What is this product?

Type:

This product is a UCITS fund.

Objectives:

The Fund aims to maximise total return through high current income and long-term growth from investments in fixed and floating rate bonds under varying market environments and with a focus on downside protection. Downside protection is built in through portfolio construction techniques and security selection processes, to reduce the frequency or magnitude of losses.

The Fund will invest primarily in debt securities issued by US corporations or by the US government and its agencies. Investments may be made in investment grade, high yield or unrated debt securities. The Fund may also invest in debt securities issued by non-US governments and its agencies and corporations located globally. This may include investing in debt securities issued by companies located in and governments and government agencies of emerging (less developed) market countries. Exposure to Emerging Market Countries will typically not exceed 30% of the Portfolio's Net Asset Value.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB or above by one or more recognised rating agencies. High yield bonds generally have lower credit ratings, carry higher risks non-payment but offer a higher income.

The Fund may also invest in financial derivatives instruments, that exaggerate the potential returns or potential losses to achieve more growth, reduce risk or increase operational efficiencies.

The Fund promotes environmental and social characteristics pursuant to Article 8 of SFDR

Income will be declared and distributed as a dividend quarterly.

Term:

The Fund has no fixed maturity date, however it may be terminated in certain circumstances, as described in the Prospectus in the section "Termination of Portfolios or Share Classes".

The shares may be exchanged for shares in another sub-fund of NBIF in accordance with the terms of the Prospectus. Charges may apply.

Shares in the Fund can be bought or sold on any day defined as a Business Day in Prospectus.

NBIF is established as an umbrella fund with segregated liability between sub-funds under Irish law.

Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") is appointed as the depositary of NBIF.

You can obtain copies of the Prospectus and the latest reports and accounts for NBIF free of charge in English, German, French, Italian and Spanish, along with the latest published prices of shares and other information on the Fund, free of charge from Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"), 30 Herbert Street, Dublin 2, Ireland.

Benchmark:

The Fund is actively managed and it is not constrained by the benchmark, the Bloomberg U.S. Aggregate Index (Total Return, USD) which is used for performance comparison purposes only. The Fund gives some consideration to the benchmark constituents in the selection of securities and may not hold all or many of the benchmark's components.

Intended retail investor:

This Fund may be compatible with the needs of investors seeking a fund to deliver income and/or capital growth with an investment horizon of 3 years or more, as part of a diversified portfolio of investments. The Fund is a medium-low risk product and investors should consider this when deciding the mix of their portfolio of investments. Investors who are unsure that they have the knowledge and experience to make informed investment decisions about this Fund or to construct a diversified portfolio should seek professional investment advice. The Fund is unlikely to be compatible with the needs of those investors seeking a single investment, or to achieve a specified return by a particular date.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this Fund compared to other products. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of NBAMIL to pay you.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the Fund Prospectus and/or supplement at www.nb.com/en/gb/legal-documents. The Fund does not include any protection from future market performance so you could lose some or all of your investment. If we are unable to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund/representative portfolio over the last 10 years.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0% annual return). For the other holding period, we have assumed the Fund performs as shown in the moderate scenario and the investment is USD 10,000.

| Investment: USD 10,000 | If you exit after 1 year | If you exit after 3 years |
|-------------------------------|--------------------------|---------------------------|
| Total costs | 99 USD | 319 USD |
| Annual cost impact (*) | 1.0% | 1.0% |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.3% before costs and 3.3% after costs.

Composition of costs

| One-off costs upon entry or exit | | If you exit after 1 year |
