#### Objectives:

The investment objective is to preserve the capital on a long-term basis and to generate an adequate return in AUD by investing in bonds worldwide. The securities are selected on a discretionary basis using a consistent investment process (active management). With regard to portfolio composition, the selection of stocks and the associated weightings are focused on companies from the Bloomberg Australian Aggregate 300mn TR Index Unhedged AUD. The portfolio composition may deviate considerably from this benchmark index. The investment policy is to outperform the benchmark index. The Asset Manager may at any time deviate – significantly or insignificantly, positively or negatively – from the benchmark index by actively overweighting or underweighting individual securities and sectors based on market conditions and risk assessments.

Fund units are issued and redeemed basically on every bank business day in Luxembourg.

Earnings and profits of the unit class are not distributed, but reinvested.

CACEIS Bank, Luxembourg Branch, 5, Allée Scheffer, L-2520 Luxembourg, was appointed as the custodian bank (depository).

If the holding period is shorter than the recommended holding period, this may have a negative impact on your investment's risk and reward profile.
