What is this product?

Type

The Product is a unit of the Sub-fund Wellington Commodities Fund (the "Fund") which is part of the Wellington Management Funds (Luxembourg) II (the "Umbrella Fund"), an open-ended investment fund organized under the Luxembourg law of 13 February 2007 (2007 Law) on specialised investment funds, as amended from time to time, and qualifies as an alternative investment fund pursuant to the AIFM Law and the AIFMD. The Umbrella Fund is an unincorporated mutual investment fund (fonds commun de placement) of the umbrella type.

Term

The Umbrella Fund and the Fund do not have a fixed term or maturity period, but the Management Company, with the approval of the Depositary, is entitled to give notice of the Umbrella Fund's dissolution at any time. In the event that the Management Company considers that changes in the political, economic, military, regulatory or business environments, or reductions in the scale of a Fund's total net assets compromise the effective management of a Fund, then the Management Company is empowered to liquidate the Fund at any time.

Objectives

The Fund seeks to achieve long-term total returns (capital appreciation).

The Investment Manager will actively manage the Fund against the customized equal sector-weighted S&P Goldman Sachs Commodities Index, seeking to achieve the objective through the active management of commodities exposure through derivative instruments and commodity related ETFs. Exposures are based on proprietary top-down and bottom-up fundamental research.

The Fund will invest in commodity-related instruments and securities including commodity index and individual commodity derivatives as well as ETFs and equity securities that provide exposure to commodity prices. The Fund will not have net

short exposure to any single commodity (excluding any exposure gained through derivatives on indices which may be held for market exposure or hedging purposes). The Fund will have significant exposure to cash and/or investment grade fixed income securities for collateral purposes.

Derivatives will be used to hedge (manage) risk and/ or volatility and for investment purposes (such as gaining exposure to a security, to create leverage and/or a short position). Derivatives will form a significant part of the strategy and will impact performance.

This Share class will, via derivatives, seek to provide similar performance to the Fund in its base currency by limiting the impact of the movement of exchange rates between the currency of the Share class and the base currency of the Fund.

Income policy

Any income allocated to the Unit class from the Fund is reinvested.

Dealing Frequency

Units can be bought or sold weekly in accordance with the Offering Memorandum. The base currency of the Fund is USD.

Intended retail Investor

The Fund is intended for informed retail investors with a long-term investment horizon seeking capital appreciation and who are able to bear capital loss. An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Depositary

State Street Bank International GmbH Luxembourg Branch.

You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

We have classified this Fund as 4 out of 7 which is a medium risk class. This rates the potential losses from future performance at a medium level. Poor market conditions could affect the value of your investment.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Offering Memorandum for full details about any other risks materially relevant to the fund not included in the summary risk indicator such as liquidity, sustainability and operational risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What happens if Wellington Luxembourg S.à r.l. is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of the Management Company, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.
