What is this product?

Type

The fund is a compartment of MFS Meridian® Funds established in Luxembourg as an investment company with variable capital (Société d'Investissement à Capital Variable or "SICAV"). The assets of each compartment are segregated by law. The fund qualifies as an Undertaking for Collective Investment in Transferable Securities (a UCITS fund). As an investment fund, the return of the fund depends on the performance of its underlying assets.

Term

The fund has no fixed maturity date. However, the fund may be liquidated following notice to investors and subject to other conditions as described in the fund's Prospectus. The recommended holding period of the fund is 5 years.

You may request to redeem or exchange your shares on any business day of the MFS Meridian Funds (please see the fund's Prospectus). Information about other classes of the fund available in your country is available at meridian.mfs.com or from your financial intermediary.

Objectives

The fund's objective is capital appreciation, measured in euros.

The fund invests primarily (at least 70%) in European equity securities. Some of the countries in Europe, primarily those in Eastern Europe, are currently considered emerging market economies. The fund generally focuses its investments in larger companies. The fund may use derivatives for hedging and/or investment purposes but will not extensively or primarily use derivatives to achieve the fund's investment objective. The Investment Manager uses a bottom-up approach to buying and selling individual investments for the fund. Investments are selected primarily based on blending fundamental and quantitative research to create a blended rating for an issuer. The fund will promote an environmental characteristic under Article 8 of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") (see the fund's Prospectus and website for more information). The Investment Manager may also consider environmental, social and governance (ESG) factors in its fundamental analysis alongside other factors. The Investment Manager then constructs the portfolio using a portfolio optimization

process that considers the blended rating, as well as issuer, industry, and sector weightings, market capitalization, measures of expected volatility of the fund's returns and other factors, with a goal of constructing a portfolio with a target predicted tracking error of approximately 2% compared to the MSCI Europe Index (net div). Tracking error measures how the differences between fund and benchmark returns vary over time. The Investment Manager has the discretion to adjust the inputs and parameters for the optimization process and the fund's portfolio holdings.

For information about the fund's risks, please see the fund's Prospectus.

Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the benchmark to take advantage of attractive investment opportunities.

Distributions. Income will not be distributed to shareholders but reflected in the assets of the fund.

Depository. The fund's depository is State Street Bank International GmbH, Luxembourg Branch.

Intended Retail Investor

The fund is intended as a long term investment for investors who have the ability to bear fluctuations in the value of their investment, including in extraordinary market conditions, the total loss of their investment. The fund is available for investors with basic knowledge of financial instruments and limited or no previous experience investing in pooled investment products. Notwithstanding the above, investment decisions should be based on each investor's specific risk profile and investment portfolio.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years.

The fund has no required minimum holding period. You may request, on any business day of the fund, to redeem your shares in the currency in which the purchase was made at their net asset value. Please see the fund's Prospectus for more information. Due to potential volatility of returns, you should be prepared to stay invested for at least 5 years.
