What is the product?

Type: This Product is an investment company qualifying as UCITS Sub-fund in accordance with the UCITS law.

Term: This Product has no maturity date. The Sub-fund has been established for an indefinite period of time. The Board of Directors of the Investment Company is entitled to liquidate, merge or reposition the Product at any time unilaterally in case the Product can no longer be managed in the interest of the investors. The amount the investor will receive upon early termination may be less than the amount invested.

Objectives: This Sub-fund aims to outperform the return of the Bloomberg Multiverse Index (EUR hedged) benchmark. The Sub-fund is actively managed. The benchmark has been selected because it is representative of the investment universe of the Sub-fund and it is therefore an appropriate performance comparator. The majority of the Sub-fund's exposure to bonds will not necessarily be components of or have weightings derived from the benchmark. The Investment Manager will use its discretion to significantly deviate the weighting of certain components of the benchmark and to significantly invest in bonds not included in the benchmark in order to take advantage of specific investment opportunities. It is thus expected that the performance of the Sub-fund will significantly deviate from the benchmark. The Sub-fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Article 8 of Regulation (EU) 2019/2088) through a combination of exclusions, ESG integration and active ownership. The most material ESG factors are combined with traditional financial analysis to calculate an ESG integrated credit rating, which serves as the basis for a bottom-up security selection process. The Sub-fund invests at least two thirds of its assets in fixed-income instruments, bonds (including fixed rate bonds, zero-coupon bonds, inflation linked bonds, subordinated bonds, covered bonds, and perpetual bonds) and similar fixed interest or floating-rate securities (including floating rate notes and securities issued on a discount basis) issued by private, semi-private and public issuers from developed and emerging countries with a rating of at least "B-" by Standard & Poor's or "B3" by Moody's. The Sub-fund may use derivatives to achieve the above aims. The Sub-fund uses derivatives to reduce the impact of changes in currency exchange rates on the performance for this Share Class. The investor can buy or sell shares of the Sub-fund on a daily basis, as further defined in the prospectus. This Share Class makes regular distribution. The Sub-fund shall bear the costs of standard brokerage and bank charges incurred by the Sub-fund through securities transactions in relation to the portfolio.

Intended Retail Investor: This Product is intended for retail investors as well as institutional investors with sufficient knowledge and experience in collective investment schemes and similar products, an ability to bear a minor investment loss, and a long-term investment horizon.

What are the risks and what could I get in return?

(A) Summary Risk Indicator

The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less.

The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. We have classified this Product as 2 out of 7, which is a low risk class and poor market conditions are very unlikely to impact our capacity to pay you. **Be aware of currency risk** if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

(B) Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you will get from this product depends on future market performance.**

Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period:		5 years	
Example Investment:		EUR 10,000

What happens if Credit Suisse Fund Management S.A. is unable to pay out?

The investor of this Product will not face financial loss due to the default of Credit Suisse Fund Management S.A., as the Sub-fund is considered to be a separate entity with segregated assets.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

	If you exit after 1 year	If you exit after 5 years (Recommended holding period)
Total costs	EUR 607	EUR 1,071
Annual cost impact (*)	6.1%	2.1%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.9% before costs and 0.8% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.0% of the value of your investment when entering.	EUR 500
Exit costs	0.0% of the value of your investment before it is paid out to you.	EUR 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.9% of the value of your investment per year.	EUR 90
Transaction costs	0.2% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	EUR 17
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	n/a

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The recommended holding period is calculated based on the Summary Risk Indicator presented above. According to the investment objective as described above, the Product is designed for long-term investment. The Product is an open-ended Product. The investor can sell their investment on a daily (on business days) basis. No redemption fees or penalties will be charged at the level of the Product.
