What is the product?

Type: This Product is an investment company qualifying as UCITS Sub-fund in accordance with the UCITS law.

Term: This Product has no maturity date. The Sub-fund has been established for an indefinite period of time. The Board of Directors of the Investment Company is entitled to liquidate, merge or reposition the Product at any time unilaterally in case the Product can no longer be managed in the interest of the investors. The amount the investor will receive upon early termination may be less than the amount invested.

Objectives: This Equity Sub-fund is actively managed aiming to achieve long-term capital growth that is above the benchmark (Swiss Leaders Index (TR) in CHF) by investing mainly in equities and equity-type securities of companies listed on a Stock Exchange in Switzerland. While a large part of the investments of the Sub-fund will be components of the benchmark which will also have similar weights as the benchmark, the Sub-fund manager has discretion to invest in other securities not included in the benchmark. The Sub-fund does not track the benchmark precisely but tries to exceed its performance subject to an internally applied deviation limit and may therefore differ from it moderately— both positively and negatively. The Investment Manager will use its discretion to overweight or underweight certain components of the Benchmark. The Sub-fund may invest up to 1/3 of its net assets in investment grade fixed-income or floating rate securities denominated in CHF. It can use derivative instruments for investment purposes and for efficient portfolio management. The investor can buy or sell shares on a daily basis (Luxembourg bank business days). This Share Class does not make regular distributions. The Sub-fund shall bear the costs of standard brokerage and bank charges incurred by the Sub-fund through securities transactions in relation to the portfolio.

Intended Retail Investor: This Product is intended for retail investors with sufficient knowledge and experience in collective investment schemes and similar products, an ability to bear an average investment loss, and a long-term investment horizon.

What are the risks and what could I get in return?

(A) Summary Risk Indicator

The risk indicator assumes you keep the Product for 7 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less.

The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. We have classified this Product as 4 out of 7, which is a medium risk class and poor market conditions could impact our capacity to pay you. **Be aware of currency risk** if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

(B) Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you will get from this product depends on future market performance.**

Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product / a suitable benchmark over the last 12 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if MultiConcept Fund Management S.A. is unable to pay out?

The investor of this Product will not face financial loss due to the default of MultiConcept Fund Management S.A., as the Sub-fund is considered to be a separate entity with segregated assets.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- CHF 10,000 is invested

	If you exit after 1 year	If you exit after 7 years (Recommended holding period)
Total costs	CHF 413	CHF 1,826
Annual cost impact (*)	4.1%	2.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.7% before costs and 5.3% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	2.0% of the value of your investment when entering.	CHF 200
