

## (B) Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you will get from this product depends on future market performance.**

**Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product / a suitable benchmark over the last 12 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if Credit Suisse Fund Management S.A. is unable to pay out?

The investor of this Product will not face financial loss due to the default of Credit Suisse Fund Management S.A., as the Sub-fund is considered to be a separate entity with segregated assets.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

	<b>If you exit after 1 year</b>	<b>If you exit after 7 years</b> (Recommended holding period)
<b>Total costs</b>	EUR 678	EUR 1,933
<b>Annual cost impact (*)</b>	6.8%	2.6%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.0% before costs and 10.4% after costs.

## Composition of costs
