This document was prepared on 3 July 2024.

**You are about to purchase a Product that is not simple and may be difficult to understand.**

## What is the product?

**Type:** This Product is a common fund qualifying as an 'other fund for traditional investments' in accordance with the Swiss Federal Act on Collective Investment Schemes.

**Term:** This Product has no maturity date. The Sub-fund has been established for an indefinite period of time. The Management Company is entitled to liquidate, merge or reposition the Product at any time unilaterally in case the Product can no longer be managed in the interest of the investors. The amount the investor will receive upon early termination may be less than the amount invested.

**Objectives:** The Sub-fund is actively managed. The investment objective is primarily to generate long-term capital growth by investing in an equity portfolio with a focus on Japanese companies. In this context, "Japanese companies" are deemed to include companies headquartered in Japan and companies headquartered in other countries which conduct their business activities mainly in Japan. As an alternative to direct investments, investments can also be made in derivative instruments which are directly or indirectly based on equities. The Sub-fund invests in equities and similar instruments (shares, dividend-right certificates, participation certificates, etc.), convertible and warrant bonds, index certificates and index baskets, and other derivative financial instruments. Investments in liquid money market instruments as well as demand or time deposits with banks are also permitted. Credit up to a maximum of 25% of the net assets may be taken out for both investment purposes and for paying out redemptions from the Sub-fund. The Sub-fund carries out distributions of income on a regular basis. Investors can subscribe or redeem units of the Sub-fund on every Swiss banking day. Recommendation: This collective investment scheme may not be suitable for investors who would like to withdraw their funds from the collective investment scheme within a period of less than 3 to 5 years. Investors are able to accept stronger fluctuations and a longer-term setback of the inventory value of the Sub-fund. The Sub-fund will bear the costs of standard brokerage and bank fees on securities transactions for the portfolio. The minimum investment in this unit class is EUR 15,000. The unit of account is the Euro and therefore differs from the unit of account of the Sub-fund. The net asset value of this unit class is hedged in the best possible way in each case against the unit of account and, where economically reasonable. Full hedging cannot be guaranteed.

**Intended Retail Investor:** This Product is intended for professional and institutional investors, as well as sophisticated retail investors with sufficient knowledge and experience in collective investment schemes and similar products, an ability to bear an average investment loss, and a long-term investment horizon.

## What are the risks and what could I get in return?

### (A) Summary Risk Indicator

**The risk indicator assumes you keep the Product for 7 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less.**

The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. We have classified this Product as 4 out of 7, which is a medium risk class and poor market conditions could impact our capacity to pay you. **Be aware of currency risk** if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

## (B) Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you will get from this product depends on future market performance.**

**Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product / a suitable benchmark over the last 12 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

| <b>Recommended holding period:</b>                                                                            |                                                                        | <b>7 years</b>                  |                                                                  |

## What happens if UBS Fund Management (Switzerland) AG is unable to pay out?

The investor of this Product will not face financial loss due to the default of UBS Fund Management (Switzerland) AG, as the Sub-fund is considered to be a separate entity with segregated assets.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

|                               | <b>If you exit after 1 year</b> | <b>If you exit after 7 years</b><br>(Recommended holding period) |
|-------------------------------|---------------------------------|------------------------------------------------------------------|
| <b>Total costs</b>            | EUR 1,000                       | EUR 3,080                                                        |
| <b>Annual cost impact (*)</b> | 10.0%                           | 3.9%                                                             |

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.0% before costs and 6.1% after costs.

## Composition of costs

| One-off costs upon entry or exit                                   |                                                                                                                                                                                                                              | If you exit after 1 year |
|--------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| <b>Entry costs</b>                                                 | 5.0% of the value of your investment when entering.                                                                                                                                                                          | EUR 500                  |
| <b>Exit costs</b>                                                  | 2.0% of the value of your investment before it is paid out to you.                                                                                                                                                           | EUR 204                  |
| Ongoing costs taken each year                                      |                                                                                                                                                                                                                              |                          |
| <b>Management fees and other administrative or operating costs</b> | 1.8% of the value of your investment per year.                                                                                                                                                                               | EUR 178                  |
| <b>Transaction costs</b>                                           | 0.2% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | EUR 21                   |
| Incidental costs taken under specific conditions                   |                                                                                                                                                                                                                              |                          |
| <b>Performance fees</b>                                            | 1.0% The actual amount will vary depending on how well your investment performs. The aggregated cost estimation includes the average over the last 5 years.                                                                  | EUR 97                   |

## How long should I hold it and can I take money out early?

### Recommended holding period: 7 years

The recommended holding period is calculated based on the Summary Risk Indicator presented above. According to the investment objective as described above, the Product is designed for long-term investment. The Product is an open-ended Product. The investor can sell their investment on a daily (on business days) basis. Redemption fees will be charged at the level of the Product.

## How can I complain?

Any complaint regarding the person advising on, or selling the Product can be submitted directly to that person or bank. Any complaint regarding the Product or this document can be submitted in writing under the following address: Hérens Quality Asset Management AG, Bahnhofstrasse 3, 8808 Pfäffikon. Investors shall note that a complaint can be also addressed by e-mail to [info@hqam.ch](mailto:info@hqam.ch) or visit website: <https://hqam.ch>.
