## What is this product?

### Type:

This product is a UCITS fund.

### Objectives:

The Fund aims to achieve a minimum excess annualised return of 2% over the MSCI Europe Index (Total Return, Net of Tax, EUR) ("Benchmark") before fees over a market cycle (typically 3-5 years) from investing primarily in a portfolio of European equity holdings, that comply with the Sustainable Criteria, as detailed in the "Sustainable Investment Criteria" section in the Prospectus.

There can be no guarantee that the Fund will ultimately achieve its investment objective.

The Fund invests in equity securities that are listed or traded on "Recognised Markets" (defined in the Prospectus) in Europe, which may include emerging (less developed) market countries. The Fund may invest in companies of any market capitalization.

The Fund invests in equity securities issued by companies from different industries whose behaviours, processes and operations contribute to system-level progress towards environmental and social objectives, such as: access to healthcare, sustainable consumption (which is the use of products, energy and services so as to lower the environmental impact of such use) and conscious consumers, access to information and the digital revolution, energy transition, resource efficiency, human capital development, fintech and financial inclusion, which is the availability and equality of opportunities to access financial services.

The Fund promotes environmental and social characteristics pursuant to Article 8 of SFDR.

Income will be declared and distributed as a dividend annually.

### Term:

The Fund has no fixed maturity date, however it may be terminated in certain circumstances, as described in the Prospectus in the section "Termination of Portfolios or Share Classes".

The shares may be exchanged for shares in another sub-fund of NBIF in accordance with the terms of the Prospectus. Charges may apply.

Shares in the Fund can be bought or sold on any day defined as a Business Day in Prospectus.

NBIF is established as an umbrella fund with segregated liability between sub-funds under Irish law.

Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") is appointed as the depositary of NBIF.

You can obtain copies of the Prospectus and the latest reports and accounts for NBIF free of charge in English, German, French, Italian and Spanish, along with the latest published prices of shares and other information on the Fund, free of charge from Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"), 30 Herbert Street, Dublin 2, Ireland.

### Benchmark:

The Fund is actively managed and does not intend to track the benchmark, the MSCI Europe Index (Total Return, Net of Tax, EUR) which is used for performance comparison purposes. The Fund's investment policy restricts the extent to which the Fund's holdings may deviate from the Benchmark. This deviation may be significant.

### Intended retail investor:

This Fund may be compatible with the needs of investors seeking a fund to deliver income and/or capital growth with an investment horizon of 4 years or more, as part of a diversified portfolio of investments. The Fund is a medium-high risk product and investors should consider this when deciding the mix of their portfolio of investments. Investors who are unsure that they have the knowledge and experience to make informed investment decisions about this Fund or to construct a diversified portfolio should seek professional investment advice. The Fund is unlikely to be compatible with the needs of those investors seeking a single investment, or to achieve a specified return by a particular date.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 4 years.

The summary risk indicator is a guide to the level of risk of this Fund compared to other products. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of NBAMIL to pay you.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the Fund Prospectus and/or supplement at [www.nb.com/en/gb/legal-documents](http://www.nb.com/en/gb/legal-documents). The Fund does not include any protection from future market performance so you could lose some or all of your investment. If we are unable to pay you what is owed, you could lose your entire investment.

## Performance scenarios

The figures shown include all the costs of the Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund/representative portfolio over the last 10 years.

## What happens if NBAMIL is unable to pay out?

Investors may face financial losses as a result of the default of the Fund, NBIF, NBAMIL or any of the service providers appointed to the Fund, including the Sub-Investment Managers (or their affiliates), the Administrator, the Depositary, or a trading counterparty. Any such losses are not covered by any investor compensation or guarantee scheme.

## What are the costs?

The person advising on or selling you this Fund may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0% annual return). For the other holding period, we have assumed the Fund performs as shown in the moderate scenario and the investment is EUR 10,000.

Investment: EUR 10,000	If you exit after 1 year	If you exit after 4 years
<b>Total costs</b>	662 EUR	1,257 EUR
<b>Annual cost impact (*)</b>	6.6%	3.0%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.8% before costs and 2.8% after costs.
