Competent Authority

The Commission de Surveillance du Secteur Financier ("CSSF") is responsible for supervising MFS Investment Management Company (Lux) S.à r.l in relation to this Key Information Document. This PRIIP is authorised in Luxembourg. MFS Investment Management Company (Lux) S.à r.l is authorised in Luxembourg and regulated by the CSSF.

This document was prepared on 5 November 2024.

What is this product?

Type

The fund is a compartment of MFS Meridian® Funds established in Luxembourg as an investment company with variable capital (Société d'Investissement à Capital Variable or "SICAV"). The assets of each compartment are segregated by law. The fund qualifies as an Undertaking for Collective Investment in Transferable Securities (a UCITS fund). As an investment fund, the return of the fund depends on the performance of its underlying assets.

Term

The fund has no fixed maturity date. However, the fund may be liquidated following notice to investors and subject to other conditions as described in the fund's Prospectus. The recommended holding period of the fund is 5 years.

You may request to redeem or exchange your shares on any business day of the MFS Meridian Funds (please see the fund's Prospectus). Information about other classes of the fund available in your country is available at meridian.mfs.com or from your financial intermediary.

Objectives

The fund's objective is capital appreciation, measured in U.S. dollars. The Investment Manager normally invests the fund's assets in different asset classes, including allocations to equity securities and to debt instruments and cash-equivalents (bank deposits, money market instruments, units of money market funds and reverse repurchase transactions), based on its view of the relative value of different types of securities and/or market conditions. The Investment Manager expects the fund's allocations to asset classes will normally fall within the following ranges: 50% to 90% in equity securities and 10% to 50% in debt instruments and cash-equivalents. However, the fund may invest outside these ranges and exposure to these asset classes may vary significantly from time to time. The Investment Manager seeks to reduce the volatility of the fund's returns relative to the MSCI World Index. For its equity investments, the fund may invest in issuers located in developed and emerging market countries. The fund generally focuses equity investments in larger companies. The fund normally invests debt investments in corporate debt instruments and U.S. government securities, but may also invest in non-U.S. government securities and securitized instruments of developed and emerging market issuers. The fund's debt investments may also include exchange-traded commodity instruments ("ETCs"). The fund may invest without limit in below-investment-grade issuers and may invest a relatively large percentage in a small number of issuers. The fund may invest its debt investments without limit in short-term government securities and cash-equivalents. The fund will promote an environmental characteristic under Article 8 of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial

sector ("SFDR") (see the fund's Prospectus and website for more information). The Investment Manager may also consider environmental, social and governance (ESG) factors in its fundamental analysis alongside other factors. The fund may use derivatives for hedging and/or investment purposes but will not extensively or primarily use derivatives to achieve the fund's investment objective.

For information about the fund's risks, please see the fund's Prospectus.

The fund's benchmarks, MSCI World Index and ICE BofA Merrill Lynch 0-3 Month U.S. Treasury Bill Index, have been designated for performance (and volatility) comparison only. Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the benchmark to take advantage of attractive investment opportunities. The fund is actively managed within its objectives and the investment strategy will not restrict the extent to which portfolio holdings may deviate from the benchmark. It is expected that the fund's deviation from the benchmark will be significant.

Currency Hedging. MFS will generally enter into currency hedging transactions for this class with the aim to reduce exchange rate and return fluctuations between the class and U.S. dollars, the base currency class of the fund.

Distributions. Income will not be distributed to shareholders but reflected in the assets of the fund.

Depository. The fund's depository is State Street Bank International GmbH, Luxembourg Branch.

Intended Retail Investor

The fund is intended as a long term investment for investors who have the ability to bear fluctuations in the value of their investment, including in extraordinary market conditions, the total loss of their investment. The fund is available for investors with basic knowledge of financial instruments and limited or no previous experience investing in pooled investment products. Notwithstanding the above, investment decisions should be based on each investor's specific risk profile and investment portfolio.

Additional Information. Copies of the fund's Prospectus and the annual and half-yearly reports of the fund are available in English free of charge from the MFS Meridian Funds, c/o State Street Bank International GmbH, Luxembourg Branch, 49, Avenue J.F. Kennedy, L-1855 Luxembourg, Grand-Duchy of Luxembourg, or at meridian.mfs.com. Other information about the fund, including share prices, is also available at meridian.mfs.com.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

 The risk indicator assumes you keep the fund for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this Product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. **Be aware of currency risk if your reference currency differs from the base currency of the fund as the final return you receive depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown.**

The hedging strategy for the Hedged Classes will not completely eliminate the exposure to currency movements.

The rating does not reflect factors such as liquidity, counterparty, and operational risk, which can also affect the fund's returns.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.** The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Example Investment EUR 10,000 Recommended Holding Period: 5 Years		IF YOU EXIT AFTER 1 YEAR	IF YOU EXIT AFTER 5 YEARS
Scenarios			
Minimum	There is no minimum guarantee. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs	7,020 EUR	5,810 EUR
	Average return each year	-29.8%	-10.3%
Unfavourable scenario*	What you might get back after costs	7,770 EUR	9,380 EUR
	Average return each year	-22.3%	-1.3%
Moderate scenario*	What you might get back after costs	10,420 EUR	11,180 EUR
	Average return each year	4.2%	2.3%
Favourable scenario*	What you might get back after costs	11,660 EUR	12,980 EUR
	Average return each year	16.6%	5.4%

* The scenario occurred for an investment (in reference to MSCI World Index (net div) and ICE BofA 0-3 Month U.S. Treasury Bill Index) between September 2021 and August 2024 for the unfavourable scenario, between March 2015 and February 2020 for the moderate scenario and between September 2014 and August 2019 for the favourable scenario.

What happens if MFS Investment Management Company (Lux) S.à r.l. is unable to pay out?

The assets of the fund and of the Product Manufacturer are segregated, so the default of the Product Manufacturer should not result in a financial loss to the fund's shareholders. With respect to the Depositary responsible for the safekeeping of the assets of the fund, there is a potential default risk if the assets of the fund held with the Depositary are lost. However, this default risk is limited due to the rules set out in applicable law which require a segregation of assets between those of the Depositary and the fund. The Depositary is liable to the fund and to the investors of the fund for the loss of a financial instrument held in custody unless the Depositary is able to prove that the loss has arisen as a result of an external event beyond its reasonable control. For all other losses, the Depositary is liable in case of its negligent or intentional failure to properly fulfil its obligations pursuant to applicable law. There is no investor compensation or guarantee scheme in the case of insolvency of the Depositary provided by law.

What are the costs?

The person advising on or selling you this product (including through an insurance or capitalization contract, if applicable) may charge you other costs that are not taken into account in this document. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment EUR 10,000	IF YOU EXIT AFTER 1 YEAR	IF YOU EXIT AFTER 5 YEARS
Total Costs	790 EUR	1,600 EUR
Annual cost impact*	8.0%	3.3% per year

*This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 5.6% before costs and 2.3% after costs.

Composition of costs

One off costs upon entry or exit		If you exit after 1 year
Entry costs	Up to 6.00% of the amount you pay in when entering this investment.	600 EUR
Exit costs	0.00% of your investment before it is paid out to you if you redeem in less than one year.	0 EUR
Ongoing costs taken each year		
Portfolio transaction costs	0.09% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	8 EUR
Management fees and other administrative operating costs*	1.94% The impact of the costs that we take each year for managing your investments.	182 EUR
Incidental costs		
Performance fees	There is no performance fee for this product.	N/A
Carried interests	There are no carried interests for this product.	N/A

*The other ongoing costs figure shown here is based on annualised expenses for the six-month period ended 31 July 2023. Other ongoing costs may vary from year to year. For more information about the fund's expenses, please see "Fund Profiles" section in the Prospectus, which is available at meridian.mfs.com.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years.

The fund has no required minimum holding period. You may request, on any business day of the fund, to redeem your shares in the currency in which the purchase was made at their net asset value. Please see the fund's Prospectus for more information. Due to potential volatility of returns, you should be prepared to stay invested for at least 5 years. However, we believe holding investments over a full market cycle provides the best opportunity for investors to realize the value of the active investment approach utilized in the management of the fund.

How can I complain?

Any complaint regarding the person advising on or selling the fund should be addressed to that Financial Intermediary.

For complaints concerning the Product Manufacturer or about the fund itself, you may contact us free of charge at +352-46-40-10-600 to log your complaint and learn what steps you need to take. Also, you may log your complaint via email to

MFSquerydesk@statestreet.com or send your complaint in writing to MFS Investment Management Company (Lux) S.à r.l, 4, rue Albert Borschette, L-1246, Luxembourg, Grand Duchy of Luxembourg. Please see "Information on MFS Complaint Handling Process" at meridian.mfs.com for further information.
