What is the product?

Type: This Product is an investment company qualifying as UCITS Sub-fund in accordance with the UCITS law.

Term: This Product has no maturity date. The Sub-fund has been established for an indefinite period of time. The Board of Directors of the Investment Company is entitled to liquidate, merge or reposition the Product at any time unilaterally in case the Product can no longer be managed in the interest of the investors. The amount the investor will receive upon early termination may be less than the amount invested.

Objectives: The Sub-fund invests in fixed income securities (including fixed rate bonds, zero-coupon bonds, government bonds, semi-government bonds, corporate bonds, inflation-indexed debt securities, bonds of emerging market issuers, bonds of supranational organizations, high-interest and convertible bonds and notes, zero-coupon bonds, subordinated bonds, covered bonds, perpetual bonds and collateralized debt obligations) but also in floating rate notes which have a credit rating between AAA and D (Standard & Poor`s) or Aaa and C (Moody`s). The Sub-fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Article 8 of Regulation (EU) 2019/2088) through a combination of exclusions, ESG integration and active ownership. The most material ESG factors are combined with traditional financial analysis to calculate an ESG integrated credit rating, which serves as the basis for a bottom-up security selection process. The strategy of sector rotation is being used for the sake of anticipating economic recovery and contractions in different sectors of the economy, as the global economy moves in cycles. This Sub-fund aims to outperform the return of the benchmarks depending on the reference currency of the relevant share class as follows: CHF: SARON + 1.00% p.a., EUR: ESTR + 1.00% p.a., USD: SOFR + 1.00% p.a. The Sub-fund is actively managed. The benchmark is used as a reference point for determining the long term target performance that the Sub-fund intends to achieve whatever the market conditions are. It is thus expected that the performance of the Sub-fund will to a significant extent deviate from the benchmark. There are however market conditions that may result in the performance of the Sub-fund being closer to the performance of the benchmark or, on the contrary, significantly different from the performance of the benchmark. The Sub-fund applies a diversified long-short strategy entailing the use of derivatives such as futures, swaps, options and credit derivatives. The Sub-fund may use derivatives to achieve the above aims. The investor can sell shares of the Sub-fund on a daily basis, as further defined in the prospectus. This Share Class makes regular distribution. The Sub-fund shall bear the costs of standard brokerage and bank charges incurred by the Sub-fund through securities transactions in relation to the portfolio.

Intended Retail Investor: This Product is intended for retail investors as well as institutional investors with sufficient knowledge and experience in collective investment schemes and similar products, an ability to bear a minor investment loss, and a long-term investment horizon.

What are the risks and what could I get in return?

(A) Summary Risk Indicator

1	2	3	4	5	6	7

Lower risk ← → Higher risk
The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less.

The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. We have classified this Product as 3 out of 7, which is a medium-low risk class and poor market conditions are unlikely to impact our capacity to pay you. **Be aware of currency risk** if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

(B) Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period:		5 years	
Example Investment:		USD 10,000

What happens if Credit Suisse Fund Management S.A. is unable to pay out?

The investor of this Product will not face financial loss due to the default of Credit Suisse Fund Management S.A., as the Sub-fund is considered to be a separate entity with segregated assets.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:
- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

	If you exit after 1 year	If you exit after 5 years (Recommended holding period)
Total costs	USD 596	USD 1,017
Annual cost impact (*)	6.0%	2.0%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.0% before costs and 1.0% after costs.
