What is this product?

Type

This product is a UCITS sub-fund of a variable capital umbrella investment company with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended.

Subject to the conditions set down in the prospectus, shareholders may exchange all or part of their shares of this fund for shares of another fund of the company. Please refer to the section entitled "How To Exchange Shares" in the prospectus for further details.

Term

This product has no fixed term.

Objectives

The fund seeks to achieve a total return which exceeds the total return performance of the Standard & Poor's 500 Composite Stock Price Index ("S&P 500") (the "Index").

Investment Policy

The fund invests primarily in a range of derivatives in order to gain exposure to the returns of the S&P 500. These derivatives are supported by a wide range of short-term fixed income securities (which are similar to loans that pay a fixed or variable rate of interest) issued by companies or the US government. The fund seeks outperformance relative to the S&P 500 through obtaining a higher return on the fixed income portfolio than the transaction costs incurred in implementing the S&P 500 derivatives strategy. The fund may also invest directly into equity securities and

securities that are convertible into equity securities.

The fixed income component of the fund primarily invests in "investment grade" securities, as determined by international ratings agencies. Whilst potentially producing a lower level of income than "non-investment grade" securities, are also considered to be of lower risk. It may also invest up to 10% in "non-investment grade" securities. These are generally considered to be riskier investments but may pay a higher income.

The fund is considered to be actively managed in reference to the Index by virtue of the fact that the Index is used for calculating the global exposure of the fund using the relative VaR methodology and by virtue of the fact that it seeks to outperform the Index. Certain of the fund's securities may be components of and may have similar weightings to the Index. However, the Investment Advisor will use its discretion to invest in securities not included in the Index in order to take advantage of investment opportunities. The investment strategy does not restrict the extent to which the fund's holdings may deviate from the Index.

The fund will invest in derivative instruments (such as futures, options and swaps) in addition to or instead of directly in these securities in order to replicate the performance and exceed the total returns of the S&P 500. The derivative return is linked to movements in the underlying asset.

Dealing Day Shares in the fund can normally be redeemed on a daily basis. Please refer to the section entitled "How to Redeem Shares" in the prospectus.

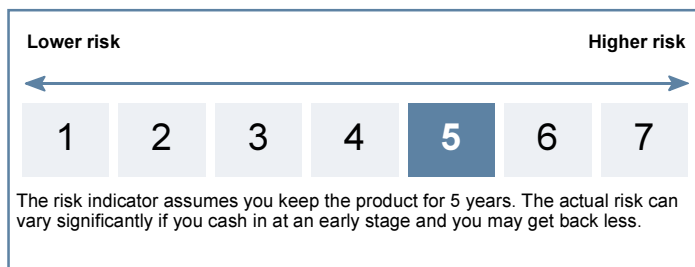

Distribution Policy This share class does not pay out a distribution. Any investment income generated will be reinvested.

Intended retail investor

Investors who are looking for capital appreciation and who are willing to accept the risk of stock market volatility. Investors who have a long term investment horizon.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This classification is subject to change over time.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions will likely impact the value of your investment.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not covered by the risk indicator include Equity Risk, Derivatives and Counterparty Risk and Fixed Income Risk. For a full list of risks, please refer to the fund's prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund or benchmark over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances.

What happens if PIMCO Global Advisors (Ireland) Limited is unable to pay out?

As a collective investment scheme that has engaged an independent depository to perform safekeeping and ownership verification duties on its assets in accordance with EU law, your investment is not exposed to the credit risk of PIMCO Global Advisors (Ireland) Limited. Nonetheless you may face financial loss should PIMCO Global Advisors (Ireland) Limited or the depository, State Street Custodial Services (Ireland) Limited default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario.

Investment: USD 10,000	If you exit after 1 year	If you exit after 5 years
Total costs	557 USD	1,238 USD
Annual cost impact (*)	5.6%	1.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.7% before costs and 10.0% after costs.

Composition of costs
