What is this product?

Type

The product is a share of the sub-fund Emerging Markets Equity Fund (the "fund") which is part of the T. Rowe Price Funds SICAV (the "Umbrella Fund")...

Term

This fund does not have a maturity date. The manufacturer is entitled to terminate the PRIIP unilaterally, in the case of a full liquidation of the sub-fund.

Objectives

To increase the value of its shares, over the long term, through growth in the value of its investments.

Portfolio Securities: The fund is actively managed and invests mainly in a diversified portfolio of shares of emerging market companies.

Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics ("E & S") is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments.

The fund may use derivatives for hedging and efficient portfolio management.

Investment Process: The investment manager's approach is to:

- Employ fundamental analysis to identify companies with sustainable above-market earnings growth rates.
•Focus on franchise strength, management team quality, free cash flow, and financing/balance sheet structure.
•Verify relative valuation appeal versus both the local market and broad sector opportunity set.
•Apply negative screening for macroeconomic and political factors to temper bottom-up enthusiasm for specific securities.
•Assess environmental, social and governance ("ESG") factors with particular focus on those considered most likely to have a material impact on the performance of the holdings or potential holdings in the funds' portfolio.

These ESG factors, which are incorporated into the investment process alongside financials, valuation, macro-economics and other factors, are components of the investment decision.

Business day Orders to buy, switch and redeem shares are ordinarily processed any day that is a full bank business day in Luxembourg except on days when markets, in which a substantial amount of the portfolio is traded, are closed or the day before.

You can contact the share dealing team by email ta.is.registration@jpmorgan.com or by telephone on +352 4626 85162.

What are the risks and what could I get in return?

Risk Indicator

Lower risk Higher risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this fund as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the sub-fund's capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		5 years	
Example Investment:		10,000 USD	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	1,960 USD	1,810 USD
	Average return each year	-80.40%	-28.95%
Unfavourable	What you might get back after costs	6,000 USD	5,560 USD

Favourable	What you might get back after costs	14,660 USD	20,090 USD
	Average return each year	46.60%	14.97%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between February 2021 and May 2024.

Moderate scenario: This type of scenario occurred for an investment between May 2014 and May 2019.

Favourable scenario: This type of scenario occurred for an investment between February 2016 and February 2021.

What happens if T. Rowe Price (Luxembourg) Management S.à r.l. is unable to pay out?

The assets of the fund are held in safekeeping by its depositary. In the event of the insolvency of the Manager, the fund's assets in the safekeeping of the depositary will not be affected. However, in the event of the depositary's insolvency, or someone acting on its behalf, the fund may suffer a financial loss.

This risk is to a certain extent caused by the fact the depositary is required by law and regulation to segregate its own assets from the assets of the fund. The depositary will also be liable to the fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure to properly fulfil its obligations (subject to certain limitations). There is no compensation or guarantee scheme protecting you from a default of the fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10,000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	741 USD	2,041 USD
Annual cost impact (*)	7.4%	3.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.9 % before costs and 2.4 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The impact of the explicit costs you might pay when entering your investment. We do not normally apply entry charges on the A share class. However, if you buy our funds through certain distributors they may instruct us to deduct an entry charge from your initial investment. Currently 5%.	Up to 500 USD
Exit costs	The impact of the explicit costs you might pay when exiting your investment. Currently 0.00%. No exit costs of our funds per the prospectus so please align with the prospectus.	0 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	The impact of the explicit costs that we levy each year for managing and administering your investment. Currently 2.07%.	207 USD
Transaction costs	0.34% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	34 USD
Incidental costs taken under specific conditions		
Performance fees (and carried interest)	The impact of the explicit costs we might levy, when the fund outperforms its benchmark. Currently 0.00%.	0 USD

How long should I hold it and can I take money out early?

This product is designed for medium to long-term investment. Since the value of investments and the income from them can rise and fall over differing time periods, you should have an investment horizon of at least 5 years when buying an investment of this type. The minimum recommended holding period is therefore 5 years.

The Management Company shall redeem units of any fund at the redemption price on each dealing day. Redemptions of the applicable fund will be effected at the valuation point on the relevant dealing day. The price is based on the net asset value per unit of each class determined at the valuation point. Redemption requests received after the dealing deadline will be treated as having been received by the following dealing deadline unless otherwise determined by the Management Company. Please contact your broker, financial adviser or distributor for information on any costs and charges relating to the sale of the shares.

How can I complain?

If you choose to invest in the fund and subsequently have a complaint about it or the Manager or any distributor of the fund, you should in the first instance address a complaint in writing, by post or by email indicating your name (for legal entities, the name of the legal entity and its legal representatives) together with your contact details, while formally indicating this is a complaint. You should describe the facts of the complaint in detail, enclosing all relevant supporting documentation. Email: TRP_SARL_Complaints_group@troweprice.com. Address: T. Rowe Price (Luxembourg) Management S.à r.l., To the attention of the Conducting Officer responsible for Complaint handling, 35, Boulevard du Prince Henri, L-1724 Luxembourg, Grand Duchy of Luxembourg.
