## WHAT IS THIS PRODUCT?

**Type:** This product is a sub-fund of First Trust Global Funds plc (the "Company"), an open-ended investment fund established as a public limited company with segregated liability between sub-funds. The product is an exchange-traded fund.

**Term:** This product is not subject to any fixed term. The Company is open-ended, however, the shares of the Fund or a class may be redeemed by the Company with notice to shareholders in the circumstances described in the Prospectus.

### Objectives:

- The fund's investment objective is to deliver to investors total returns over the medium to long term by investing in sovereign fixed income securities globally.
- It is recommended that an investment in the fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.
- The fund intends to pursue an actively managed investment strategy. The fund invests primarily in sovereign fixed income securities and will seek to minimize the effect of the underlying currency exposure of those securities by utilizing currency hedging transactions. The fund may also use interest rate financial derivative instruments in order to manage and hedge its interest rate exposure. The financial derivative instruments used may be forward foreign exchange contracts, currency futures, interest rate futures and interest rate swaps.
- The sovereign fixed income securities in which the fund may invest may be in developed or emerging markets countries (including Russia), will be issued by governments, local authorities, supranational organisations and public sector bodies, and will be rated investment grade at the time of purchase. The fund's exposure to below investment grade will be capped at 30% of its net asset value. Under normal market conditions, the weighted average duration of the fund's portfolio is likely to range between two and four years.
- The fund will use exchange-traded and over the counter financial derivative instruments (forward foreign exchange contracts, currency futures, interest rate swaps and interest rate futures), each as described in the fund's Prospectus, in order to manage and hedge the currency, interest rate and foreign exchange rate risk exposures of the fund. The fund will also use interest rate swaps and interest rate futures for investment purposes. The fund may take active long and short currency positions in a particular currency which may not be denominated in the fund's base currency, some of which may operate as a hedge of its currency exposure. The fund will seek to hedge the currency exposures of the sovereign fixed income securities using financial derivative instruments to minimize the impact of fluctuations in those currencies' values versus the base currency of the fund. The fund will seek to use financial derivative instruments for investment purposes and/or to manage the fund's overall exposure to interest rate risk arising from its holdings.

It is intended to declare dividends on a quarterly basis.

You may sell your shares usually by sending your request to the administrator on any day on which the London Stock Exchange is open for business.

### Intended Retail Investor:

The product is intended for retail investors who: (i) can bear loss of capital, are not seeking to preserve capital and who are not looking for capital guarantee; (ii) have specific knowledge or experience of investing in similar products and in financial markets; and (iii) seek a product offering total returns with lower correlation to the broader equity and bond markets over the medium to long term through its exposure to global currencies and related markets and have an investment horizon in line with the recommended holding period stated below.

**Depositary:** The Bank of New York Mellon SA/NV, Dublin Branch

## WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested

Investment: 10 000 EUR	If you exit after 1 Year	If you exit after 5 Years (recommended holding period)
<b>Total Costs</b>	<b>EUR 69</b>	<b>EUR 323</b>
Annual Cost Impact (*)	0.7% each year	0.7% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.9% before costs and -1.6% after costs.

### Composition of Costs
