What is this product?

Type

This product is a UCITS sub-fund of a variable capital umbrella investment company with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended.

Subject to the conditions set down in the prospectus, shareholders may exchange all or part of their shares of this fund for shares of another fund of the company. Please refer to the section entitled "How To Exchange Shares" in the prospectus for further details.

Term

This product has no fixed term.

Objectives

The fund aims to maximise the total return on your investment by taking exposure to a wide range of asset classes and through the dynamic application of the investment advisor's macro and relative value views across liquid markets, using prudent investment management principles.

Investment Policy

The fund aims to achieve this objective by taking exposure to a wide range of assets from around the world. The fund has a flexible approach to asset allocation which is driven by the investment advisor's consideration of various quantitative and qualitative data relating to global economies, industrial sectors and asset classes.

The fund will invest in company shares, fixed income securities (which are similar to loans that pay a fixed or variable rate of interest) issued by companies or governments and cash. The fund will typically invest up to 60% of its net assets in company shares or similar securities. Fixed income securities may be both "investment grade" and "non-investment grade". Non-investment grade securities are

considered to be more risky, but typically produce a higher level of income. The fund may invest substantially in emerging markets, which in investment terms are those economies that are not as developed.

The fund may invest up to 15% of its total assets in commodity related instruments. The fund may gain exposure to property through property related instruments, including listed company shares, real estate investment trusts (REITs) or derivatives based on property related indices.

The fund intends to measure its performance against the ICE BofA ESTR Overnight Rate Index (the "Index"). The fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. However the Index is not used to define the portfolio composition of the fund or as a performance target.

The fund will promote environmental and social characteristics through an exclusion strategy and, where applicable, issuer engagement. The fund may use derivatives instruments (such as futures, options and swaps) for hedging and/or as part of its investment strategy. The derivatives return is linked to movement in the underlying assets.

The assets held by the fund may be denominated in a wide variety of currencies. The investment advisor may use foreign exchange and related derivative instruments to hedge or implement currency positions.

Dealing Day Shares in the fund can normally be redeemed on a daily basis. Please refer to the section entitled "How to Redeem Shares" in the prospectus.

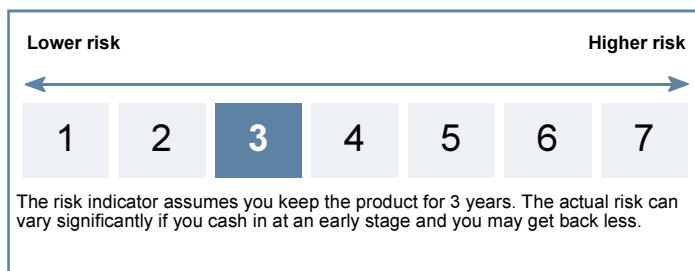

Distribution Policy This share class does not pay out a distribution. Any investment income generated will be reinvested.

Intended retail investor

Typical investors will be investors looking for a diversified multi-asset fund and those investors seeking an attractive total return over the medium to long term and who are willing to accept the risk and volatility of a portfolio investing predominantly in and allocating dynamically across global equity and fixed income markets.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This classification is subject to change over time.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level and poor market conditions are unlikely to impact the value of your investment.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not covered by the risk indicator include Equity Risk, Interest Rate Risk and Credit and Default Risk. For a full list of risks, please refer to the fund's prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund or benchmark over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances.

What happens if PIMCO Global Advisors (Ireland) Limited is unable to pay out?

As a collective investment scheme that has engaged an independent depository to perform safekeeping and ownership verification duties on its assets in accordance with EU law, your investment is not exposed to the credit risk of PIMCO Global Advisors (Ireland) Limited. Nonetheless you may face financial loss should PIMCO Global Advisors (Ireland) Limited or the depository, State Street Custodial Services (Ireland) Limited default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario.

Investment: EUR 10,000	If you exit after 1 year	If you exit after 3 years
Total costs	591 EUR	783 EUR
Annual cost impact (*)	5.9%	2.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.2% before costs and 0.5% after costs.

Composition of costs
