

Derivatives may be used for hedging purposes and for efficient portfolio

management. Exchange-traded standardised interest futures on bonds issued by the Swiss Confederation and the Federal Republic of Germany (the latter with an upper limit of 30% of the sub-fund's assets) are used as a priority.

Distribution policy

Income is distributed within four months of the financial year-end.

Investment Horizon

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 3 years.

Processing of subscription and redemption orders

Subscriptions and redemptions are accepted on any bank working day. Subscription and redemption orders received by the custodian no later than 1:30 p.m. on a bank working day (order date) are processed on the next bank working day (valuation day) based on the net asset value calculated on that day (forward pricing).

Intended retail Investor

The sub-fund is designed for retail investors who have neither financial expertise nor any specific knowledge to understand the fund but nevertheless may bear total capital loss. It is suitable for clients who seek growth of and income from capital and ESG. Potential investors should have an investment horizon of at least 3 years.

Depositary

State Street Bank International GmbH, Munich, Zurich Branch.

What are the risks and what could I get in return?

Risk Indicator

We have classified this product as 2 out of 7 which is the a low risk class. This rates the potential losses from future performance at a low level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. Other risks not included in the Summary Risk Indicator may be materially relevant, such as risks associated with derivatives or counterparty risk. For further information, please refer to the prospectus.

This product does not provide any protection against future market developments, so you could lose all or part of the capital invested.

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The Summary Risk Indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The pessimistic, intermediate and optimistic scenarios presented here are illustrations that use the worst, average and best performance of the product and the appropriate benchmark over the last 10 years. The markets may perform very differently in the future.

Recommended holding period:	3 years		
Example Investment:	10 000 CHF		
	If you exit after 1 year	If you exit after 3 years	
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	7 320 CHF	7 490 CHF
	Average return each year	-26.80%	-9.18%
Unfavourable	What you might get back after costs	8 210 CHF	7 960 CHF

What happens if AXA Investment Managers Schweiz AG is unable to pay out?

The product is constituted as a separate entity from AXA Investment Managers Schweiz AG. In case of default of AXA Investment Managers Schweiz AG, the assets of the product kept by the custodian will not be affected. In case of default of the custodian, the risk of financial loss of the product is mitigated because of the legal segregation of the assets of the custodian from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- CHF 10 000 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	707 CHF	744 CHF
Annual cost impact (*)	7.1%	2.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.57 % before costs and -1.97 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
