What is this product?

Type

This product is a UCITS sub-fund of a variable capital umbrella investment company with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended.

Subject to the conditions set down in the prospectus, shareholders may exchange all or part of their shares of this fund for shares of another fund of the company. Please refer to the section entitled "How To Exchange Shares" in the prospectus for further details.

Term

This product has no fixed term.

Objectives

The fund aims to maximise the total return on your investment through investing in a diversified portfolio of primarily investment grade bonds of varying maturities, using prudent investment management principles.

Investment Policy

The fund aims to achieve this objective by investing primarily in a range of "investment grade" fixed income securities and instruments (which are similar to loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world and mainly priced in euros.

The average portfolio duration of the fund will normally vary from zero to five years based on the investment advisor's forecast for interest rates. Duration measures the sensitivity of the assets to interest rate risk. The longer the duration the higher the

sensitivity to changes in interest rates.

The fund invests primarily in "investment grade" securities (but may also invest up to 20% in "non-investment grade" securities). Non-investment grade securities are considered to be more risky, but typically produce a higher level of income.

The fund intends to measure its performance against the Euro Short-Term Rate (€STR) (the "Benchmark"). The fund is considered to be actively managed in reference to the Benchmark by virtue of the fact that it uses the Benchmark for performance comparison purposes. However the Benchmark is not used to define the portfolio composition of the fund or as a performance target.

The fund may invest in emerging markets, which in investment terms are those economies that are not as developed.

The fund may invest in derivative instruments (such as futures, options and swaps) rather than directly in the underlying securities themselves. The derivatives return is linked to movements in the underlying assets.

The assets held by the fund may be denominated in a variety of currencies with non-euro denominated currency exposure limited to 20% of total assets. The investment advisor may use foreign exchange and related derivative instruments to hedge or implement currency positions.

Dealing Day Shares in the fund can normally be redeemed on a daily basis. Please refer to the section entitled "How to Redeem Shares" in the prospectus.

Distribution Policy This share class does not pay out a distribution. Any investment income generated will be reinvested.

Intended retail investor

Typical investors in the Fund will be investors who are looking to maximise total return and focus on capital preservation and are looking for a diversified exposure to primarily European fixed income markets, focusing on securities with a shorter duration, and who are willing to accept the risks and volatility associated with investing in such markets and who have a shorter investment horizon.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 1 year. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This classification is subject to change over time. We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level and poor market conditions are very unlikely to impact the value of your investment.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not covered by the risk indicator include Credit and Default Risk and Interest Rate Risk. For a full list of risks, please refer to the fund's prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund or benchmark over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances.

What happens if PIMCO Global Advisors (Ireland) Limited is unable to pay out?

As a collective investment scheme that has engaged an independent depository to perform safekeeping and ownership verification duties on its assets in accordance with EU law, your investment is not exposed to the credit risk of PIMCO Global Advisors (Ireland) Limited. Nonetheless you may face financial loss should PIMCO Global Advisors (Ireland) Limited or the depository, State Street Custodial Services (Ireland) Limited default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario.

Investment: EUR 10,000	If you exit after 1 year
Total costs	537 EUR
Annual cost impact (*)	5.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.7% before costs and -4.7% after costs.
