For more information on this product, please contact us by phone on +353 1776 9990 or via our website www.pimco.com.

This document was produced on 29 April 2024.

What is this product?

Type

This product is a UCITS sub-fund of a variable capital umbrella investment company with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended.

Subject to the conditions set down in the prospectus, shareholders may exchange all or part of their shares of this fund for shares of another fund of the company. Please refer to the section entitled "How To Exchange Shares" in the prospectus for further details.

Term

This product has no fixed term.

Objectives

The fund seeks to maximise long term return, consistent with preservation of capital and prudent investment management.

Investment Policy

The fund is an absolute return oriented global fixed income strategy, which seeks to achieve returns in excess of the ICE BofA SOFR Overnight Rate Index (the "Benchmark") (a measure of return in money market securities) over the medium to long term. The fund aims to achieve this objective by flexibly investing in a variety of fixed income instruments and securities (which are similar to loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world. Securities will be priced in a range of global currencies. The average portfolio duration of this fund will normally vary from negative 1 year to positive 5 years based on the investment advisor's forecast for interest rates. Duration measures the

sensitivity of the assets to interest rate risk. The longer the duration the higher the sensitivity to changes in interest rates.

The fund invests primarily in investment grade securities but may also invest up to 20% of its assets in "non-investment grade" securities. Noninvestment grade securities are considered to be more risky, but typically produce a higher level of income.

The fund may invest in emerging markets, which in investment terms are those economies that are not as developed. The fund is considered to be actively managed in reference to the Benchmark by virtue of the fact that it seeks to outperform the Benchmark. The Benchmark is not used to define the portfolio composition of the fund. The investment strategy does not restrict the extent to which the fund's holdings may deviate from the Benchmark. The fund may invest in derivative instruments (such as futures, options and swaps) for hedging or as part of its investment strategy. The derivatives return is linked to movements in the underlying assets.

The fund may hold currencies as well as securities that are priced in currencies from around the world. Non-USD denominated currency exposure is limited to 25% of total assets. The investment advisor may use foreign exchange and related derivative instruments to hedge or implement currency positions.

Dealing Day Shares in the fund can normally be redeemed on a daily basis. Please refer to the section entitled "How to Redeem Shares" in the prospectus.

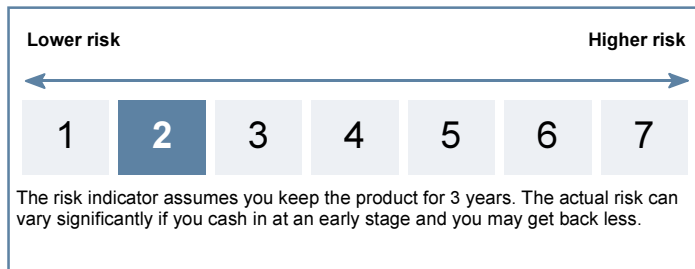

Distribution Policy This share class pays out a distribution of any investment income generated by the fund. You may elect for this to be reinvested into the fund.

Intended retail investor

Typical investors in the Fund will be investors who are looking for flexible global fixed income strategies with potential to provide returns higher than money market investments over a medium to longer term horizon and those who are willing to accept the risks and volatility associated with investing in global fixed income markets.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This classification is subject to change over time.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level and poor market conditions are very unlikely to impact the value of your investment.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not covered by the risk indicator include Interest Rate Risk, Credit and Default Risk and Currency Risk. For a full list of risks, please refer to the fund's prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund or benchmark over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances.

Recommended Holding Period: 3 years			
Investment: USD 10,000			
Scenarios		If you exit after 1 year	If you exit after 3 years (recommended holding period)
Minimum: There is no minimum guaranteed return if you exit before 3 years. You could lose some or all of your investment.			
Stress	What you might get back after costs Average return each year	7,360 USD -26.38%	7,950 USD -7.36%
Unfavourable	What you might get back after costs Average return each year	8,590 USD -14.12%	9,090 USD¹ -3.14% ¹
Moderate	What you might get back after costs Average return each year	9,680 USD -3.16%	9,970 USD² -0.11% ²
Favourable	What you might get back after costs Average return each year	10,250 USD 2.52%	10,550 USD³ 1.82% ³

¹ This type of scenario occurred for an investment between October 2019 and October 2022.

² This type of scenario occurred for an investment between January 2015 and January 2018.

³ This type of scenario occurred for an investment between April 2018 and April 2021.

What happens if PIMCO Global Advisors (Ireland) Limited is unable to pay out?

As a collective investment scheme that has engaged an independent depository to perform safekeeping and ownership verification duties on its assets in accordance with EU law, your investment is not exposed to the credit risk of PIMCO Global Advisors (Ireland) Limited. Nonetheless you may face financial loss should PIMCO Global Advisors (Ireland) Limited or the depository, State Street Custodial Services (Ireland) Limited default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario.

Investment: USD 10,000	If you exit after 1 year	If you exit after 3 years
Total costs	552 USD	654 USD
Annual cost impact (*)	5.5%	2.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.1% before costs and -0.1% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.	497 USD
Exit costs	We do not charge an exit fee for this product but, the person selling you the product may do so.	0 USD
Ongoing costs taken each year		If you exit after 1 year
Management fees and other administrative or operating costs	0.5% of the value of your investment per year. This is an estimate based on actual costs over the last year.	49 USD
Transaction costs	The impact of the costs of us buying and selling underlying investments for the product. This amount will vary depending on how much the fund buys and sells underlying investments.	6 USD
Incidental costs taken under specific conditions		If you exit after 1 year
Performance fees	This product does not have any performance fees.	0 USD

How long should I hold it and can I take money out early?**Recommended holding period: 3 years**

This product has no required minimum holding period but is designed for medium term investment; you should be prepared to stay invested for at least 3 years. You may sell your shares in the product, without penalty, on any day on which the banks are normally open for business in the United States.

How can I complain?

If you have any complaints about the product or conduct of the manufacturer or the person advising on, or selling the product, you may lodge your complaint in one of three ways:

- You can contact us on + 353 1776 9990 and we will log your complaint and explain what to do.
- You may log your complaint via our website www.pimco.com or via email PIMCOEMteam@statestreet.com.
- You may send your complaint in writing to PIMCO Shareholder Services State Street Fund Services (Ireland) Limited 78 Sir John Rogerson's Quay, Dublin 2, D02 HD32 Ireland.
